BACKGROUND OF THE BAYLOR CENTER FOR COMMUNITY RESEARCH AND DEVELOPMENT

Mission

The Center for Community Research and Development (CCRD) was established at Baylor University in 1979 as a multidisciplinary entity with a mission of **engaging Baylor faculty and students in applied social research to improve the local quality of life**. Over time, the CCRD has broadened its focus, sometimes engaging in statewide or national research, and the CCRD has become closely linked with Baylor's Ph.D. program in Applied Sociology, where Ph.D. students serve as center research analysts. Still, our research remains multidisciplinary and many of the CCRD's projects retain a local quality of life focus.

Facilities

The CCRD originally worked out of faculty offices in Sociology and Political Science and moved into its own facilities in 1990, when the operations center was located in the basement of the Sid Richardson Science Building. The CCRD moved to Suite 300 of the Robinson Tower in 1994. These modern facilities allow easier access to the community and include:

- offices for Center directors, six doctoral students, research analysts, and a project coordinator,
- focus group facilities with a separate observation room and recording equipment,
- a conference room for meetings and graduate seminars,
- report production facilities for CCRD documents,
- a local area network with Windows operating systems, and
- a Computer Assisted Telephone Interviewing (CATI) system.

Services

The Center for Community Research and Development is equipped to undertake a wide variety of projects for organizations, businesses, industries, and governmental agencies. Services include:

- Mail Surveys
- Telephone Surveys
- Questionnaire design
- Needs assessments
- Program planning and evaluation
- Impact assessments
- Population trend studies and projections
- Data collection and analysis
- Sampling designs
- Focus groups
- Seminars and workshops on community issues
- Mock Juries and Jury Consulting

Society for Applied Sociology

From 1998 through 2001, the CCRD served as the administrative office for the Society for Applied Sociology, an international organization for professionals involved in applying sociological knowledge in a wide variety of settings. The CCRD retains an active membership in SAS and Dr. Tillman Rodabough is the President. The mission statement for SAS is to:

- Provide a forum for sociologists and others interested in applying sociological knowledge.
- Enhance understanding of the interrelationship between sociological knowledge and sociological practice.
- Increase the usefulness and effectiveness of applied sociological research and training.

Selected Previous Clients

The CCRD has served a varied clientele on a large number of issues. Representative projects include:

- **Telephone surveys** for the City of Waco, Southwestern Bell, the *Waco Tribune-Herald*, Houston Profile Project
- **Site location research** for the Perryman Group, American Airlines
- **Needs assessments** for the Baptist General Convention of Texas, the United Way, HOTCOG
- **Population projections** for the Heart of Texas Council of Governments, Heritage House
- **Focus groups** for Creative Education Institute, Baylor University, EEOC, City of Waco, the United Way
- **Mail-out surveys** for Hillcrest Baptist Medical Center, the City of Woodway, Baptist General Convention of Texas
- **Intercept surveys** for Richland Mall, the Texas Ranger Museum, the Dr. Pepper Museum
- **Mock juries** and **change of venue** research for Amarillo, Dallas and Waco law firms
- **Program assessments** for the McLennan County Youth Collaboration, Waco Police Department
- **Door-to-door surveys** for the Waco Housing Authority, Mission Waco, Drug Prevention Resources
- **Voter exit interviews** for the Dallas Independent School District
- **Institutional evaluation** for San Marcos Baptist Academy, the BGCT Education Commission. Baptists in Scouting, Baylor University, Waco Independent School District
- **Program development** for the Cooper Foundation, the Junior League, MHMR

Fees

The CCRD is a non-profit service center for the community and University. Fees charged for research projects represent actual costs for services and enable the CCRD to be self-supporting.

Staff

- **Dr. Larry Lyon** is Director of the CCRD, Dean of the Graduate School, and Professor of Sociology in the Department of Sociology and Anthropology (Larry_Lyon@Baylor.edu).
- **Dr. Tillman Rodabough** is Research Director for the CCRD and Professor of Social Psychology in the Department of Sociology (Tillman_Rodabough@Baylor.edu).
- **Mrs. Debbie Marable** is the Projects Coordinator for the CCRD, Graduate Program Assistant for Sociology and a graduate of Baylor University (Debbie_Marable@Baylor.edu).
- **Dr. Carson Mencken** is Associate Professor of Sociology and Graduate Program Director for Sociology, with research expertise in statistical analysis and spatial modeling and serves as a research professor for CCRD (Carson_Mencken@Baylor.edu).
- **Dr. Robyn Bateman Driskell** is Associate Professor of Sociology with expertise in demography and serves as a research professor for the CCRD (Robyn_Bateman@Baylor.edu).
- **Dr. Charles Tolbert, II** is Professor and Chair, Department of Sociology and Anthropology and GIS and census data consultant for CCRD (Charlie_Tolbert@Baylor.edu).
- **Lacey C. Wiggins, M.A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Lacey_Chapman@Baylor.edu).
- **Rusty Parker, M. A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Rusty_Parker@Baylor.edu).
- **Jodien Matos** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jodien_Matos@Baylor.edu).
- **Kathy Krey** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Kathy_Krey@Baylor.edu).
- **Jeniece Williams** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jeniece_Williams@Baylor.edu).
- **Elizabeth Terrazas-Carrillo** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Elizabeth_Terrazas@Baylor.edu).
- **Liz Embry** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Elizabeth_Ninneman@Baylor.edu).

Each staff person can also be contacted at the CCRD office (254) 710-3811 or e-mailed at CCRD@Baylor.edu. Our website address is <http://www.Baylor.edu/CCRD>

Background of the Poll

Center for Community Research and Development
Poll 98
(September 2004)

In the fall of 2003, the Center for Community Research and Development (CCRD) conducted a scientific poll to assess religious and lifestyle practices and beliefs in 45 communities in the Greater Houston Area. Questions for the poll were developed by CCRD researchers using national polls on lifestyles and religion as a guideline.

From October 1 through November 15, a total of 2,419 Greater Houston Area residents were interviewed using a Computer Assisted Telephone Interviewing (CATI) system. The CATI technology allows control over the interviewing process and automates data entry. The sample was selected from a computer-generated set of random phone numbers. Random generation includes residents with unlisted numbers. Other steps taken to ensure the quality of the poll include: (1) testing and editing experimental versions of the questionnaire to increase the clarity and reliability of each question; (2) intensive training for each interviewer; (3) continual monitoring of interviews by social science Ph.D.s; (4) daily review of work and interviewing procedures and results by the CCRD staff; (5) calling during times established in previous studies to provide the most representative sample; (6) making up to five call-backs for each phone number to avoid distorting the sample toward the more easily accessible residents; (7) using special “screens” to increase the number of male and minority respondents; (8) purchasing a special bank of phone lines with “Community Research” as the caller identification label rather than the standard label, “Baylor University;” and (9) employing Spanish speaking interviewers for households where Spanish is the primary language.

The demographic characteristics of the sample resemble those of demographics available through external sources. While the sample is largely representative of the population, minority ethnic groups were slightly under-represented among respondents in the poll. To compensate, this analysis uses weighted data to ensure a more representative sample. The final sample is comparable to official data available on the 45 communities in the Greater Houston Area’s 3,097,362 adults. For example, the sample used in the analysis is approximately 58% “Anglo,” 20% Hispanic, and 17% African-American.^[1] The percentages for African Americans and Anglos closely reflect recent Census estimate population numbers for the 45 communities in the Greater Houston Area.^[2] Other population numbers/sample comparisons suggest similarly low levels of bias.

For the overall response distributions of the questionnaire data, the responses will typically vary by less than 3 percentage points in either direction at the 95% confidence level. For cross-tabulation tables that analyze smaller portions of the sample by dividing it into various categories such as race or education, the percentage of variation will be considerably higher.

^[1] Throughout this report, the terms “White” and “Anglo” refer to non-Hispanic whites. “African-American” and “Black” are used interchangeably.

^[2] 2002 Census estimates show a total adult population of 3,097,362 for the 45 communities in the Greater Houston Area. Of the approximately 3,097,362 adults: about 45.0% are Anglo, 17.5% African American, 30.2% Hispanic, 0.4% American Indian, 5.4% Asian/Pacific Islander and 1.4% are Multi-Racial.

