BACKGROUND OF THE BAYLOR CENTER FOR COMMUNITY RESEARCH AND DEVELOPMENT

Mission

The Center for Community Research and Development (CCRD) was established at Baylor University in 1979 as a multidisciplinary entity with a mission of **engaging Baylor faculty and students in applied social research to improve the local quality of life**. Over time, the CCRD has broadened its focus, sometimes engaging in statewide or national research, and the CCRD has become closely linked with Baylor's Ph.D. program in Applied Sociology, where Ph.D. students serve as center research analysts. Still, our research remains multidisciplinary and many of the CCRD's projects retain a local quality of life focus.

Facilities

The CCRD originally worked out of faculty offices in Sociology and Political Science and moved into its own facilities in 1990, when the operations center was located in the basement of the Sid Richardson Science Building. The CCRD moved to Suite 300 of the Robinson Tower in 1994. These modern facilities allow easier access to the community and include:

- offices for Center directors, six doctoral students, research analysts, and a project coordinator,
- focus group facilities with a separate observation room and recording equipment,
- a conference room for meetings and graduate seminars,
- report production facilities for CCRD documents,
- a local area network with Windows operating systems, and
- a Computer Assisted Telephone Interviewing (CATI) system.

Services

The Center for Community Research and Development is equipped to undertake a wide variety of projects for organizations, businesses, industries, and governmental agencies. Services include:

- Mail Surveys
- Telephone Surveys
- Questionnaire design
- Needs assessments
- Program planning and evaluation
- Impact assessments
- Population trend studies and projections
- Data collection and analysis
- Sampling designs
- Focus groups
- Seminars and workshops on community issues
- Mock Juries and Jury Consulting

Society for Applied Sociology

From 1998 through 2001, the CCRD served as the administrative office for the Society for Applied Sociology, an international organization for professionals involved in applying sociological knowledge in a wide variety of settings. The CCRD retains an active membership in SAS and Dr. Tillman Rodabough is the President. The mission statement for SAS is to:

- Provide a forum for sociologists and others interested in applying sociological knowledge.
- Enhance understanding of the interrelationship between sociological knowledge and sociological practice.
- Increase the usefulness and effectiveness of applied sociological research and training.

Selected Previous Clients

The CCRD has served a varied clientele on a large number of issues. Representative projects include:

- **Telephone surveys** for the City of Waco, Southwestern Bell, the *Waco Tribune-Herald*, Houston Profile Project
- **Site location research** for the Perryman Group, American Airlines
- **Needs assessments** for the Baptist General Convention of Texas, the United Way, HOTCOG
- **Population projections** for the Heart of Texas Council of Governments, Heritage House
- **Focus groups** for Creative Education Institute, Baylor University, EEOC, City of Waco, the United Way
- **Mail-out surveys** for Hillcrest Baptist Medical Center, the City of Woodway, Baptist General Convention of Texas
- **Intercept surveys** for Richland Mall, the Texas Ranger Museum, the Dr. Pepper Museum
- **Mock juries** and **change of venue** research for Amarillo, Dallas and Waco law firms
- **Program assessments** for the McLennan County Youth Collaboration, Waco Police Department
- **Door-to-door surveys** for the Waco Housing Authority, Mission Waco, Drug Prevention Resources
- **Voter exit interviews** for the Dallas Independent School District
- **Institutional evaluation** for San Marcos Baptist Academy, the BGCT Education Commission. Baptists in Scouting, Baylor University, Waco Independent School District
- **Program development** for the Cooper Foundation, the Junior League, MHMR

Fees

The CCRD is a non-profit service center for the community and University. Fees charged for research projects represent actual costs for services and enable the CCRD to be self-supporting.

