BACKGROUND OF THE BAYLOR CENTER FOR COMMUNITY RESEARCH AND DEVELOPMENT

Mission

The Center for Community Research and Development (CCRD) was established at Baylor University in 1979 as a multidisciplinary entity with a mission of **engaging Baylor faculty and students in applied social research to improve the local quality of life**. Over time, the CCRD has broadened its focus, sometimes engaging in statewide or national research, and the CCRD has become closely linked with Baylor's Ph.D. program in Applied Sociology, where Ph.D. students serve as center research analysts. Still, our research remains multidisciplinary and many of the CCRD's projects retain a local quality of life focus.

Facilities

The CCRD originally worked out of faculty offices in Sociology and Political Science and moved into its own facilities in 1990, when the operations center was located in the basement of the Sid Richardson Science Building. The CCRD moved to Suite 300 of the Robinson Tower in 1994. These modern facilities allow easier access to the community and include:

- offices for Center directors, six doctoral students, research analysts, and a project coordinator,
- focus group facilities with a separate observation room and recording equipment,
- a conference room for meetings and graduate seminars,
- report production facilities for CCRD documents,
- a local area network with Windows operating systems, and
- a Computer Assisted Telephone Interviewing (CATI) system.

Services

The Center for Community Research and Development is equipped to undertake a wide variety of projects for organizations, businesses, industries, and governmental agencies. Services include:

- Mail Surveys
- Telephone Surveys
- Questionnaire design
- Needs assessments
- Program planning and evaluation
- Impact assessments
- Population trend studies and projections
- Data collection and analysis
- Sampling designs
- Focus groups
- Seminars and workshops on community issues
- Mock Juries and Jury Consulting

Society for Applied Sociology

From 1998 through 2001, the CCRD served as the administrative office for the Society for Applied Sociology, an international organization for professionals involved in applying sociological knowledge in a wide variety of settings. The CCRD retains an active membership in SAS and Dr. Tillman Rodabough is the President. The mission statement for SAS is to:

- Provide a forum for sociologists and others interested in applying sociological knowledge.
- Enhance understanding of the interrelationship between sociological knowledge and sociological practice.
- Increase the usefulness and effectiveness of applied sociological research and training.

Selected Previous Clients

The CCRD has served a varied clientele on a large number of issues. Representative projects include:

- **Telephone surveys** for the City of Waco, Southwestern Bell, the *Waco Tribune-Herald*, Houston Profile Project
- **Site location research** for the Perryman Group, American Airlines
- **Needs assessments** for the Baptist General Convention of Texas, the United Way, HOTCOG
- **Population projections** for the Heart of Texas Council of Governments, Heritage House
- **Focus groups** for Creative Education Institute, Baylor University, EEOC, City of Waco, the United Way
- **Mail-out surveys** for Hillcrest Baptist Medical Center, the City of Woodway, Baptist General Convention of Texas
- **Intercept surveys** for Richland Mall, the Texas Ranger Museum, the Dr. Pepper Museum
- **Mock juries** and **change of venue** research for Amarillo, Dallas and Waco law firms
- **Program assessments** for the McLennan County Youth Collaboration, Waco Police Department
- **Door-to-door surveys** for the Waco Housing Authority, Mission Waco, Drug Prevention Resources
- **Voter exit interviews** for the Dallas Independent School District
- **Institutional evaluation** for San Marcos Baptist Academy, the BGCT Education Commission. Baptists in Scouting, Baylor University, Waco Independent School District
- **Program development** for the Cooper Foundation, the Junior League, MHMR

Fees

The CCRD is a non-profit service center for the community and University. Fees charged for research projects represent actual costs for services and enable the CCRD to be self-supporting.

Staff

- **Dr. Larry Lyon** is Director of the CCRD, Dean of the Graduate School, and Professor of Sociology in the Department of Sociology and Anthropology (Larry_Lyon@Baylor.edu).
- **Dr. Tillman Rodabough** is Research Director for the CCRD and Professor of Social Psychology in the Department of Sociology (Tillman_Rodabough@Baylor.edu).
- **Mrs. Debbie Marable** is the Projects Coordinator for the CCRD, Graduate Program Assistant for Sociology and a graduate of Baylor University (Debbie_Marable@Baylor.edu).
- **Dr. Carson Mencken** is Associate Professor of Sociology and Graduate Program Director for Sociology, with research expertise in statistical analysis and spatial modeling and serves as a research professor for CCRD (Carson_Mencken@Baylor.edu).
- **Dr. Robyn Bateman Driskell** is Associate Professor of Sociology with expertise in demography and serves as a research professor for the CCRD (Robyn_Bateman@Baylor.edu).
- **Dr. Charles Tolbert, II** is Professor and Chair, Department of Sociology and Anthropology and GIS and census data consultant for CCRD (Charlie_Tolbert@Baylor.edu).
- **Lacey C. Wiggins, M.A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Lacey_Chapman@Baylor.edu).
- **Rusty Parker, M. A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Rusty_Parker@Baylor.edu).
- **Jodien Matos** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jodien_Matos@Baylor.edu).
- **Kathy Krey** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Kathy_Krey@Baylor.edu).
- **Jeniece Williams** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jeniece_Williams@Baylor.edu).
- **Elizabeth Terrazas-Carrillo** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Elizabeth_Terrazas@Baylor.edu).
- **Liz Embry** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Elizabeth_Ninneman@Baylor.edu).

Each staff person can also be contacted at the CCRD office (254) 710-3811 or e-mailed at CCRD@Baylor.edu. Our website address is <http://www.Baylor.edu/CCRD>

Background of the Poll

Center for Community Research and Development
Poll 98
(September 2004)

In the fall of 2003, the Center for Community Research and Development (CCRD) conducted a scientific poll to assess religious and lifestyle practices and beliefs in 45 communities in the Greater Houston Area. Questions for the poll were developed by CCRD researchers using national polls on lifestyles and religion as a guideline.

From October 1 through November 15, a total of 2,419 Greater Houston Area residents were interviewed using a Computer Assisted Telephone Interviewing (CATI) system. The CATI technology allows control over the interviewing process and automates data entry. The sample was selected from a computer-generated set of random phone numbers. Random generation includes residents with unlisted numbers. Other steps taken to ensure the quality of the poll include: (1) testing and editing experimental versions of the questionnaire to increase the clarity and reliability of each question; (2) intensive training for each interviewer; (3) continual monitoring of interviews by social science Ph.D.s; (4) daily review of work and interviewing procedures and results by the CCRD staff; (5) calling during times established in previous studies to provide the most representative sample; (6) making up to five call-backs for each phone number to avoid distorting the sample toward the more easily accessible residents; (7) using special “screens” to increase the number of male and minority respondents; (8) purchasing a special bank of phone lines with “Community Research” as the caller identification label rather than the standard label, “Baylor University;” and (9) employing Spanish speaking interviewers for households where Spanish is the primary language.

The demographic characteristics of the sample resemble those of demographics available through external sources. While the sample is largely representative of the population, minority ethnic groups were slightly under-represented among respondents in the poll. To compensate, this analysis uses weighted data to ensure a more representative sample. The final sample is comparable to official data available on the 45 communities in the Greater Houston Area’s 3,097,362 adults. For example, the sample used in the analysis is approximately 58% “Anglo,” 20% Hispanic, and 17% African-American.^[1] The percentages for African Americans and Anglos closely reflect recent Census estimate population numbers for the 45 communities in the Greater Houston Area.^[2] Other population numbers/sample comparisons suggest similarly low levels of bias.