Executive Summary

Center for Community Research and Development
North Shore/Channelview Area (CSA #26)

- The racial/ethnic composition of the North Shore/Channelview CSA is diverse, with a significantly higher percentage of Hispanics, compared to the Greater Houston Area.
- In the North Shore/Channelview CSA, 61.5% of the adults are either high school graduates or did not finish high school.
- In the North Shore/Channelview CSA, only 20.5% of the residents earn incomes above \$75,000.
- In the North Shore/Channelview CSA, over one half (57.2%) of the households consist of three or more persons, compared to 48.2% in the Greater Houston Area.
- The North Shore/Channelview CSA ranks in the bottom third of all CSAs in the Greater Houston Area on neighborhood satisfaction.
- The North Shore/Channelview CSA ranks near the middle of all CSAs in the Greater Houston Area on family satisfaction.
- The North Shore/Channelview CSA ranks near the bottom of all CSAs in the Greater Houston Area on satisfaction from friends.
- The North Shore/Channelview CSA ranks in the upper third of all CSAs in the Greater Houston Area on success at balancing work and family.
- The North Shore/Channelview CSA ranks near the bottom of all CSAs in the Greater Houston Area on overall happiness.
- The North Shore/Channelview CSA ranks fourteenth among all CSAs in the Greater Houston Area on weekly church attendance.
- In the North Shore/Channelview CSA, almost 10,100 adults never attend church.
- An estimated 16,500 more adults in the North Shore/Channelview CSA report being born again than report attending church each week.
- The North Shore/Channelview CSA ranks eleventh among all CSAs in the Greater Houston Area, on percent who read the Bible or other inspired literature when they have a problem.
- The North Shore/Channelview CSA ranks seventh among all CSAs in the Greater Houston Area, on percent who are likely to see a religious counselor when they have problems.
- More people in the North Shore/Channelview CSA read the Bible or other inspired literature when they have a problem, than would seek help in a place of worship.
- The North Shore/Channelview CSA ranks near the middle of all CSAs in the Greater Houston Area on percent who pray when they have problems.
- The North Shore/Channelview CSA ranks sixteenth among all CSAs in the Greater Houston Area on percent who have no doubts about the existence of God.

Demographics

Center for Community Research and Development
Community Poll 98

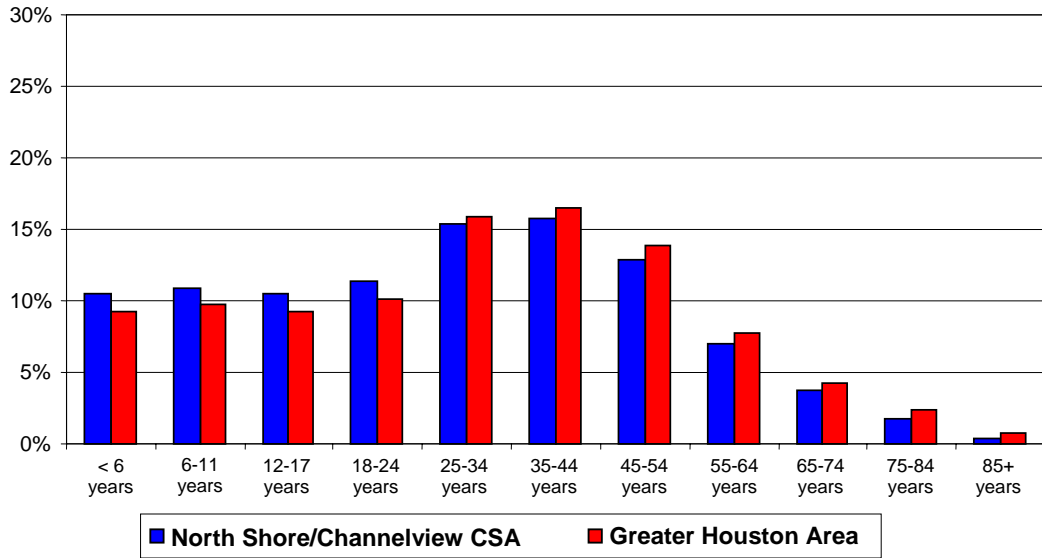

**Population by Race/Ethnicity
North Shore/Channelview CSA and Greater Houston Area**

- There are differences in racial composition between the North Shore/Channelview CSA and the Greater Houston Area.
- Anglos comprise a smaller proportion of the population in the North Shore/Channelview CSA, compared to the Greater Houston Area (36.0% vs. 45.0%).
- The percent of Blacks is slightly higher in the North Shore/Channelview CSA than in the Greater Houston Area (18.5% vs. 17.5%).
- In the North Shore/Channelview CSA, Hispanics represent a significantly higher percentage of the population, compared to the Greater Houston Area (41.2% vs. 30.2%).
- There is a slightly higher percentage of Asian/Pacific Islanders in the Greater Houston Area than in the North Shore/Channelview CSA (5.4% vs. 2.3%).
- Few differences exist between the North Shore/Channelview CSA and the Greater Houston Area in the remaining race/ethnicity categories.