Staff

- **Dr. Larry Lyon** is Director of the CCRD, Dean of the Graduate School, and Professor of Sociology in the Department of Sociology and Anthropology (Larry_Lyon@Baylor.edu).
- **Dr. Tillman Rodabough** is Research Director for the CCRD and Professor of Social Psychology in the Department of Sociology (Tillman_Rodabough@Baylor.edu).
- **Mrs. Debbie Marable** is the Projects Coordinator for the CCRD, Graduate Program Assistant for Sociology and a graduate of Baylor University (Debbie_Marable@Baylor.edu).
- **Dr. Carson Mencken** is Associate Professor of Sociology and Graduate Program Director for Sociology, with research expertise in statistical analysis and spatial modeling and serves as a research professor for CCRD (Carson_Mencken@Baylor.edu).
- **Dr. Robyn Bateman Driskell** is Associate Professor of Sociology with expertise in demography and serves as a research professor for the CCRD (Robyn_Bateman@Baylor.edu).
- **Dr. Charles Tolbert, II** is Professor and Chair, Department of Sociology and Anthropology and GIS and census data consultant for CCRD (Charlie_Tolbert@Baylor.edu).
- **Lacey C. Wiggins, M.A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Lacey_Chapman@Baylor.edu).
- **Rusty Parker, M. A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Rusty_Parker@Baylor.edu).
- **Jodien Matos** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jodien_Matos@Baylor.edu).
- **Kathy Krey** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Kathy_Krey@Baylor.edu).
- **Jeniece Williams** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jeniece_Williams@Baylor.edu).
- **Elizabeth Terrazas-Carrillo** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Elizabeth_Terrazas-Carrillo @Baylor.edu).
- **Liz Embry** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Elizabeth_Ninneman@Baylor.edu).

Each staff person can also be contacted at the CCRD office (254) 710-3811 or e-mailed at CCRD@Baylor.edu. Our website address is <http://www.Baylor.edu/CCRD>

Background of the Poll

Center for Community Research and Development
Poll 98
(September 2004)

In the fall of 2003, the Center for Community Research and Development (CCRD) conducted a scientific poll to assess religious and lifestyle practices and beliefs in 45 communities in the Greater Houston Area. Questions for the poll were developed by CCRD researchers using national polls on lifestyles and religion as a guideline.

From October 1 through November 15, a total of 2,419 Greater Houston Area residents were interviewed using a Computer Assisted Telephone Interviewing (CATI) system. The CATI technology allows control over the interviewing process and automates data entry. The sample was selected from a computer-generated set of random phone numbers. Random generation includes residents with unlisted numbers. Other steps taken to ensure the quality of the poll include: (1) testing and editing experimental versions of the questionnaire to increase the clarity and reliability of each question; (2) intensive training for each interviewer; (3) continual monitoring of interviews by social science Ph.D.s; (4) daily review of work and interviewing procedures and results by the CCRD staff; (5) calling during times established in previous studies to provide the most representative sample; (6) making up to five call-backs for each phone number to avoid distorting the sample toward the more easily accessible residents; (7) using special “screens” to increase the number of male and minority respondents; (8) purchasing a special bank of phone lines with “Community Research” as the caller identification label rather than the standard label, “Baylor University;” and (9) employing Spanish speaking interviewers for households where Spanish is the primary language.

The demographic characteristics of the sample resemble those of demographics available through external sources. While the sample is largely representative of the population, minority ethnic groups were slightly under-represented among respondents in the poll. To compensate, this analysis uses weighted data to ensure a more representative sample. The final sample is comparable to official data available on the 45 communities in the Greater Houston Area’s 3,097,362 adults. For example, the sample used in the analysis is approximately 58% “Anglo,” 20% Hispanic, and 17% African-American.^[1] The percentages for African Americans and Anglos closely reflect recent Census estimate population numbers for the 45 communities in the Greater Houston Area.^[2] Other population numbers/sample comparisons suggest similarly low levels of bias.

For the overall response distributions of the questionnaire data, the responses will typically vary by less than 3 percentage points in either direction at the 95% confidence level. For cross-tabulation tables that analyze smaller portions of the sample by dividing it into various categories such as race or education, the percentage of variation will be considerably higher.

^[1] Throughout this report, the terms “White” and “Anglo” refer to non-Hispanic whites. “African-American” and “Black” are used interchangeably.

^[2] 2002 Census estimates show a total adult population of 3,097,362 for the 45 communities in the Greater Houston Area. Of the approximately 3,097,362 adults: about 45.0% are Anglo, 17.5% African American, 30.2% Hispanic, 0.4% American Indian, 5.4% Asian/Pacific Islander and 1.4% are Multi-Racial.