For the overall response distributions of the questionnaire data, the responses will typically vary by less than 3 percentage points in either direction at the 95% confidence level. For cross-tabulation tables that analyze smaller portions of the sample by dividing it into various categories such as race or education, the percentage of variation will be considerably higher.

^[1] Throughout this report, the terms “White” and “Anglo” refer to non-Hispanic whites. “African-American” and “Black” are used interchangeably.

^[2] 2002 Census estimates show a total adult population of 3,097,362 for the 45 communities in the Greater Houston Area. Of the approximately 3,097,362 adults: about 45.0% are Anglo, 17.5% African American, 30.2% Hispanic, 0.4% American Indian, 5.4% Asian/Pacific Islander and 1.4% are Multi-Racial.

Executive Summary

Center for Community Research and Development

Katy Area (CSA #20)

- The racial/ethnic composition of the Katy Area CSA is diverse, with Anglos comprising a large percentage of the population, and significantly different from the Greater Houston Area.
- The percentage of the population aged 35 to 54 is greater in the Katy Area CSA than in the Greater Houston Area (20.2% vs. 16.5%).
- In the Katy Area CSA, 41.7% of the residents hold college or graduate/professional degrees.
- There is a larger percent of married couples with children in the Katy Area CSA than in the Greater Houston Area (56.4% vs. 43.0%).
- In the Katy Area CSA, 52.7% of the residents earn incomes above \$75,000.
- 53.82% of the residents in the Katy Area CSA get a great deal of satisfaction from their neighborhood.
- The Katy Area CSA ranks number one among all CSAs in the Greater Houston Area on family satisfaction.
- The Katy Area CSA ranks eighth of all CSAs in the Greater Houston Area on satisfaction from friends.
- The Katy Area CSA ranks in the upper half of all CSAs in the Greater Houston Area on success at balancing work and family.
- The Katy Area CSA ranks fourth among all CSAs in the Greater Houston Area on overall happiness.
- The Katy Area CSA ranks twelfth among all CSAs in the Greater Houston Area on weekly church attendance.
- In the Katy Area CSA, over 7,200 adults never attend church.
- Over 17,900 more adults in the Katy Area CSA report being born again than report attending church each week.
- There seems to be a high level of spiritual interest among residents of the Katy Area CSA, which is parallel to high levels of church attendance.
- The Katy Area CSA ranks tenth of all CSAs in the Greater Houston Area on percent who are likely to see a religious counselor when they have problems.
- Over twice as many people in the Katy Area CSA read the Bible or other inspired literature when they have a problem (74.31%) than would seek help in a place of worship (32.98%).
- Over 11,100 adults in the Katy Area CSA do not report that they are likely to pray when they have problems.
- The Katy Area CSA ranks in the bottom half of all CSAs in the Greater Houston Area on percent who have no doubts about the existence of God.

Katy Area (CSA #20)**

Demographics

Center for Community Research and Development
Community Poll 98

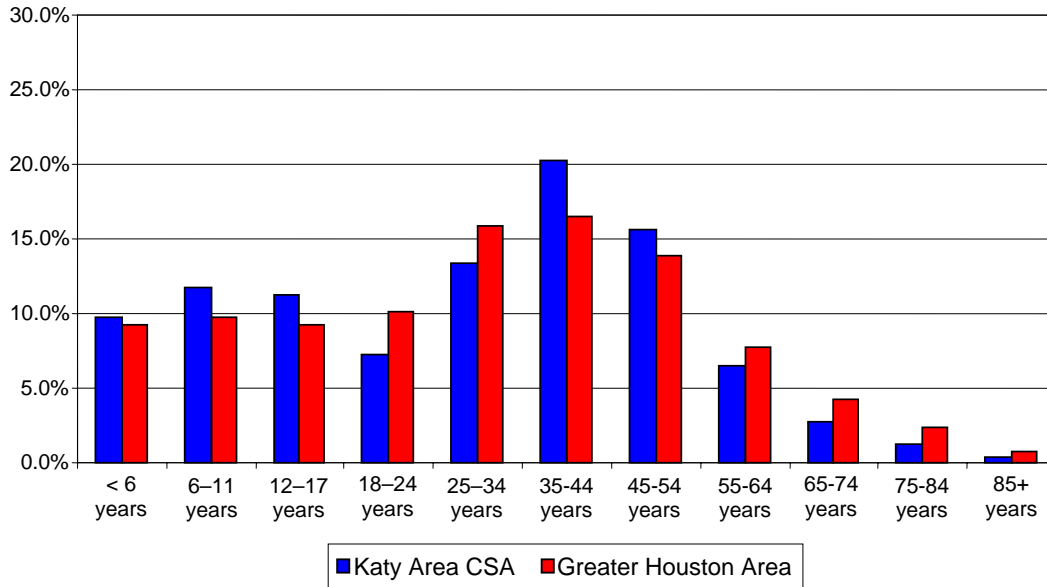

**Population by Race/Ethnicity
Katy Area CSA and Greater Houston Area**

- There are differences of racial composition between the Katy Area CSA and the Greater Houston Area.
- Anglos comprise almost three quarters of the population in the Katy Area CSA, compared to less than half in the Greater Houston Area (71.6% vs. 45.0%).
- The percent of Blacks is over three times higher in the Greater Houston Area than in the Katy Area CSA (17.5% vs. 5.4%).
- In the Katy Area CSA, Hispanics represent 16.5% of the population, whereas in the Greater Houston Area they comprise 30.2%.
- There is a slightly lower percentage of Asian/Pacific Islanders in the Katy Area CSA than in the Greater Houston Area (5.0% vs. 5.4%).
- Few differences exist between the Katy Area CSA and the Greater Houston Area, in either the American Indian or Multi-Racial race/ethnicity categories.

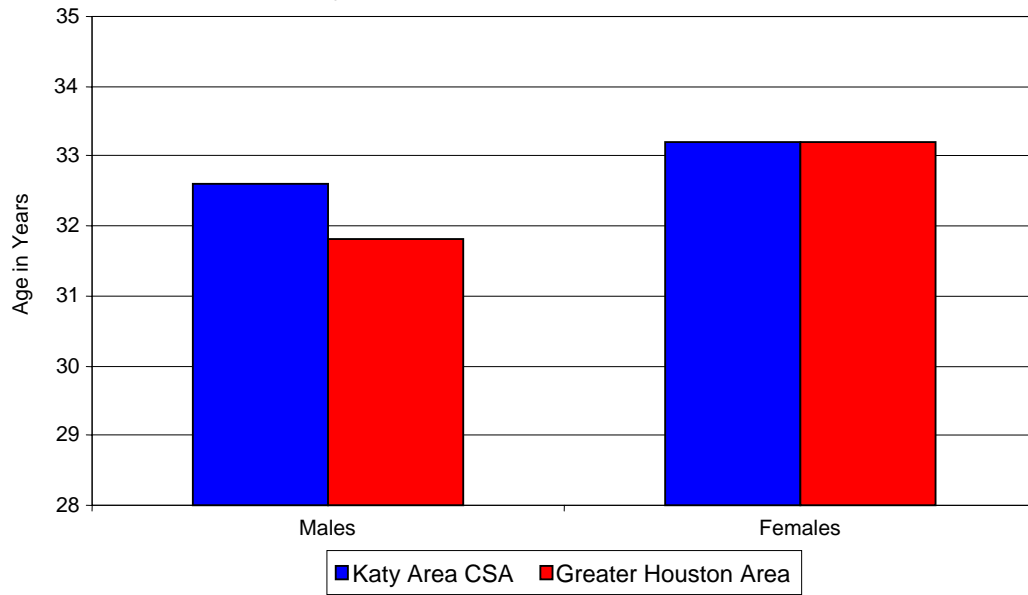

**Population by Age
Katy Area CSA and Greater Houston Area**

- There are significant differences between the Greater Houston Area and the Katy Area CSA.
- In the Katy Area CSA, the percent of the population under 18 is higher than in the Greater Houston Area (32.6% vs. 28.3%).
- People between the ages of 18 to 24 comprise a larger percentage in the Greater Houston Area as compared with the Katy Area CSA (10.1% v.7.3%).
- The percentage of the population aged 35 to 54 is greater in the Katy Area CSA than in the Greater Houston Area (20.2% vs. 16.5%).
- In the Greater Houston Area, there is a higher percent of people between the ages of 55 to 84 than in the Katy Area CSA (14.5% vs. 10.5%).
- There is little difference between the Greater Houston Area and the Katy Area CSA in the category including people over 85 years (0.8% vs. 0.4%).