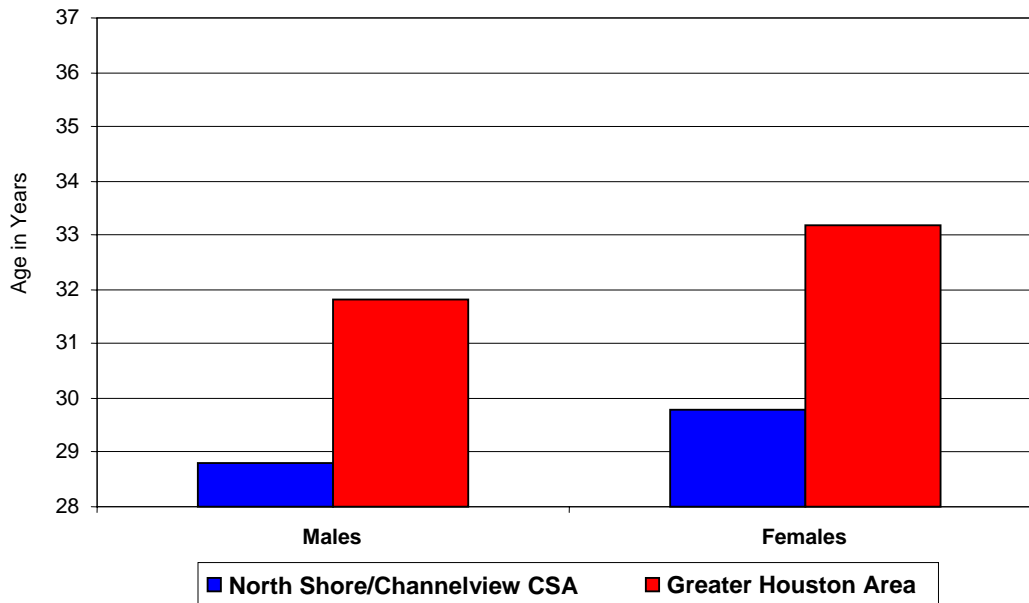

**Population by Age
North Shore/Channelview CSA and Greater Houston Area**

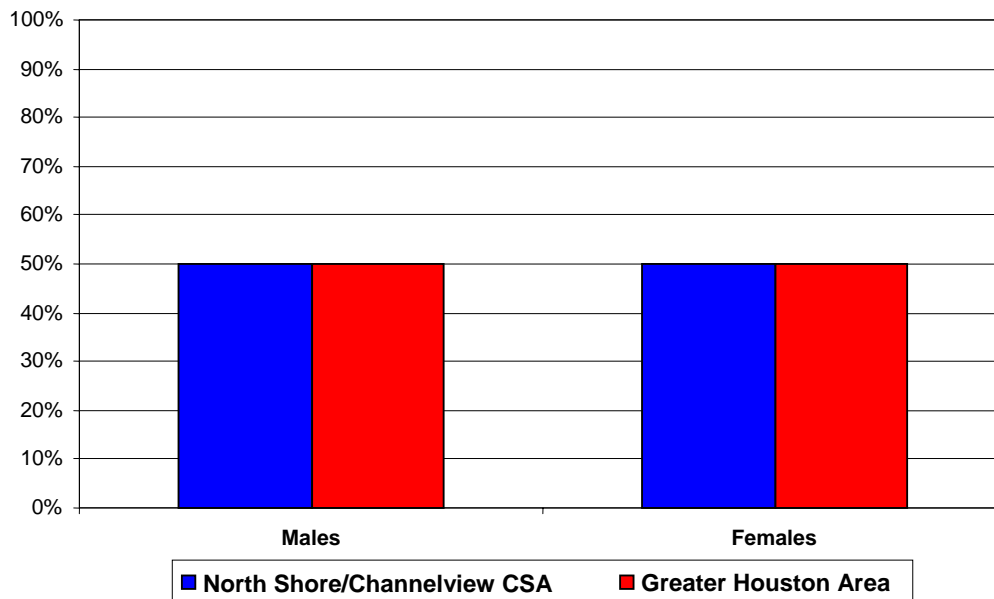

- There are slight differences between the age composition of the Greater Houston Area and the North Shore/Channelview CSA.
- People between the ages of 6 to 24 comprise a larger percent of the North Shore/Channelview CSA population, than the Greater Houston Area (32.8% vs. 29.1%).
- There is little difference between the percent of people between the ages of 25 to 34 years in the Greater Houston Area and in the North Shore/Channelview CSA (15.4% vs. 15.9%).
- The percentage of the population aged 35 and older is greater in the Greater Houston Area than in the North Shore/Channelview CSA (45.7% vs. 41.4%).

**Median Age Males and Females
North Shore/Channelview CSA and Greater Houston Area**

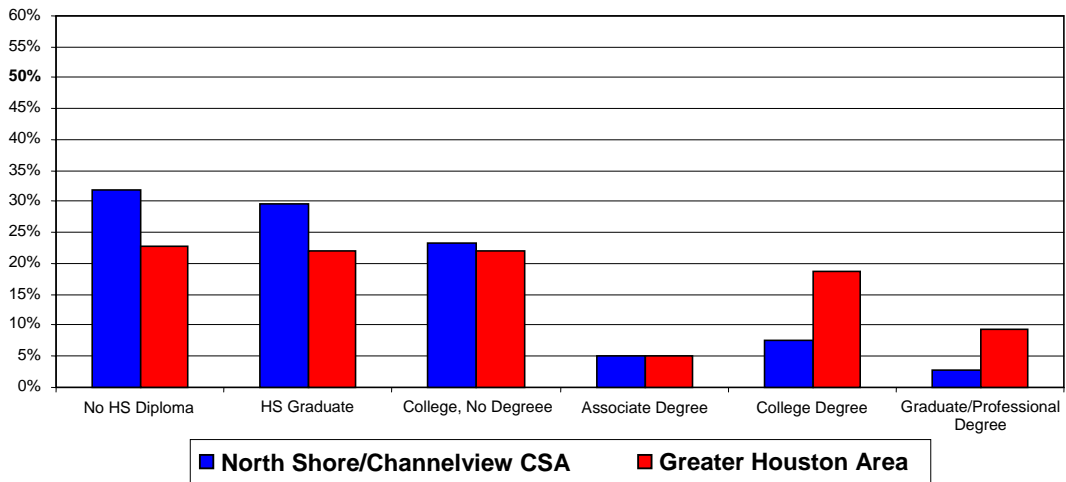

**Population by Sex
North Shore/Channelview CSA and Greater Houston Area**

- There are differences in age composition between the Greater Houston Area and the North Shore/Channelview CSA.
- In both the Greater Houston Area and in the North Shore/Channelview CSA, males comprise 49.9% of the population.
- Likewise, in both the Greater Houston Area and in the North Shore/Channelview CSA, females comprise 50.1% of the population.
- The median age for males is slightly higher in the Greater Houston Area, compared to the North Shore/Channelview CSA (31.8 years vs. 28.8 years).
- The median age for females is also slightly higher in the Greater Houston Area, than in the North Shore/Channelview CSA (33.2 years vs. 29.8 years).

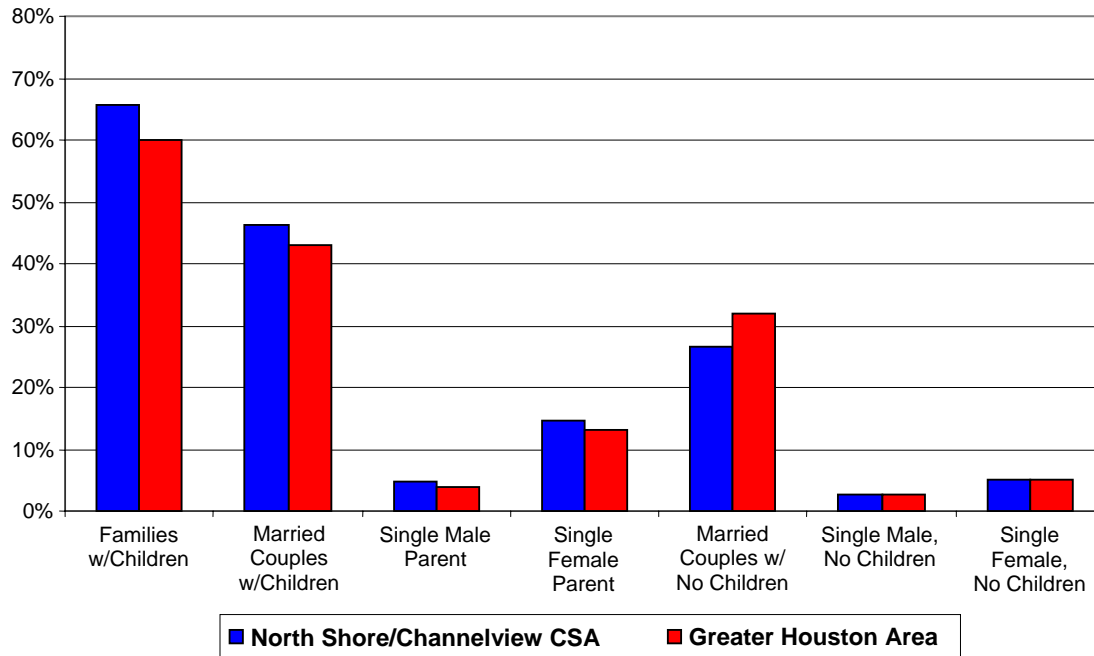

**Education Levels for Adults 25+
North Shore/Channelview CSA and Greater Houston Area**

- There are differences between the Greater Houston Area and the North Shore/Channelview CSA in the educational attainment of the population over 25 years of age.
- People without a high school diploma comprise a higher percent in the North Shore/Channelview CSA compared to the Greater Houston Area (31.8% vs. 22.8%).
- High school graduates comprise 29.7% of the population in the North Shore/Channelview CSA, whereas in the Greater Houston Area they comprise 22.0%.
- In the North Shore/Channelview CSA, 61.5% of the adults did not finish high school, or have only a high school diploma.
- The Greater Houston Area has a percentage of college graduates over two times higher than the North Shore/Channelview CSA (18.8% vs. 7.6%).
- The percentage of adults with graduate/professional degrees is over three times higher in the Greater Houston Area, compared to the North Shore/Channelview CSA (9.3% vs. 2.7%).

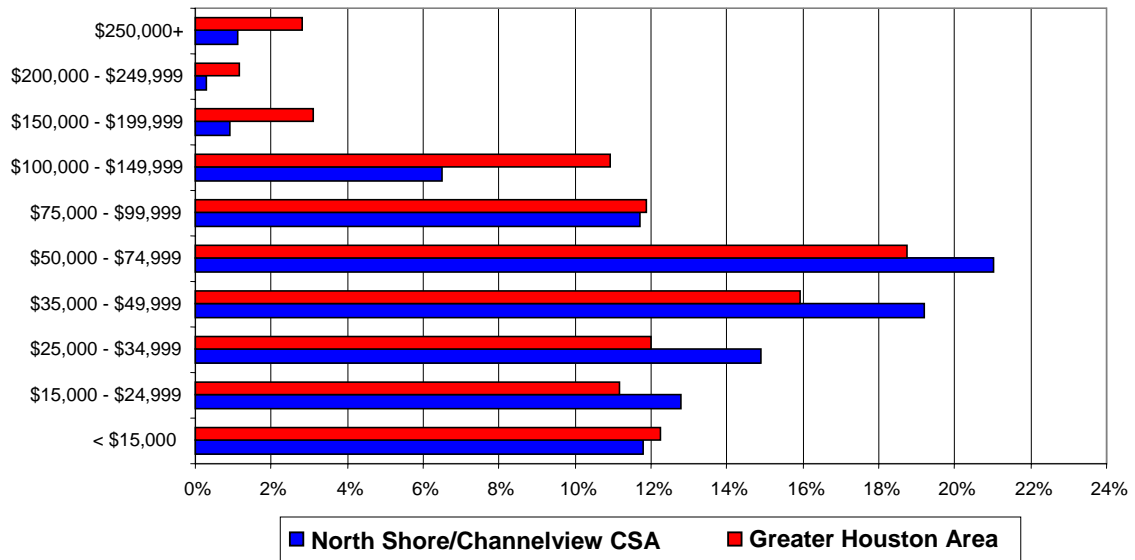

**Family Households
North Shore/Channelview CSA and Greater Houston Area**

- The percentage of families with children is slightly higher in the North Shore/Channelview CSA, than in the Greater Houston Area (65.7% vs. 60.1%)
- There is a slightly smaller percent of married couples with children in the Greater Houston Area, than in the North Shore/Channelview CSA (43.0% vs. 46.4%).
- In the North Shore/Channelview CSA there is a smaller percentage of married couples without children, compared to the Greater Houston Area (26.6% vs. 31.9%).
- Single female households represent a larger percentage of the population in the North Shore/Channelview CSA than in the Greater Houston Area (14.5% vs. 13.3%).

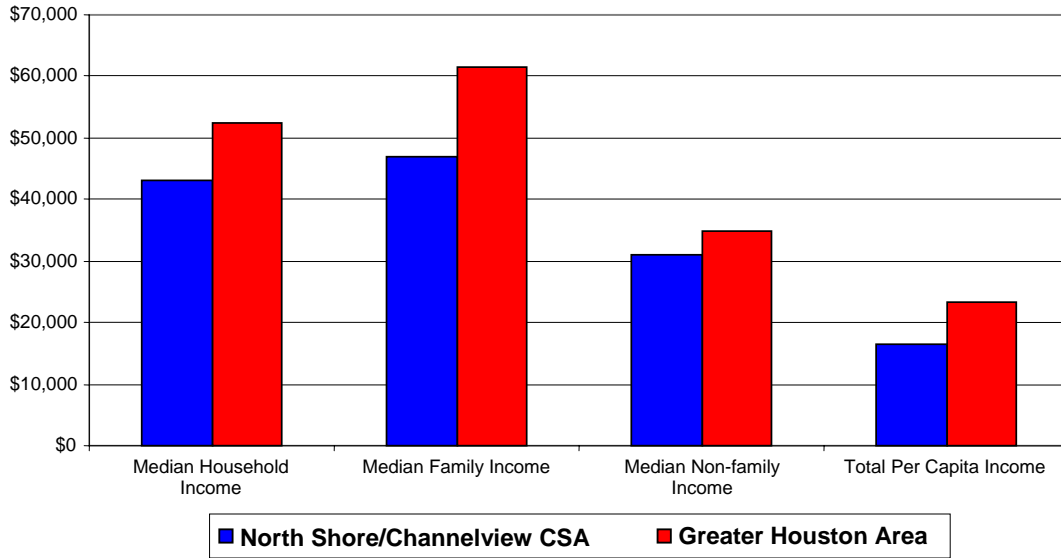

**Households by Income
North Shore/Channelview CSA and Greater Houston Area**

- In the North Shore/Channelview CSA, the percent of households earning incomes below \$15,000 is slightly smaller than in the Greater Houston Area (11.8% vs. 12.2%).
- The percent of households earning incomes between \$15,000 and \$50,000 is higher in the North Shore/Channelview CSA, than in the Greater Houston Area (46.9% vs. 39.1%)
- In the North Shore/Channelview CSA, only 20.5% of the residents earn incomes above \$75,000.

Income Dynamics
North Shore/Channelview CSA and Greater Houston Area

- The median household income in the North Shore/Channelview CSA is \$42,965 compared to \$52,462 in the Greater Houston Area.
- Median family income is significantly lower in the North Shore/Channelview CSA than in the Greater Houston Area (\$47,073 vs. \$61,391).
- In the Greater Houston Area, the median non-family income is \$34,908 whereas in the North Shore/Channelview CSA it is \$31,000.
- The total per capita income in the Greater Houston Area is slightly higher than in the North Shore/Channelview CSA (\$23,402 vs. \$16,459).

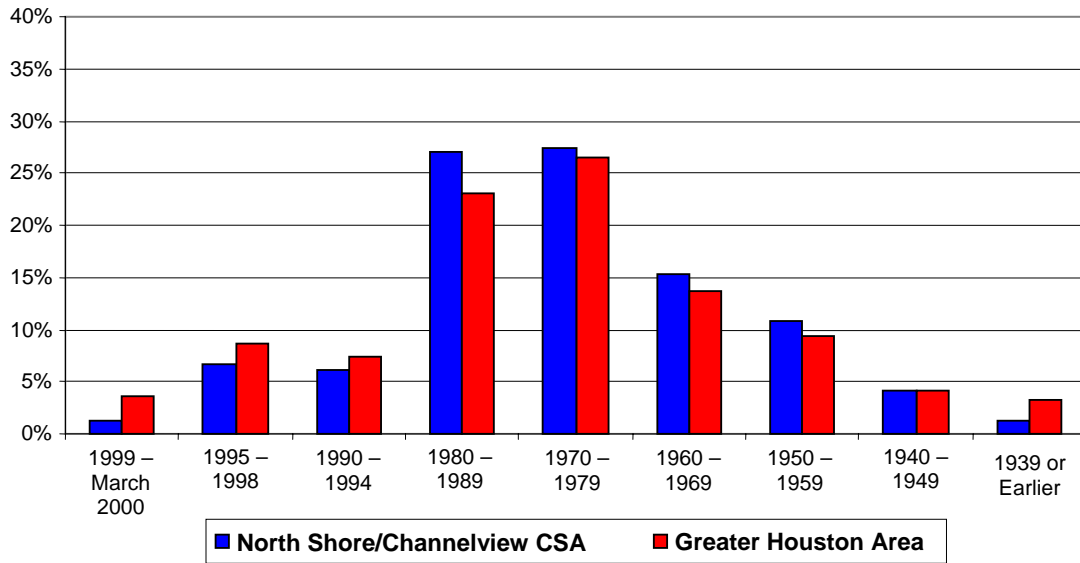

**Total Housing Units
North Shore/Channelview CSA and Greater Houston Area**

- In the North Shore/Channelview CSA, 59.5% of the households are owner-occupied, compared to 55.6% in the Greater Houston Area.
- Renter-occupied units represent a smaller percentage in the North Shore/Channelview CSA than in the Greater Houston Area (33.8% vs. 37.4%).
- In both the North Shore/Channelview CSA and the Greater Houston Area, a household is more likely to be occupied by the owner, than by a renter.