**Median Age Males and Females
Katy Area CSA and Greater Houston Area**

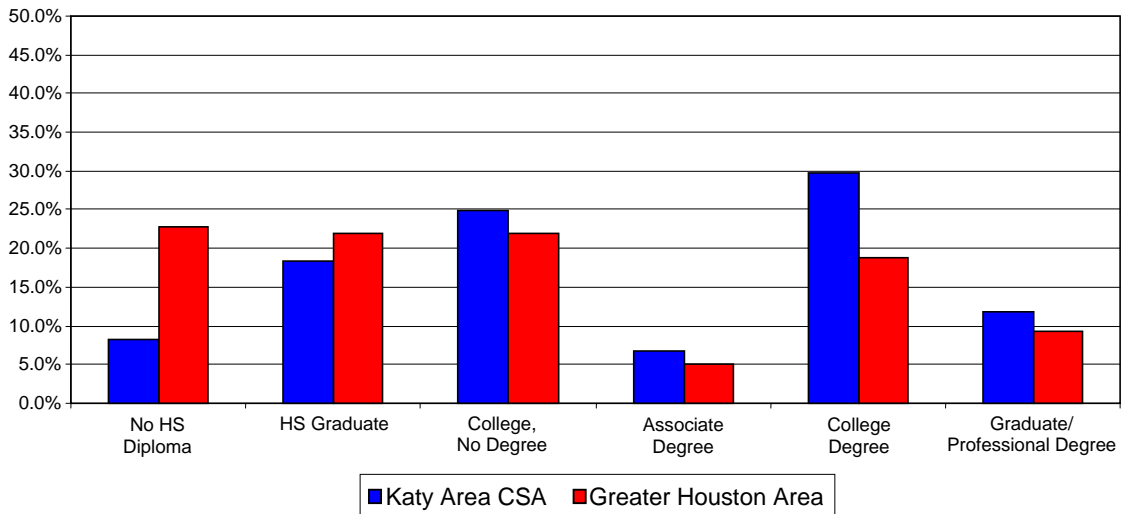

**Population by Sex
Katy Area CSA and Greater Houston Area**

- There are only slight differences in age and sex composition between the Greater Houston Area and the Katy Area CSA.
- In the Greater Houston Area males comprise 49.9%, whereas in the Katy Area CSA they comprise 49.4%.
- The percent of females in the Greater Houston Area is 50.1%, compared to 50.6% in the Katy Area CSA.
- Median age for males is 31.8 years in the Greater Houston Area, compared to 32.6 in the Katy Area CSA.
- There is no difference between the Greater Houston Area and the Katy Area CSA in terms of female median age: both are 33.2 years.

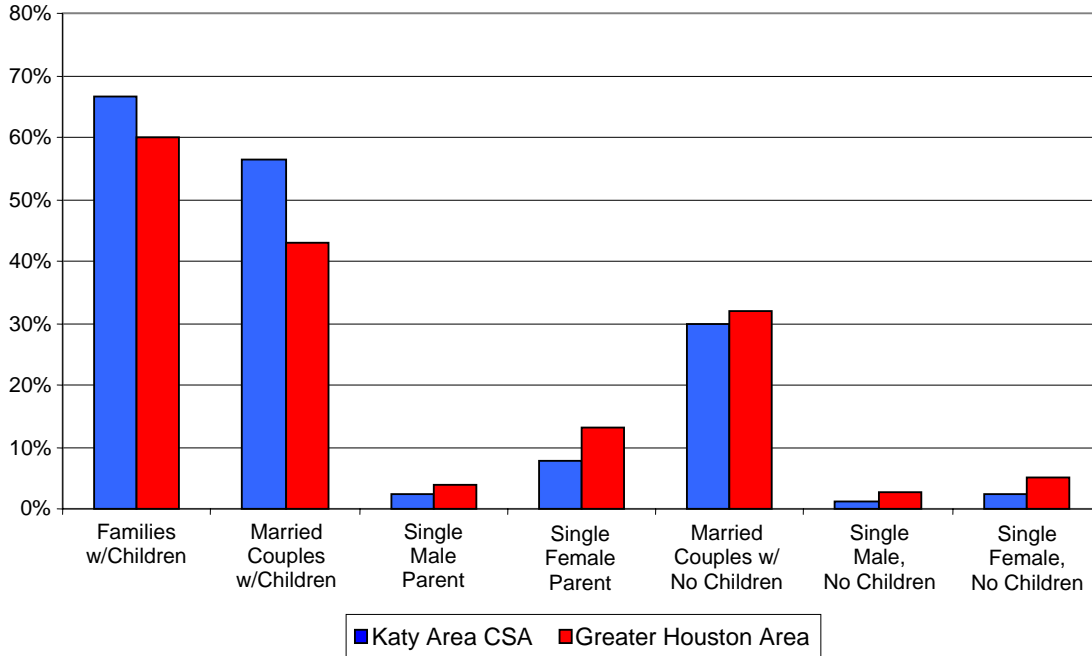

**Education Levels for Adults 25+
Katy Area CSA and Greater Houston Area**

- There are differences between the Greater Houston Area and the Katy Area CSA in terms of educational attainment.
- People without a high school diploma make up only 8.3% in the Katy Area, a percent over two times lower compared with the 22.8% in the Greater Houston Area.
- High school graduates with no college, comprise 18.3% of the population in the Katy Area CSA, whereas in the Greater Houston Area they comprise 22.0%.
- In the Katy Area CSA, the percentage of the population with some college education and associate degrees is higher than in the Greater Houston Area (31.7% vs. 27.1%).
- A larger percent of the population hold college degrees in the Katy Area CSA than in the Greater Houston Area (29.8% vs. 18.8%).
- People with graduate/professional degrees comprise 9.3% of the population of the Greater Houston Area, compared to 11.9% in the Katy Area CSA.
- In the Katy Area CSA, 41.7% of the residents hold either college, or graduate/professional degrees.