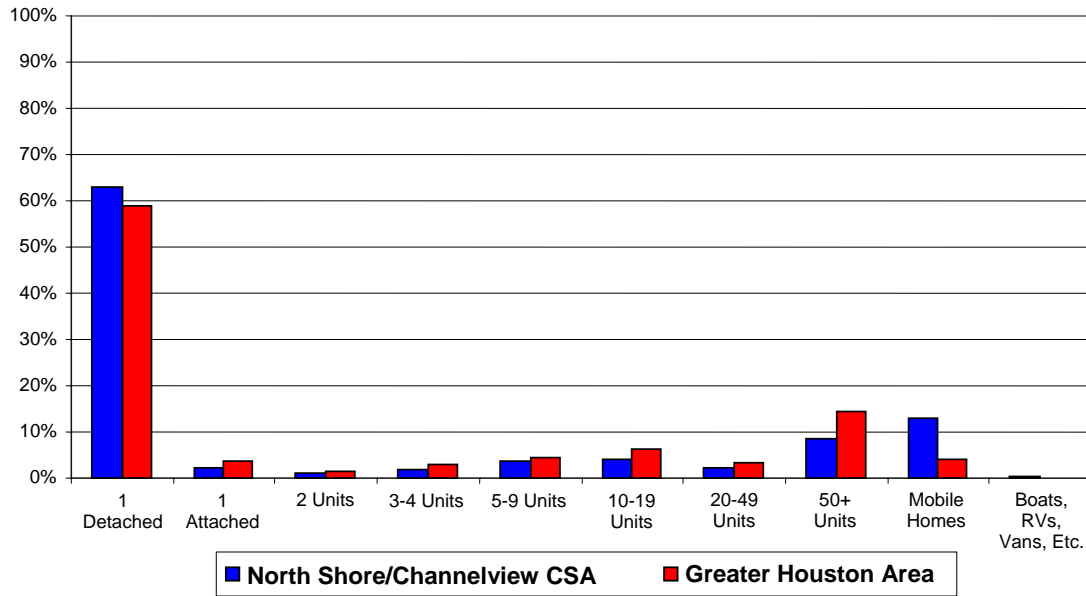

Units by Year Built
North Shore/Channelview CSA and Greater Houston Area

- In the North Shore/Channelview CSA, a slightly larger percent of the housing units were built between the 1960s and 1980s, compared to the Greater Houston Area (69.6% vs. 63.3%).
- In the North Shore/Channelview CSA, only 14.0% of the housing units were built since 1990, compared with 19.8% in the Greater Houston Area.
- 27.0% of the housing units in the North Shore/Channelview CSA were built in the 1980s, compared with 23.1% in the Greater Houston Area.
- Housing units built during the 1970s represent 27.3% in the North Shore/Channelview CSA, whereas in the Greater Houston Area they represent 26.5%.
- In the North Shore/Channelview CSA, 31.7% of the housing structures were built during the 1960s or earlier, compared to 30.6% in the Greater Houston Area.

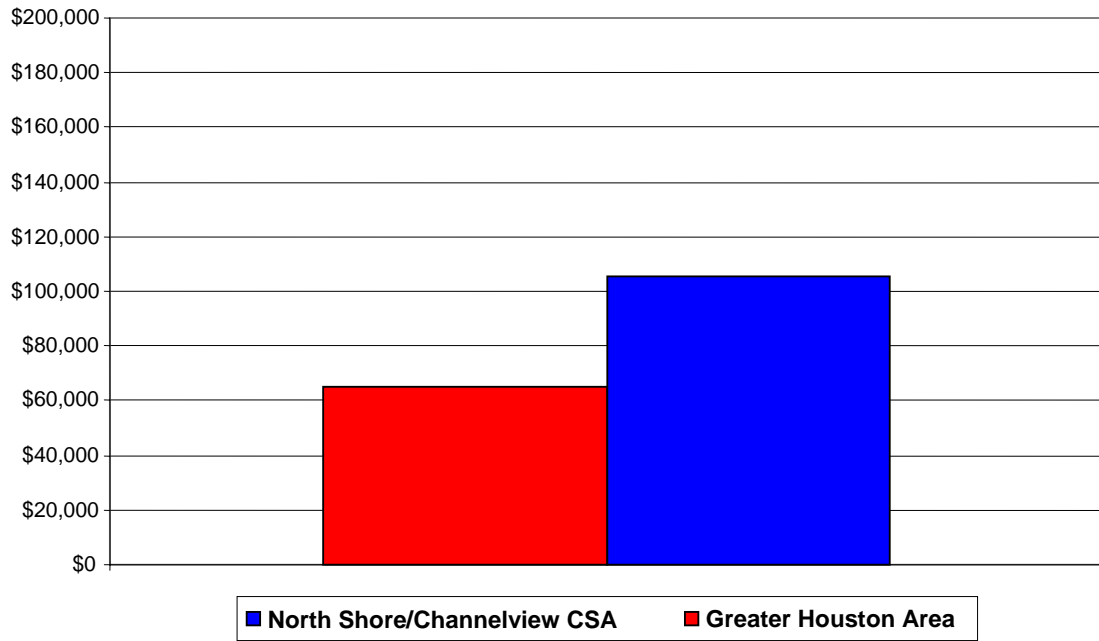

Housing Units by Type
North Shore/Channelview CSA and Greater Houston Area

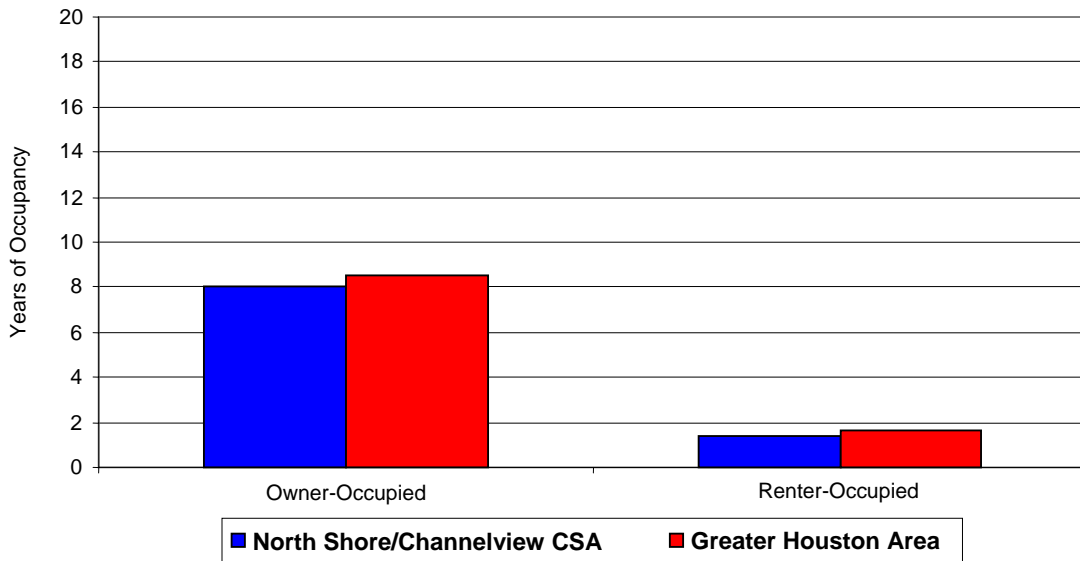

- Detached single housing units comprise a slightly larger percent in the North Shore/Channelview CSA, compared to the Greater Houston Area (63.0% vs. 59.1%).
- The percent of 50+ units in the Greater Houston Area is much higher, than in the North Shore/Channelview CSA (14.3% vs. 8.6%).
- Detached single housing units and dwellings with 50+ units represent 71.6% of the households in the North Shore/Channelview CSA, compared to 73.4% in the Greater Houston Area.
- The percentage of mobile homes in the North Shore/Channelview CSA is over three times higher, than in the Greater Houston Area (13.1% vs. 4.2%).

**Median Home Value
North Shore/Channelview CSA and Greater Houston Area**

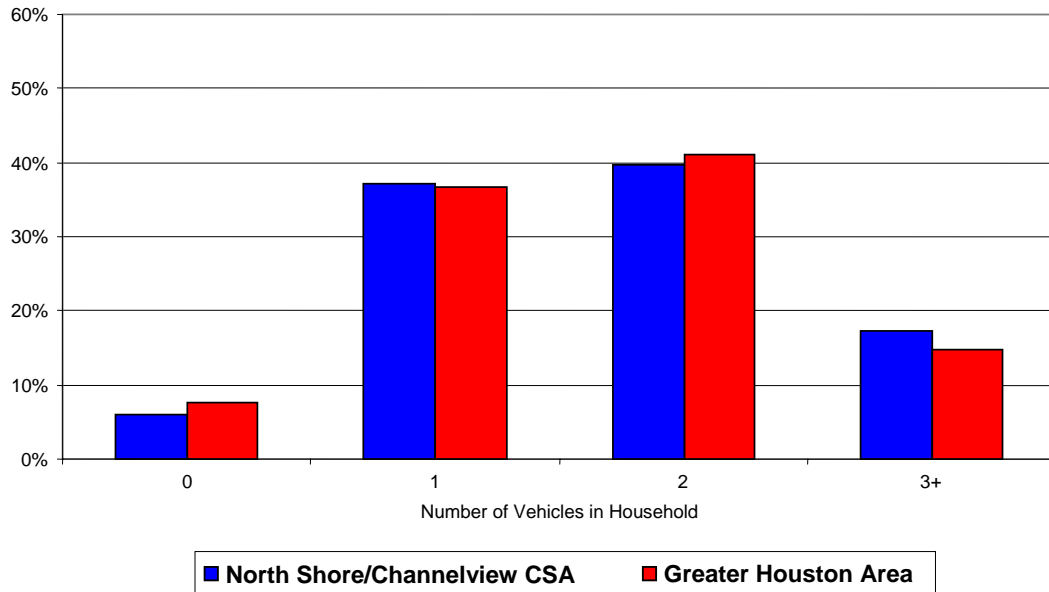

**Median Length of Occupancy
North Shore/Channelview CSA and Greater Houston Area**

- The median length of occupancy in both the Greater Houston Area and the North Shore/Channelview CSA, is longer for owner-occupied units than those occupied by a renter.
- The North Shore/Channelview CSA has a shorter median length of occupancy in owner-occupied dwellings, compared to the Greater Houston Area (8.0 years vs. 8.5 years).
- In the North Shore/Channelview CSA, the median length of occupancy for owner-occupied households is over 5 times larger than that of renter occupied households (8.0 years vs. 1.4 years).

**Households by Count of Vehicles Available
North Shore/Channelview CSA and Greater Houston Area**

- There is a slightly smaller percent of households with no vehicles in the North Shore/Channelview CSA than in the Greater Houston Area (6.1% vs. 7.7%).
- Households with one vehicle comprise a slightly higher percentage in the North Shore/Channelview CSA than in the Greater Houston Area (37.1% vs. 36.6%).
- 39.7% of the households have two vehicles in the North Shore/Channelview CSA compared to 41.0% in the Greater Houston Area.
- Households with 3 or more vehicles comprise 17.2% in the North Shore/Channelview CSA, compared to 14.8% in the Greater Houston Area.

**Households by Count of Persons
North Shore/Channelview CSA and Greater Houston Area**

- The percent of households consisting of one person is higher for the Greater Houston Area, than the North Shore/Channelview CSA (23.5% vs. 17.9%).
- A slightly smaller percentage of households in the North Shore/Channelview CSA are occupied by two persons than in the Greater Houston Area (24.9% vs. 28.3%).
- In the North Shore/Channelview CSA, over one half (57.2%) of the households consist of three or more persons compared to 48.2% in the Greater Houston Area.

Houston Profile Project North Shore/Channelview Area (CSA #26)

CSA Rankings

By Key Lifestyle and Religion Questions

In this section we rank order the 45 CSAs by key religious and lifestyle questions. We use a form of hierarchical modeling in which individual responses to the lifestyle and religion questions in the HPP Poll are estimated with key socio-demographic measures from each CSA. These measures include age structure, race and ethnic composition, household structure, education, income, and housing values. The analysis produces an estimated average response to each question for each of the 45 CSAs. We subsequently rank the 45 CSAs based on these responses, and provide tables of these rankings in this section of the report. Please note that the measures reported here are those for which the hierarchal analysis proved useful. For some measures, the models did not perform well enough to allow us to report rankings with an acceptable level of confidence.

Percent Who Get a Great Deal of Satisfaction from Their Neighborhood North Shore/Channelview CSA

- The North Shore/Channelview CSA ranks in the bottom third of all CSAs in the Greater Houston Area on neighborhood satisfaction.
- 37.10% of adults living in the North Shore/Channelview CSA receive a great deal of satisfaction from their neighborhood.
- There is a much lower percent of neighborhood satisfaction in the North Shore/Channelview CSA than in the Greater Houston Area.
- For the Greater Houston Area, 55% report receiving a great deal of satisfaction from their neighborhood.
- There are an estimated 66,376 adults living in the North Shore/Channelview CSA.
- In the North Shore/Channelview CSA an estimated 24,600 adults receive a great deal of satisfaction from their neighborhood.

Percent Who Receive a Great Deal of Satisfaction from Family North Shore/Channelview CSA

- The North Shore/Channelview CSA ranks near the middle of all CSAs in the Greater Houston Area on family satisfaction.
- 76.34% of adults living in the North Shore/Channelview CSA receive a great deal of satisfaction from their families.
- Family satisfaction in the North Shore/Channelview CSA is slightly lower than the value for the Greater Houston Area.
- For the Greater Houston Area, 79% report receiving a great deal of satisfaction from their families.
- There are an estimated 66,376 adults living in the North Shore/Channelview CSA.
- In the North Shore/Channelview CSA, almost 50,700 adults receive a great deal of satisfaction from their families.
- However, that means over 15,700 adults in the North Shore/Channelview CSA do not receive a great deal of satisfaction from their families.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory family relationships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches may have an opportunity to make connections with those who do not receive a great deal of satisfaction with family life.

Percent Who Receive a Great Deal of Satisfaction from Their Friends North Shore/Channelview CSA

- The North Shore/Channelview CSA ranks near the bottom of all CSAs in the Greater Houston Area on satisfaction from friends.
- 42.97% of adults living in the North Shore/Channelview CSA receive a great deal of satisfaction from their friends.
- This number is significantly lower than that of the Greater Houston Area.
- For the Greater Houston Area, 69% report receiving a great deal of satisfaction from their friends.
- Adults in the North Shore/Channelview CSA are more satisfied with their families (76.34%) and friendships (42.97%) than with their neighborhood (37.10%).
- There are an estimated 66,376 adults living in the North Shore/Channelview CSA.
- In the North Shore/Channelview CSA, an estimated 28,500 adults receive a great deal of satisfaction from their friends.
- This means, however, that almost 37,900 adults in the North Shore/Channelview CSA are less satisfied with their friendships.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory friendships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches have an opportunity to make connections with those who do not receive a great deal of satisfaction with friendships.

43	32.00 South Central	21.83%
44	14.00 Fifth Ward/Denver Harbor	21.70%
45	27.00 North Forest	21.65%

Percent Who Report Successfully Balancing Work and Family North Shore/Channelview CSA

- The North Shore/Channelview CSA ranks in the upper third of all CSAs in the Greater Houston Area on success at balancing work and family.
- 31.06% of adults living in the North Shore/Channelview CSA report being successful at balancing the dual demands of work and family.
- Compared with the North Shore/Channelview CSA, the Greater Houston Area's percentage is slightly higher.
- For the Greater Houston Area, 34% reported being successful at balancing the dual demands of work and family.
- There are an estimated 66,376 adults living in the North Shore/Channelview CSA.
- In the North Shore/Channelview CSA an estimated 20,600 adults report being successful at balancing work and family lives.
- This means however, that almost 45,800 adults, or a majority of adults in the North Shore/Channelview CSA, are not as successful at balancing work and family lives.
- This is important for church missions because research shows that the strains of balancing work and family life are among the leading causes of family dissolution (Kendall 2004).
- Working in the North Shore/Channelview CSA neighborhoods to help families be more successful at managing the dual demands of family and work life is a potential community ministry program.

44	32.00 South Central	38.63%
45	27.00 North Forest	36.58%

Percent Who are Generally Happy with Their Lives North Shore/Channelview CSA

- The North Shore/Channelview CSA ranks near the bottom of all CSAs in the Greater Houston Area on overall happiness.
- 42.03% of adults living in the North Shore/Channelview CSA report being happy.
- This number is lower than that of the Greater Houston Area.
- For the Greater Houston Area, 48% report being happy.
- There are an estimated 66,376 adults living in the North Shore/Channelview CSA.
- In the North Shore/Channelview CSA an estimated 29,200 adults report being happy.
- This means, however, that almost 37,200 adults are not very happy.
- As with satisfaction with family and friends, those who are not happy may be more amenable to new relationships. This is important for church outreach missions because research by Stark (2000) shows that people who are not happy are open to ministry.