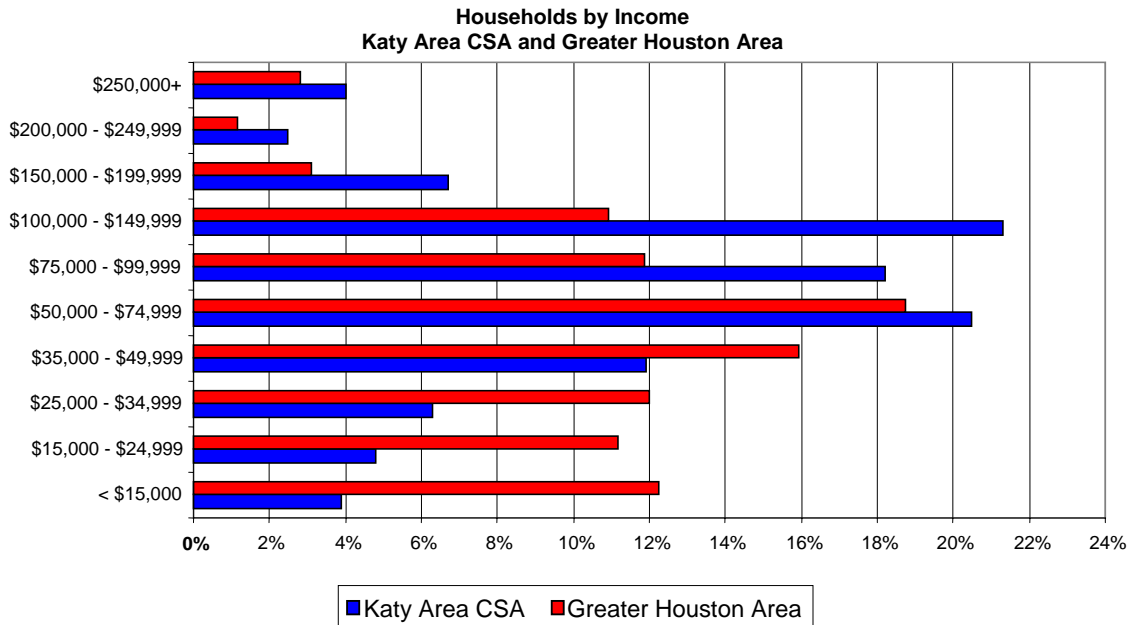

**Family Households
Katy Area CSA and Greater Houston Area**

- The percentage of families with children is higher in the Katy Area CSA than in the Greater Houston Area (66.7% vs. 60.1%)
- There is a larger percent of married couples with children in the Katy Area CSA than in Greater Houston Area (56.4% vs. 43.0%).
- In the Greater Houston Area there is a larger percent of married couples without children as compared to the Katy Area CSA (31.9% vs. 29.9%).
- Single female and male households without children, represent a larger percentage of the population in the Greater Houston Area than in the Katy Area CSA (8.0% vs. 3.4%).

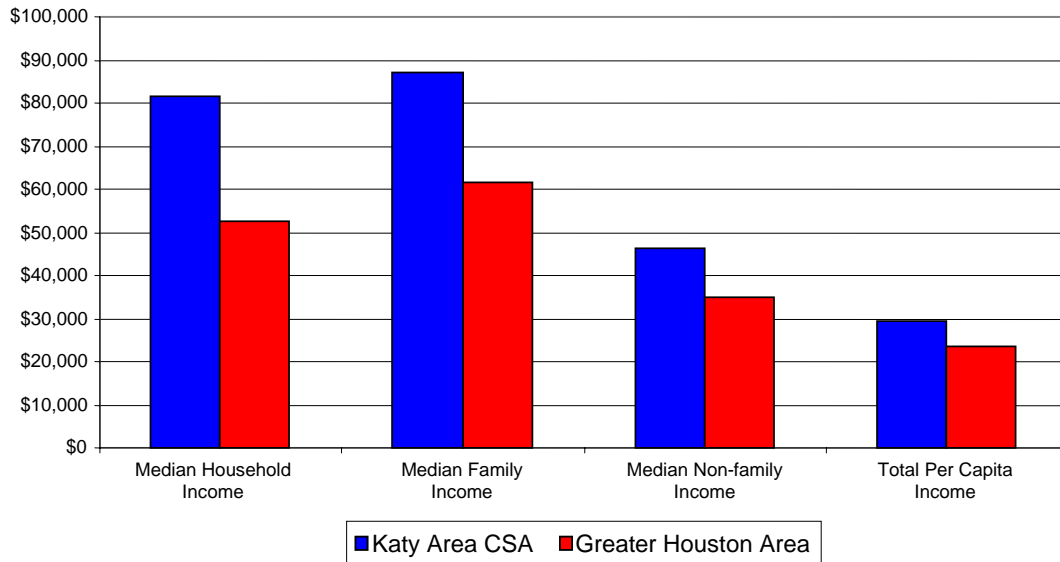

- Residents of the Katy Area are more likely to earn higher incomes than those of the Greater Houston Area.
- In the Greater Houston Area, the percent of households earning incomes below \$15,000 is three times larger than in the Katy Area CSA (12.2% vs. 3.9%).
- 20.5% of Katy Area households earn incomes between \$50,000 and \$75,000 compared to 18.8% in the Greater Houston Area.
- The percent of households earning incomes between \$100,000 and \$150,000 is almost two times higher in the Katy Area than in the Greater Houston Area (21.3% vs. 10.9%).
- In the Katy Area CSA, over one half (52.7%) of the residents earn incomes above \$75,000.

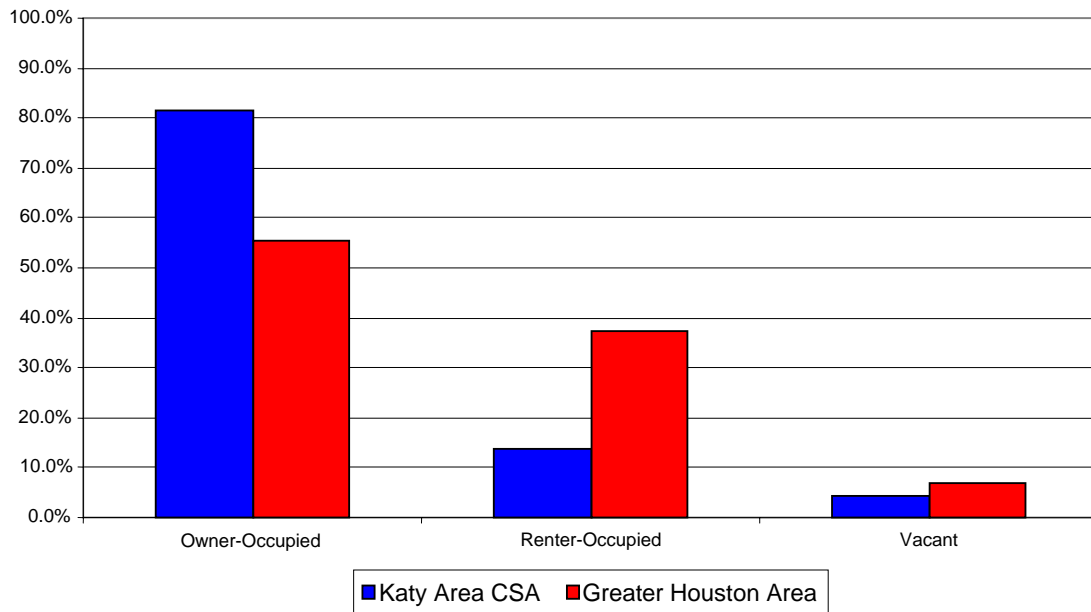

Income Dynamics
Katy Area CSA and Greater Houston Area

- The median household income in the Katy Area CSA is \$81,637 compared to \$52,462 in the Greater Houston Area.
- Median family income is significantly higher in the Katy Area CSA than in the Greater Houston Area (\$87,110 vs. \$61,391).
- In the Greater Houston Area, the median non-family income is \$34,908, whereas in the Katy Area CSA it is \$46,246.
- The total per capita income in the Katy Area CSA is higher than in the Greater Houston Area (\$29,423 vs. \$23,402).

**Total Housing Units
Katy Area CSA and Greater Houston Area**

- In the Katy Area CSA, 81.7% of the households are owner-occupied, compared to 55.6% in the Greater Houston Area.
- There is a larger percent of renter-occupied units in the Greater Houston Area than in the Katy Area CSA (37.4% vs. 13.9%).
- In the Katy Area CSA, owner-occupied households comprise a percent almost six times higher than renter-occupied housing units (81.7% vs. 13.9%).
- In both the Katy Area CSA and the Greater Houston Area, a household is more likely to be occupied by the owner than by a renter.

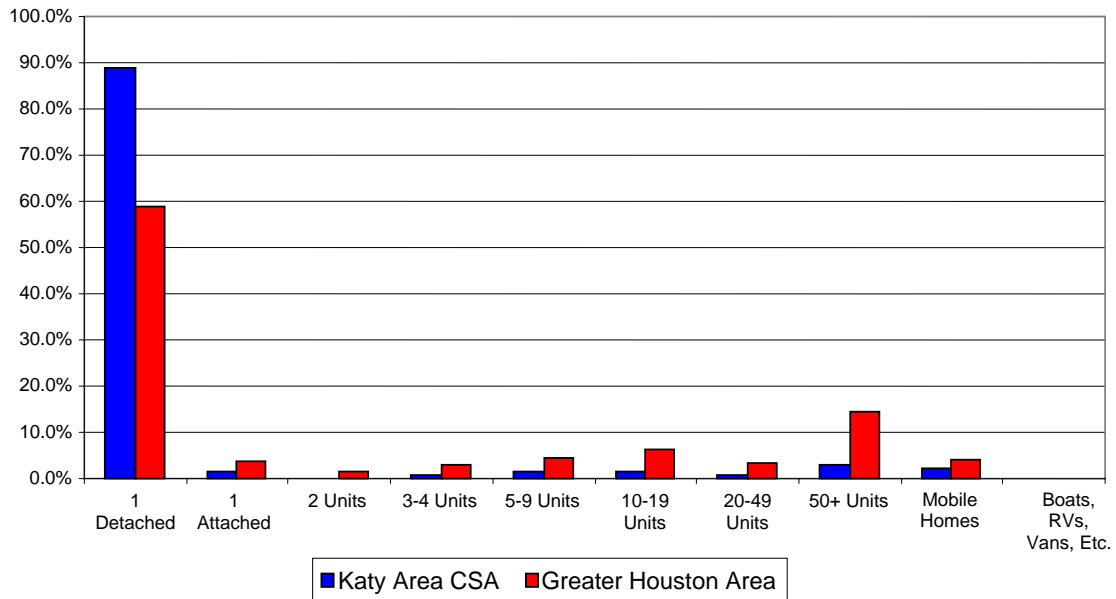

Units by Year Built
Katy Area CSA and Greater Houston Area

- In the Katy Area CSA, a larger percent of the housing units were built in the 1970s or later compared to the Greater Houston Area (96.8% vs. 69.4%).
- In the Katy Area CSA, 47.1% of the housing units were built during the 1990s, compared with 19.8% in the Greater Houston Area.
- More of the housing units in the Katy Area CSA were built in the 1980s, compared with the Greater Houston Area (31.4% vs. 23.1%).
- Less of the housing units in the Katy Area CSA, were built during the 1970s, compared with the Greater Houston Area (18.3% vs. 26.5%).
- Only 3.3% of the housing structures in the Katy Area CSA were built during the 1960s or earlier, compared to 30.6% in the Greater Houston Area.
- In general, housing units in the Katy Area CSA tend to be newer than those in the Greater Houston Area.

**Housing Units by Type
Katy Area CSA and Greater Houston Area**

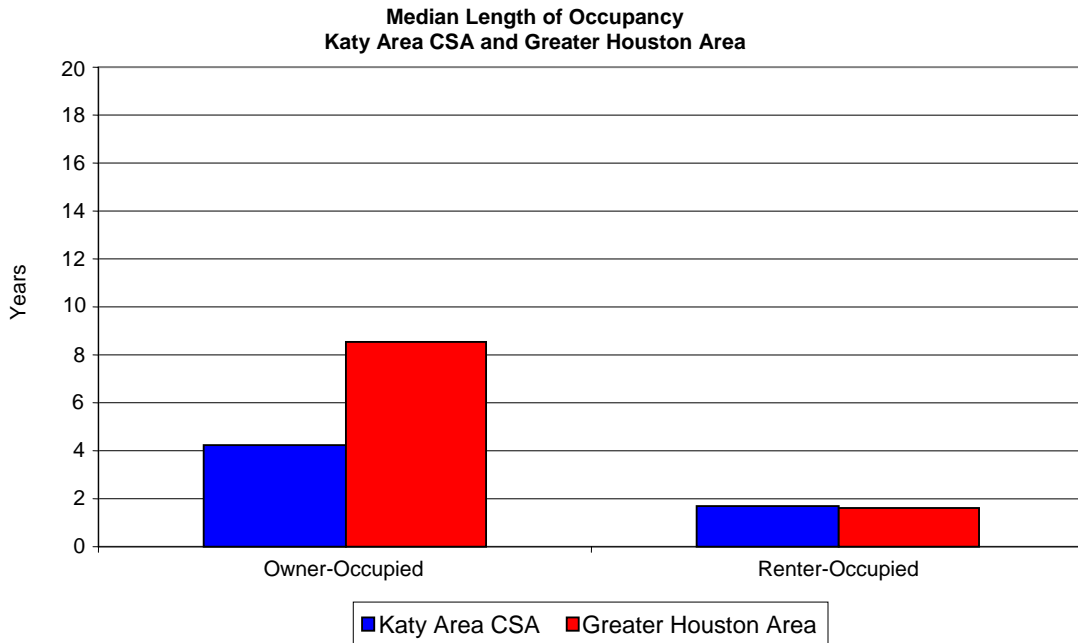

- Detached single housing units comprise a larger percentage in the Katy Area CSA compared to the Greater Houston Area (88.9% vs. 59.1%).
- The percent of 50+ units in the Greater Houston Area is almost five times higher than in the Katy Area CSA (14.3% vs. 2.9%).
- Detached single housing units and 50+ units represent 91.8% of the households in the Katy Area CSA.

**Median Home Value
Katy Area CSA and Greater Houston Area**

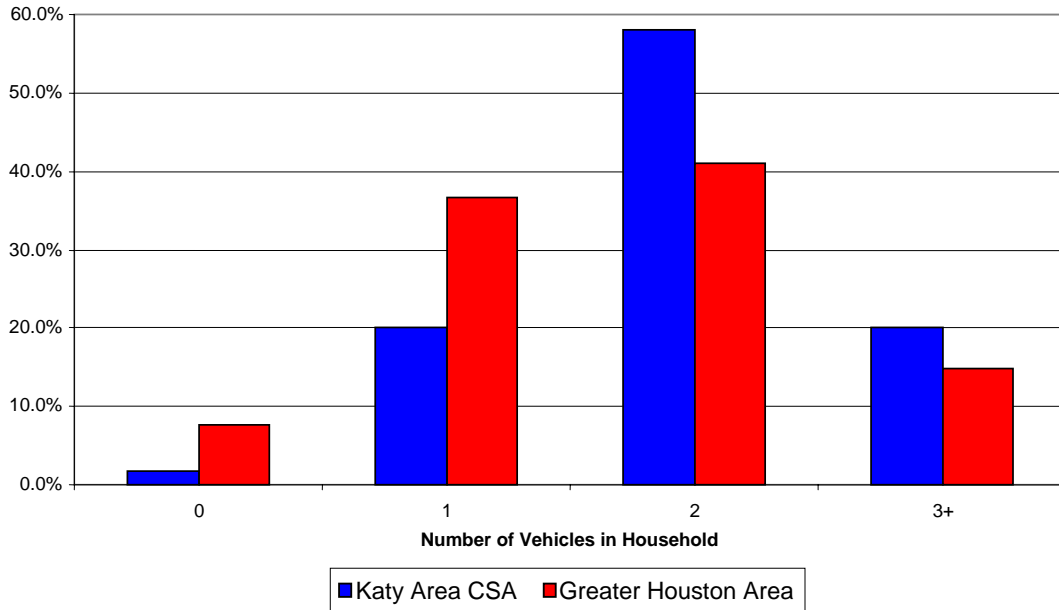

- The median length of occupancy in both the Greater Houston Area and the Katy Area CSA is longer for owner-occupied units than those occupied by a renter.
- The Greater Houston Area has a longer median length of occupancy in owner-occupied dwellings compared to the Katy Area (8.5 years vs. 4.2 years).
- In the Katy Area CSA, the median length of occupancy for owner-occupied dwellings is over twice that of renter-occupied dwellings (4.2 years vs. 1.7 years).
- The shorter lengths of occupancy in the Katy Area CSA are likely to be due to the more recently built housing units.