Percent Who Have No Doubts About the Existence of God North Shore/Channelview CSA

- The North Shore/Channelview CSA ranks sixteenth of all CSAs in the Greater Houston Area on percent who have no doubts about the existence of God.
- 81.05% of adults in the North Shore/Channelview CSA report no doubts about the existence of God.
- This figure is slightly higher than the 78% for the Greater Houston Area.
- There are an estimated 66,376 adults living in the North Shore/Channelview CSA.
- In the North Shore/Channelview CSA, over 53,800 adults report no doubts about the existence of God.
- However, almost 12,600 adults in the North Shore/Channelview CSA do report that they have some doubts about the existence of God.

Houston Profile Project North Shore/Channelview Area (CSA #26)

Key Leader Interviews

In this section, the results from individual, face-to-face interviews with key leaders in the CSA community are presented. The interviews were conducted by HPP volunteers using a standardized questionnaire developed by CCRD. Various key positions within the community were identified and the individual leaders that filled that particular position were contacted. If the key leader agreed to an interview, the results are included, maintaining confidentiality. The various responses are listed by question and categorized by topic. The key leader positions included elected community leaders, managers of large employers in the area, principals of local schools, civic organization leaders, labor union leaders, local Chamber of Commerce representatives, editors of neighborhood newspapers, directors of minority interest group, law enforcement officers, and leaders of major places of worship.

Center for Community Research and Development
Community Poll 98

Key Leader Interviews
CSA #26 – North Shore/Channelview Area

What are the best things about the North Shore/Channelview CSA?

Small Town Atmosphere

- People.
- Small town atmosphere close to a large metropolis.
- Planned communities.
- Good living environment.
- Urban area with small town philosophy.
- Network of community. They are generating a support system.
- Constituents are open to learning new things.

Strategic Location

- The location is great. It is accessible to Downtown Houston, the Medical Center, SJCN, and four universities in the Houston area. Beltway 8 gives us access to two major airports as well.
- Ideal location: Close enough to downtown to get the benefits of the activities (baseball, museums, etc.) but far enough to maintain a small town spirit.
- Highways in this area are the least crowded.
- Cost of Living.
- Little traffic or congestion.
- Good restaurants and shopping coming to the area.
- Ship Channel area has blue collar jobs and the white collar are also here. Many white collar employees commute to downtown.

Safe Community

- This is a safe place to live and work.
- Safe—there is adequate, effective law enforcement. “Of course this is from my perspective, as one who lives in a deed restricted community.”

Great Place to Raise a Family

- One resident said, “This is a great place to raise kids!” The quality of the schools and of his church, made him want to raise his family here.
- School system: Galena Park ISD.
- Constituents are open to learning about Jesus Christ.

What are the major problems facing the area?

Traffic

- Traffic congestion, though he never thought it would be a problem, and the need for more planning.
- Growth is a negative and a positive. It has caused some traffic on Wallisville, Woodforest, and Uvalde. Some of the older residents are nostalgic and resistant to the changes in the area.

Pollution

- Pollution from the Port of Houston: This causes a smell around I-10 at night and a white substance that coats the area.

School Dropouts

- Drop out rate: Although low in some schools, it is still a concern. Drop outs increase crime in the area.

Changing Demographics

- Rapid change in demographics: A massive influx of Hispanics. After WWII, many Anglos moved into the area to work at the plants. When Armco Steel and Brown & Root closed or moved, the Anglo people moved out and the Hispanic people moved in to fill the void.
- Language barrier.
- Hispanics do not use the bank much. They use savings accounts not checking. They use Western Union a lot too.
- The macho image of some Hispanics needs to change.
- White flight.

Lack of Quality Retail Areas

- This area does not draw top-notch restaurants and recreational amenities.
- Not many businesses. We need more in the area. The more businesses we have, the more resources to support the community. We don't want to over tax our current business through excessive fund raisers, etc.

Overcoming Negative Community Image

- North Shore/Channelview is not a good name. The name should be positive such as Greater East Harris County.

Drugs, Domestic Violence, and Prostitution

- There are drugs, alcohol, promiscuity and prostitution.
- Not see much of a problem with gangs.

Fear of Terrorism

- There is a fear of terrorism because of the Port.

Do the local places of worship play any roles in the three best things?

Small Town Atmosphere

- Yes regarding the people.
- The small town atmosphere. The ministers are approachable and accessible when a need arises in the school system. They are a vital influence in the Galena Park/San Jacinto Chamber & Rotary, and the Pilot's Club. They are on the Foundation Board of the school district.
- The churches participate in the Multi-Cultural Fair, See You At The Pole, Prayer Walks, and many churches sponsor an Educator's Day.
- All churches benefit the community indirectly because the students and families go to church and are part of the community. We have many good, Christian kids in our school and then we have many that are not.

Rehabilitation of Youth

- Churches help in juvenile rehabilitation and community service programs. Churches are very helpful, others are willing.
- Other faith-based and faith-friendly organizations mentor whole families.

English Classes

- One resident sees a potential problem with divisions between English and Spanish speaking congregations, which reminded him of divisions between black and white congregations in the 1950's and 1960's.
- Churches need tolerance, understanding and acceptance of different ethnic groups. Some churches offer classes in Conversational English. Most Hispanics come from a Catholic background. Churches participate in the Multicultural Fair.

Providing Services for the Community

- Too much segregation. The Anglos, Hispanics, and African-Americans must work together for centralized services for the community.

Are there other contributions that places of worship are making to the area?

- Churches partner with schools and the North Shore/Channelview Assistance ministry. They do fundraisers for needy families. They are the first responders in times of crisis such as the floods with Allison and the tornadoes in Channelview. The churches help the community with food, clothing and blood drives.
- Sometimes in juvenile projects churches try to be too good, and offer their services at no charge, however, it is much better for those involved to have to pay at least some fees, as this impresses on them that a sacrifice is required to change.
- Churches in the northeast (inside the Loop, North Forest ISD area) are more densely located—“nearly one on every corner”—and smaller, but still very active.
- The churches need to welcome the Hispanics into their congregations. One church has both Spanish (9 am) and English (11 am) services on Sunday morning. The last Sunday of the month, the two churches meet together with an interpreter.
- One church is making “Ditty Bags” for the battered women with a comb, toothbrush, etc.
- The churches help with uniforms and food.
- The church has nothing in place for domestic violence.
- All churches sponsor recognition programs for senior graduates.
- The camaraderie in the community can be attributed to the church members who are part of the community
- Two churches work together to provide after school outreach to the community from 6:00 pm – 9:00 pm, to help keep kids off the streets. They also provide field trips and an annual fall festival.

Can you think of ways local places of worship help with addressing these problems?

- Churches need to start with their boards and work with the Chamber. They can partner with schools, Rotary and Pilot’s Club.
- Ministers Alliance in the North Forest ISD/ Homestead/Wayside area works well together. When they go to an official in their area, he listens! This does not occur in the North Shore/Channelview area. The resident did not even know there was a ministers association in the North Shore/ Channelview CSA.
- The churches participate in the Multi-Cultural Fair. Churches should do like some of the stores like Fiesta, which was started by German Jews. They provide for the Hispanic culture in their store.
- One church has the Right Step Program.
- The Table is sponsored by a local church.
- Two churches have GED programs.
- One church sponsors a speaker at the school to address teen pregnancy.
- The Timothy Project provides both prevention, as well as intervention strategies through group sessions, speaker’s bureau and teaching the principles of God’s word.

Can you think of other organizations and programs that are helping address these problems?

- Industry is evolving.
- Government is forcing industry to evolve.
- YMCA; they are very good about offering “scholarships” for the less fortunate to belong, and provides general support for the community.
- Rotary; offering scholarships, aide for senior citizens, and also offering programs for underprivileged to get glasses, dental care and other professional care. Their members offer medical care to those who cannot afford it, with the Rotary Club often covering extra costs.
- Pilot Club offers safety programs, giving out bicycle helmets and helping in many other ways.
- Organized sports are very important for giving children a sense of belonging, as well as a strong father figure in the coach.
- Schools are addressing the cultural issues. The staff is multi-cultural. Organizations that offer Conversational English help too.
- There is a counselor in the area who works to provide Anger Management Classes.
- WorkSource: The unemployment office on Wallisville.
- Alcoholics Anonymous.
- Colleges provide GED classes, but they are too expensive. The cost ranges from \$80-\$100.
- North Shore/Channelview Assistance Ministry.
- North Shore/Channelview Women’s Coalition.
- Rotary of Galena Park/Jacinto City.
- Pilot’s Club: Help needy families.
- Chamber of Commerce.
- Galena Park Food Pantry: Judge Biggs.
- The many community centers for senior citizens: Grayson, Galena Park Manor, Galena Park Community Building, Heritage Hall, Ramsey’s Center.
- Chamber of Commerce: They sponsor the Teacher/Student of the Month.
- YMCA: This is the greatest asset. The Y takes care of many kids during the summer by giving them recreational things to do to keep them out of trouble.