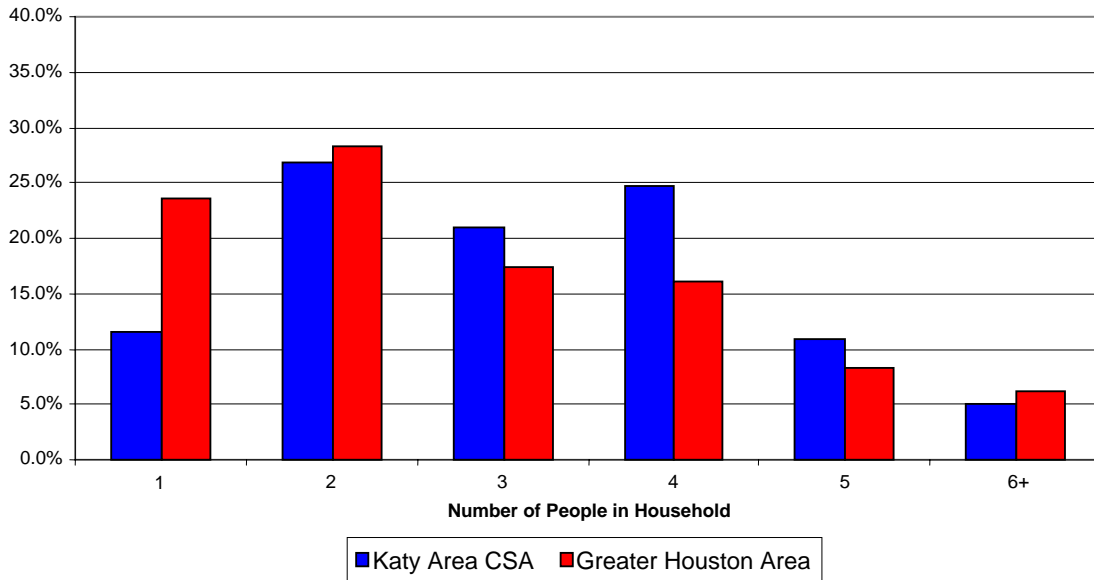

**Households by Count of Vehicles Available
Katy Area CSA and Greater Houston Area**

- There is a larger percent of households with no vehicles in the Greater Houston Area than in the Katy Area CSA (7.7% vs. 1.7%).
- Households with only one vehicle comprise a higher percent in the Greater Houston Area than in the Katy Area CSA (36.6% vs. 20.1%).
- There is a greater percent of households with two vehicles in the Katy Area CSA than in the Greater Houston Area (58.1% vs. 41%).
- Households with three or more vehicles comprise 20.1% in the Katy Area CSA, compared to 14.8% in the Greater Houston Area.

Households by Count of Persons
Katy Area CSA and Greater Houston Area

- In the Greater Houston Area, there is a higher percent of households consisting of one person than in the Katy Area CSA (23.5% vs. 11.6%).
- A slightly greater percentage of households in the Greater Houston Area are occupied by two persons than in the Katy Area (28.3% vs. 26.9%).
- Households consisting of three persons comprise a larger percent in the Katy Area CSA compared to the Greater Houston Area (20.9% vs. 17.5%).

Houston Profile Project Katy Area (CSA #20)

CSA Rankings

By
Key Lifestyle and Religion Questions

In this section we rank order the 45 CSAs by key religious and lifestyle questions. We use a form of hierarchical modeling in which individual responses to the lifestyle and religion questions in the HPP Poll are estimated with key socio-demographic measures from each CSA. These measures include age structure, race and ethnic composition, household structure, education, income, and housing values. The analysis produces an estimated average response to each question for each of the 45 CSAs. We subsequently rank the 45 CSAs based on these responses, and provide tables of these rankings in this section of the report. Please note that the measures reported here are those for which the hierarchal analysis proved useful. For some measures, the models did not perform well enough to allow us to report rankings with an acceptable level of confidence.

Percent Who Get A Great Deal Of Satisfaction From Their Neighborhood For Katy Area CSA

- The Katy Area CSA ranks among the top ten of all CSAs in the Greater Houston Area on neighborhood satisfaction.
- 53.82% of adults living in the Katy Area CSA receive a great deal of satisfaction from their neighborhood.
- There is slightly less neighborhood satisfaction in the Katy Area CSA than in the Greater Houston Area.
- For the Greater Houston Area, 55% report receiving a great deal of satisfaction from their neighborhood.
- There are an estimated 89,087 adults living in the Katy Area CSA.
- In the Katy Area CSA an estimated 47,900 adults receive a great deal of satisfaction from their neighborhood.

Percent Who Receive A Great Deal Of Satisfaction From Family Katy Area CSA

- The Katy Area CSA ranks number one of all CSAs in the Greater Houston Area on family satisfaction.
- 86.64% of adults living in the Katy Area CSA receive a great deal of satisfaction from their families.
- Family satisfaction in the Katy Area CSA is higher than family satisfaction in the Greater Houston Area.
- For the Greater Houston Area, 79% report receiving a great deal of satisfaction from their families.
- There are an estimated 89,087 adults living in the Katy Area CSA.
- In the Katy Area CSA, over 77,200 adults receive a great deal of satisfaction from their families.
- However, that means almost 11,900 adults in the Katy Area CSA do not receive a great deal of satisfaction from their families.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory family relationships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches may have an opportunity to make connections with those who do not receive a great deal of satisfaction with family life.

Percent Who Receive A Great Deal Of Satisfaction From Their Friends Katy Area CSA

- The Katy Area CSA ranks eighth of all CSAs in the Greater Houston Area on satisfaction from friends.
- 81.70% of adults living in the Katy Area CSA receive a great deal of satisfaction from their friends.
- This number is significantly higher than that of the Greater Houston Area.
- For the Greater Houston Area, 69% report receiving a great deal of satisfaction from their friends.
- Adults in the Katy Area CSA are much more satisfied with their families (86.64%) and friendships (81.70%) than with their neighborhood (53.82%).
- There are an estimated 89,087 adults living in the Katy Area CSA.
- In the Katy Area CSA an estimated 72,800 adults receive a great deal of satisfaction from their friends.
- This means, however, that over 16,300 adults in the Katy Area CSA are less satisfied with their friendships.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory friendships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches have an opportunity to make connections with those who do not receive a great deal of satisfaction with friendships.

Percent Who Report Success Balancing Work And Family Katy Area CSA

- The Katy Area CSA ranks in the upper half of all CSAs in the Greater Houston Area on success at balancing work and family.
- 30.05% of adults living in the Katy Area CSA report being successful at balancing the dual demands of work and family.
- Compared with the Katy Area area, the Greater Houston Area's percentage is higher.
- For the Greater Houston Area, 34% reported being successful at balancing the dual demands of work and family.
- There are an estimated 89,087 adults living in the Katy Area CSA.
- In the Katy Area CSA an estimated 26,800 adults report being successful at balancing work and family lives.
- This means, however, that over 62,300 adults, or a majority of adults in the Katy Area CSA, are not as successful at balancing work and family lives.
- This is important for church missions because research shows that the strains of balancing work and family life are among the leading causes of family dissolution (Kendall 2004).
- Working in the Katy Area neighborhoods to help families be more successful at managing the dual demands of family and work life is a potential community ministry program.

Percent Who Are Happy With Their Lives Katy Area CSA

- The Katy Area CSA ranks fourth among all CSAs in the Greater Houston Area on overall happiness.
- 51.39% of adults living in the Katy Area CSA report being happy.
- This number is slightly higher than in the Greater Houston Area.
- For the Greater Houston Area, 48% report being happy.
- There are an estimated 89,087 adults living in the Katy Area CSA.
- In the Katy Area CSA an estimated 45,800 adults report being happy.
- This means, however, that almost 43,300 adults are not very happy.
- As with satisfaction with family and friends, those who are not happy may be more amenable to new relationships. This is important for church outreach missions because research by Stark (2000) shows that people who are not happy are open to ministry.

Percent Who Have No Doubts About The Existence Of God Katy Area CSA

- The Katy Area CSA ranks in the bottom half of all CSAs in the Greater Houston Area on percent who have no doubts about the existence of God.
- 72.54% of adults in the Katy Area CSA report no doubts about the existence of God.
- This figure is lower than the 78% for the Greater Houston Area.
- There are an estimated 89,087 adults living in the Katy Area CSA.
- In the Katy Area CSA, over 64,600 adults report no doubts about the existence of God.
- However, over 24,500 adults in the Katy Area CSA do report that they have some doubts about the existence of God.

Houston Profile Project Katy Area (CSA #20)

Key Leader Interviews

In this section, the results from individual, face-to-face interviews with key leaders in the CSA community are presented. The interviews were conducted by HPP volunteers using a standardized questionnaire developed by CCRD. Various key positions within the community were identified and the individual leaders that filled that particular position were contacted. If the key leader agreed to an interview, the results are included, maintaining confidentiality. The various responses are listed by question and categorized by topic. The key leader positions included elected community leaders, managers of large employers in the area, principals of local schools, civic organization leaders, labor union leaders, local Chamber of Commerce representatives, editors of neighborhood newspapers, directors of minority interest group, law enforcement officers, and leaders of major places of worship.

Center for Community Research and Development
Community Poll 98

Key Leader Interviews CSA #20 – Katy Area

Answers recorded as given in interviews

What are the best things about the Katy Area?

Sense of Community

- Community rallies around people who need help – member needed a liver transplant and got support.
- Community like a family.
- Bumper stickers – “Katy – a town with Heart”.
- Community oriented.
- Small town with big city amenities.
- The different parts of Katy are close knit individual communities.

Family-Oriented Atmosphere

- Family community is strong
- Family oriented
- Family focused – young families and safe for kids
- Family oriented
- Family Values

School System

- Schools – people support schools
- Great Schools
- Strong Education
- Good Schools
- Good school district
- Strong schools

Friendly People

- People are friendly

Good Business Climate

- Mayor is fantastic – well run city government
- Great Business climate
- Good local economy
- Lots of retail sources

Church Involvement

- Many churches and denominations
- High percent of church attendance
- Community involved in churches
- Strong faith base in community leaders

Safety

- Lack of crime
- Safe area

What are the major problems facing the area?

Drugs

- Drugs among school age kids – affecting younger kids
- Teenage problems with sex/drugs/alcohol
- Peer pressure

Illegal Immigration

- Number of illegal Hispanics is increasing – some members are vocal about it.
- Intolerance of illegal/legal immigrants

Traffic

- Transportation issues (traffic is bad)
- Traffic is terrible
- Interstate 10 traffic

Diversity

- Katy is a diverse area; inhabitants do not understand the diversity.
- Three different counties make up Katy, it is difficult to have a unifying voice for the city.
- Some of Katy is wealthy and well educated. The city of Katy is less wealthy but has more history and life long residents, and other areas of Katy are very poor and not well educated. Plus some of Katy is in Harris county, but on the outskirts.
- Diversity of individuals – both economic and cultural.
- Community identity from newcomers.
- Loss of small town identity.

Rapid Growth

- Balance between businesses and residents. Low ratio of businesses means people bear burden of school and other funding. Makes a challenging environment.
- Rapid growth
- Growth and infrastructure
- Material issues
- Land & housing is expensive
- Rapid growth
- Change
- Finance for schools
- Growth and development – speed of growth of the area. 2500 new kids in KISD this year.
- Senior needs
- Taxes
- Need more restoration help for needy
- There is little or no low income housing

Do the local places of worship play any roles in the three best things?

Education and Family

- Education and Family – Churches play an excellent role in creating the family atmosphere (high number of churches).
- Katy Christian Ministries help to unify the area through the churches.
- Active youth and family programs.
- Churches do help add to the good schools by offering pre-schools in the area.
- Churches help develop values that schools hope to develop.
- Churches also work on educating some non-English speaking population.

Fostering Sense of Community

- Katy Church prays for community
- Church supports Katy ministries.
- Churches in the individual communities do help foster the community closeness.
- The sheer number of churches in the area helps improve the small town feeling. There are a high percentage of church attendees in the area.
- Katy is a city of churches – known for churches.
- Number of and diversity of churches make area attractive to new residents and businesses.
- Local leaders are involved and active in church.
- Diversity of religions.

Reaching the Needy

- Churches play a big role.
- Katy Christian Ministries is a coalition of 30+ ministries – very active. Domestic abuse, shelters, \$ for child care, help victims of sexual assault, parent group, workshops for community and bilingual advocates.
- Can't help much in the school and business environment.
- Supportive of newcomers.
- Faith based initiatives.
- Support for local charities.
- Support for crisis/help lines.
- Benevolence funds are available.
- Reach out on Friday and Saturday open to public.

Are there other contributions that places of worship are making to the area?

- Churches are involved in the hospital, health fairs. Filled on Sundays.
- One church in Katy has a couple of programs teaching English to non-English speakers and to assist in healthcare for the needy.
- Many programs geared to meet community needs.
- Community involvement.
- Churches transform people's lives.
- Churches active in community service.
- Church provides education for children.
- Churches do improve the area by offering youth programs, and funding a pregnancy center. They have their own outreach programs, but these are more limited.
- Day of Prayer.
- Raising kids with values.
- People who go to school, are also people who go to church.

Can you think of any ways local places of worship help with addressing these problems?

- Drug problems – No – maybe if kids go to church, they could get some help there.
- Hispanics – yes.
- More volunteers in schools.
- Volunteers in after-school care.
- KCM helps unify the area, but can only do so much. Churches might do more by working more closely together.
- Churches help attract more businesses by making the community an attractive place to live and work.
- Can't do much about traffic.
- Due to litigation/liability issues, many organizations are reluctant to help with transportation needs.