Can you think of any ways that local places of worship contribute, even unwittingly, to making these problems worse?

- No, the churches are responsive to growth and diversity. We have many different churches who support the community. Churches use the schools.
- Many churches do programs for parenting, single parents, weight control and VBS for children. I see their ads in the paper and their marquees.
- No. Continually praising churches for their eagerness to help.
- Churches should lead in tolerance and acceptance of different cultures, but that's not always the case. We like the status quo. We don't mind helping others as long as it doesn't change things for us socially or economically.
- Some people say we don't need to educate illegal aliens or help them, but, when you actually get to know them, you don't want them to go. The living conditions in Mexico are terrible. You can see why they want to come here.
- Hispanics feel uncomfortable in some churches because of the economic differences too. Sometimes the socio-economic barrier is greater than the color of skin.
- Some churches are closed-minded. They are not welcoming to people who are different from them in the areas of dress or poverty.
- The churches must reach out to the community especially those coming from domestic violence.
- One GED program has been pushed out of churches by the little church ladies who don't like the kids this program reaches. These kids aren't the cream of the crop, but the church was trying to make a difference.
- The churches may not be big enough to make an impact.

Can you think of any other ways in which local churches or places of worship play a role in creating problems for North Shore/Channelview?

- There is no one large church in the North Shore/Channelview CSA. The nucleus of the community is the college, the YMCA, the school district and the Chamber of Commerce.
- The church is here, but separate from the first four. We have many small churches all divided. I don't know if that's good or bad, but we don't have one major church to support.
- We don't have a coordinated effort amongst the churches. When you have many small churches, you have few dynamic pastors.

Can you think of any suggestions or potential programs, not already in place, that would help to solve the problems within the North Shore/Channelview CSA?

Commitment

- A commitment by area residents to make the NCA (North Shore/Channelview CSA) a better area.
- We need feedback and follow-up on this information too. When you present it just say “This is what showed up in the research.” Are you willing to be a part of the solution?

Unification

- We need to get together with the churches and have a round table discussion. A pastor’s alliance could invite realtors, and business people. We need to develop opportunities to talk.
- One church in Pasadena hosts a Business Men & Women’s Luncheon every Tuesday. For \$5 you get a delicious steak meal and a short devotional topic. They call everyone the day before and tell them what’s on the menu and the topic. Their event is a “who’s who of business people.” The pastor guarantee to get us in and out in an hour. He introduces all the dignitaries. It’s very successful. We need something like that around here.
- Expand the Multi-Cultural Festival in some way. I can’t see how churches can do anything about the economics in the area. The Chamber and banks should take care of that.

Community-Oriented Programs

- Mentoring. Organizations in our area are not as strong on providing mentoring programs as in some other areas. Some kind of program needs to be available for the kid who just “really needs to talk with somebody.”
- ESL classes.
- Domestic abuse shelter where the battered women in this area don’t have to take their children out of school and relocate. Many of these women don’t have transportation to get their children back and forth from the shelter in Baytown, Pasadena, or downtown to school.
- Teen recreational center with activities to occupy their time during the summer and also between the hours of 2:20 pm until their parents get home. We have a lot of kids who live in apartments in this area. They need places to go because their parents have to work. There are many bad things they can get into hanging around the apartments. That’s why the YMCA is so great. The churches could sponsor this program. If you get the kids to come to your church to recreational programs during the week, they may come to your church and join on Sunday. We have a generation of kids whose parents did not go to church. Thus, they do not go to church

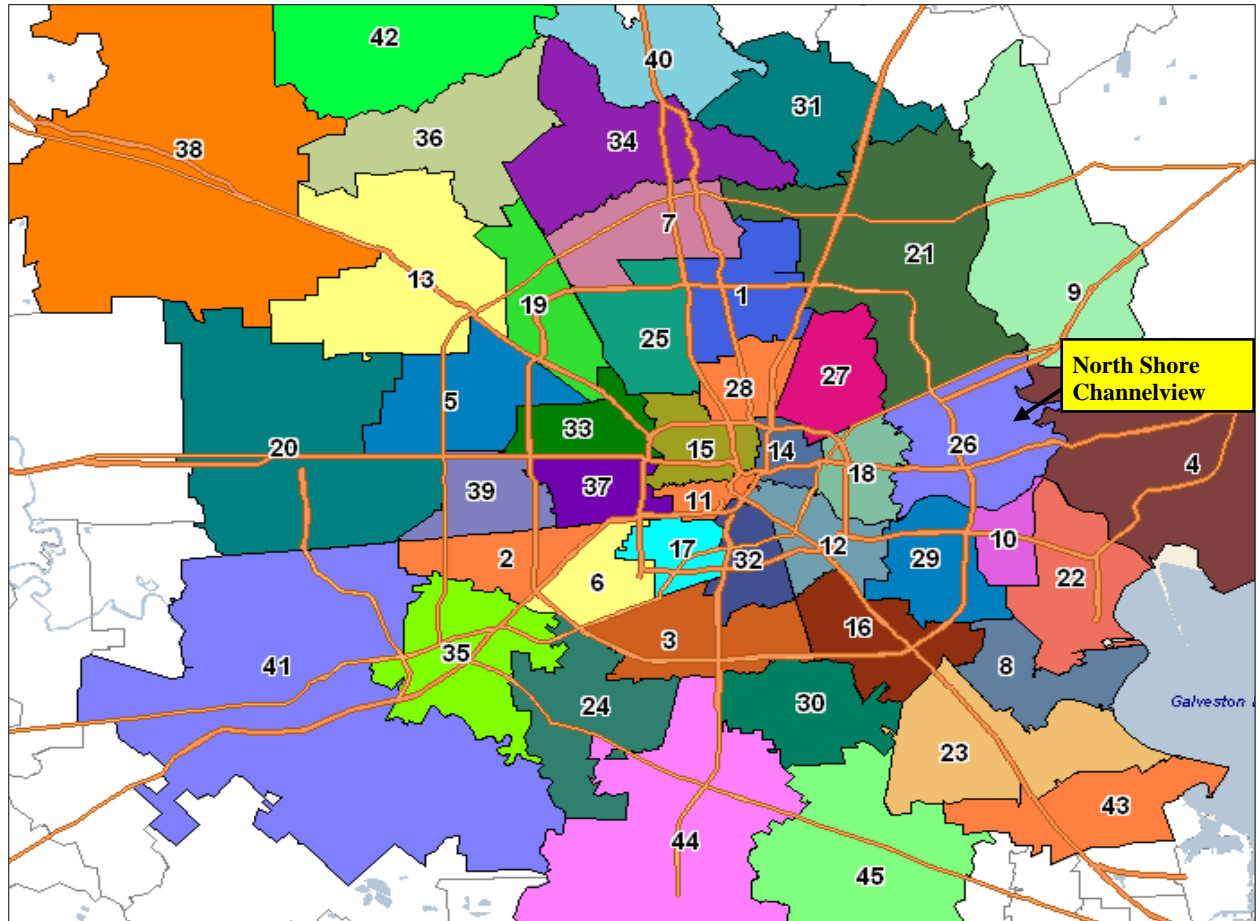

Finally, is there anything else about the area that you think is especially important, that we really need to know about, that we ought to work on, or that we should include in this report?

- It's a great place to live!
- Our school district, Galena Park ISD is a great asset to the community.
- About the only thing we don't have in our area are recreation amenities—water parks, or recreation areas and putt-putt golf courses, etc. Our kids have to go all the way over to the other side of town to enjoy these.
- This place (North Shore/Channelview) has heart. If we could only pull the people together, it would help address the issue of abuse. I believe the pastors can help do this. The shelter won't work unless they get involved.
- I have enjoyed my three years here. The Chamber works together with the three school districts to promote education, not competition between the districts.