- Churches are already addressing these issues.
- Church plans over last 5 years are good.
- Churches do help with some of the diversity problems by funding KCM, the pregnancy center, etc.
- They can't do much for traffic.
- They are building something called the interfaith ministry which is a combination of churches and the KCM which are trying to start a program to care for the homeless where the churches will house them at night and KCM will take care of them and educate them during the day.
- Continue being supportive of newcomers.
- Promote involvement in the community.
- Not much churches can do to help finance, except help the community values be focused on education.
- Churches can help more specifically with counseling programs for children who need it. Family dysfunction leads to dysfunctional incidents in schools.
- Growth and Development – churches can help by attempting to integrate new kids into their environment faster so they are more comfortable at school. Neighborhood programs, etc.

Can you think of other organizations and programs that are helping address these problems?

- American Heart Association has a strong Katy Chapter.
- Cancer Society good.
- YMCA strong & involved.
- Chamber of Commerce is doing a lot to attract new businesses and just formed a team to advance that.
- The Rotary clubs are strong.
- The Krause Center is funded by the Lutheran church. It provides help to teens who have issues often caused by abuse or neglect.
- New Katy Performing Arts Society to bring more enjoyment to the area.
- City of Katy- senior programs.
- Harris County Commissioner Steve Radack's office- sports complexes.
- Katy Christian Ministries. Crisis help lines.
- The Chamber of Commerce works on infrastructure issues.
- Police Department works on social issues.
- Pregnancy help center.
- Schools are providing above-average education.
- All community organizations are very caring
- There are not that many other organizations local to Katy. The Pregnancy Center is certainly one of them.
- Economic Development Council. Helping with job assistance and employment.
- Raising kids with values.
- People who go to school, are also people who go to church.

Can you think of any ways that local places of worship contribute, even unwittingly, to making these problems worse?

- Churches ignore those who complain about the illegal Hispanics.
- Churches don't play well or work well together – can be cliquish.
- Lack of interdenominational cooperation.
- Often seems that denominational issues get in the way of the greater good. Add to the lack of unity caused by the three counties.
- Churches are not helping with transportation needs as they could.
- When churches allow denominational theology get in the way of helping someone.
- Churches need to stop being silos and be more involved with each other.
- Being passive toward the needs of the community.
- Not targeting the largest age group in the community.
- Not laying a strong biblical foundation.
- The churches don't make things worse, but without educating their membership about Katy's diversity issues, the need for housing, what KCM is and can do, less is done in the community. (For instance, the low income housing problem).
- Also, KCM is competing with building programs for funds. Again, building programs are absolutely necessary as Katy grows exponentially, but this does mean competition with the needs of the community.

Can you think of any other ways in which local places of worship play a role in creating problems for the area?

- Need to do a better job of coordination between churches
- Churches take the lead. Develop a youth center or park where the environment is safe and the influence is good.

Can you think of any suggestions or potential programs, not already in place, that would help to solve the problems within the Katy Area?

- Would like to see schools more aggressive in drug education.
- Have DARE 5th grade program, but 6th grade need to follow all the way through. Drug education needs to be reinforced. Do drug education all throughout middle and senior high schools.
- Provide transportation for the elderly – take to doctor etc.
- Church dramas and plays.
- More multi-church activities together. Specifically organize multi-church missions for youth. The kids go to schools together, would be good for them to interact in a worship environment together.
- Clearly a need to do something to bring the churches together for the betterment of the community.

- It will take a local pastoral leader who is both a visionary and a uniter.
- Churches should work together to provide and support a shelter and other outreach ministries.
- Teaching more biblical principles.
- Finding ways to reach out to the unchurched.
- Providing health and computer courses.
- Churches could reach out to new churches and new residents to help them acclimate.
- An education system for all the churches which gives much more specific education regarding the challenges facing ALL of Katy and what church members can do about it.
- After school programs. Mother's Day Out programs.
- Counseling for families.

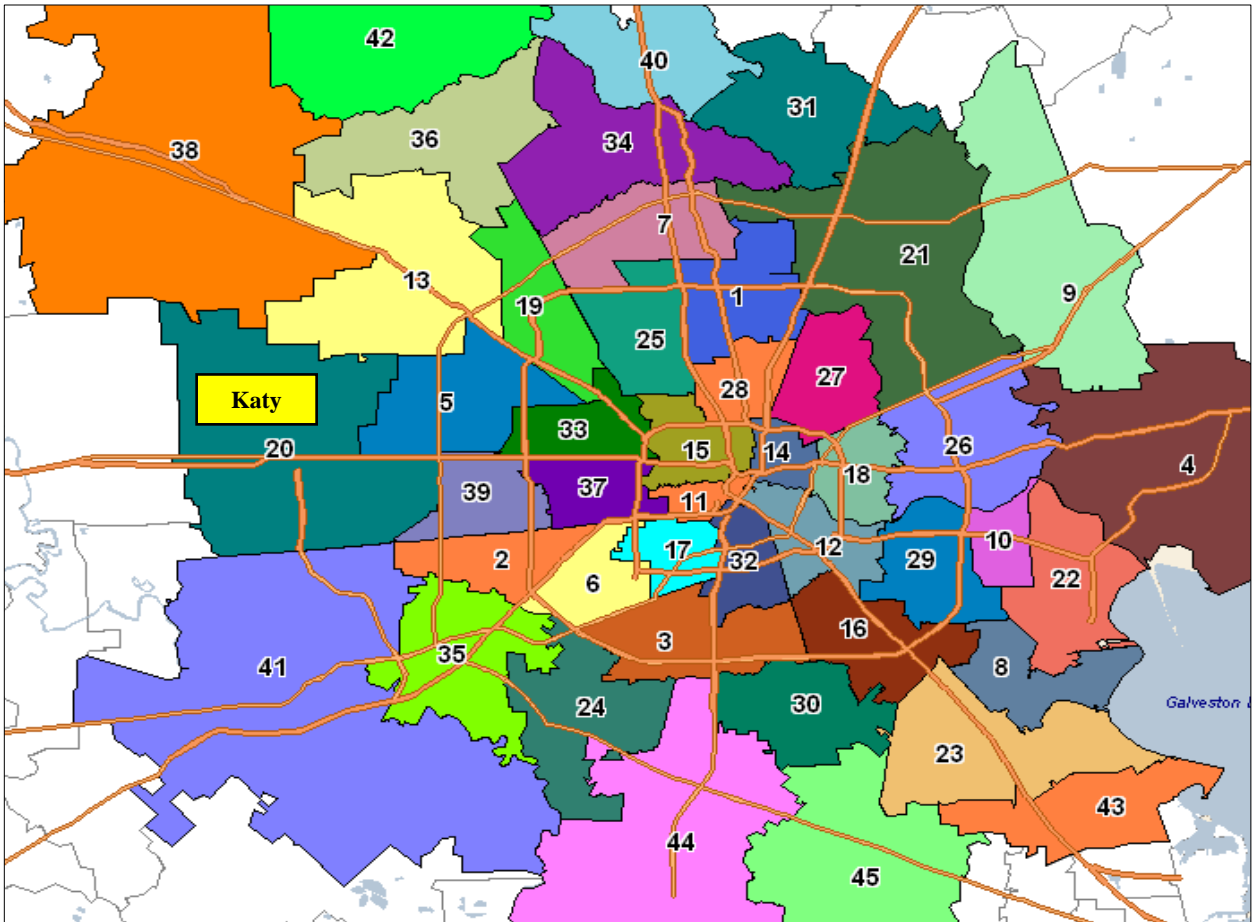

Finally, is there anything else about the area that you think is especially important, that we really need to know about, that we ought to work on, or that we should include in this report?

- Great place.
- Programs dealing with growth.
- Encourage everyone to be mindful of demographic statistics and offer different levels of affordable living and affordable housing for the elderly.
- Again, key is education of the populous about issues and the need for low income housing.