Executive Summary

Center for Community Research and Development

Spring/Klein Area (CSA #34)

- The racial/ethnic composition of the Spring/Klein CSA is predominantly Anglo and significantly different than that of the Greater Houston Area.
- There is a significantly lower percentage of adults over the age of 25 without a high school diploma in the Spring/Klein CSA, compared to the Greater Houston Area (8.0% vs. 22.8%).
- There is a lower percentage of family households with children, headed by a single parent, in the Spring/Klein CSA compared to the Greater Houston Area (11.3% vs. 17.1%).
- Over half (51.02%) of the adults living in the Spring/Klein CSA receive a great deal of satisfaction from their neighborhood.
- Family satisfaction in the Spring/Klein CSA is much higher than the family satisfaction value for the Greater Houston Area.
- Fewer people in the Spring/Klein CSA report receiving a great deal of satisfaction from their friends than report receiving a great deal of satisfaction from their families (75.08% vs. 84.93%).
- The Spring/Klein CSA ranks fifth among all CSAs in the Greater Houston Area on overall happiness.
- 33.55% of adults living in the Spring/Klein CSA attend church at least once a week.
- In the Spring/Klein CSA, almost 49,600 adults attend church occasionally, but not every week.
- Almost 21,800 more adults in the Spring/Klein CSA report being born again than report attending church each week.
- 74.42% of adults in the Spring/Klein CSA report reading the Bible or other inspired literature when they have a problem.
- There appears to be a high level of spiritual interest in the Spring/Klein CSA.
- The Spring/Klein CSA ranks in the top third of all CSAs in the Greater Houston Area on percent who are likely to see a religious counselor when they have problems.
- In the Spring/Klein CSA, about the same number of people would seek help in a place of worship when they have problems, as attend church every week.
- More people in the Spring/Klein CSA report that they would pray when they have problems than would read the Bible, or seek help from a religious counselor or place of worship.

Spring/Klein Area (CSA #34)**

Demographics

Center for Community Research and Development
Community Poll 98

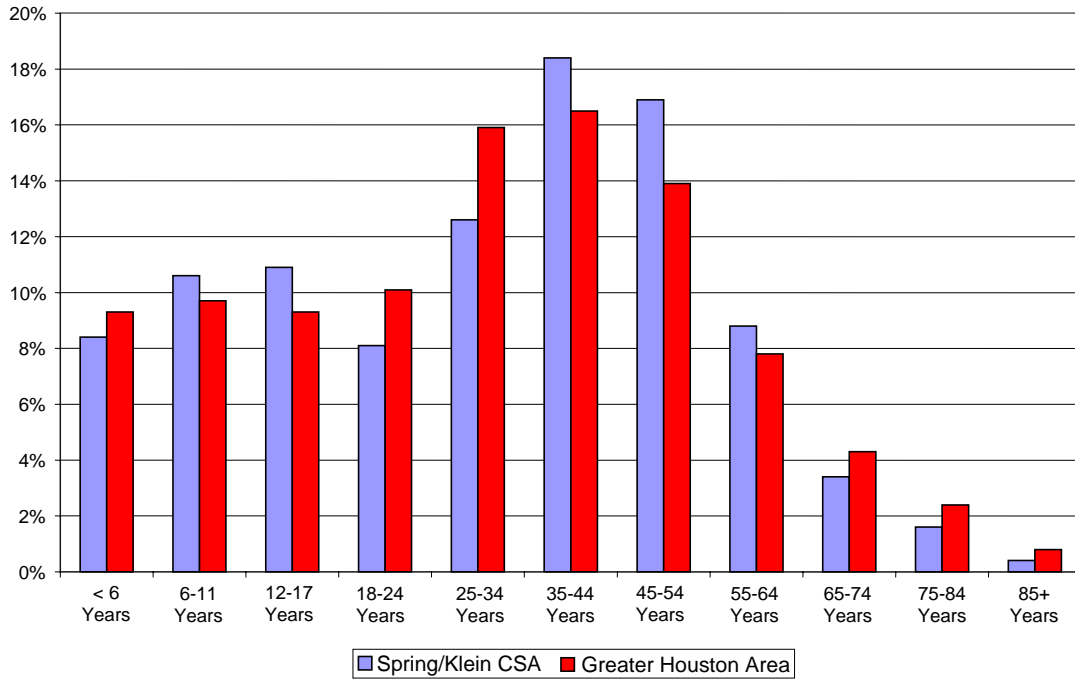

**Population by Race and Ethnicity
Spring/Klein CSA and Greater Houston Area**

- The racial/ethnic composition of the Spring/Klein CSA is predominantly Anglo and significantly different than that of the Greater Houston Area.
- The proportion of Anglos in the Spring/Klein CSA is significantly higher than that of the Greater Houston Area (79.0% vs. 45.0%).
- The proportion of Blacks in the Greater Houston Area is almost four times higher than in the Spring/Klein CSA (17.5% vs. 4.8%).
- The proportion of Hispanics in the Spring/Klein CSA is less than half that of the Greater Houston Area (11.6% vs. 30.2%).
- There are no significant differences between the Spring/Klein CSA and the Greater Houston Area in the other racial and ethnic categories.

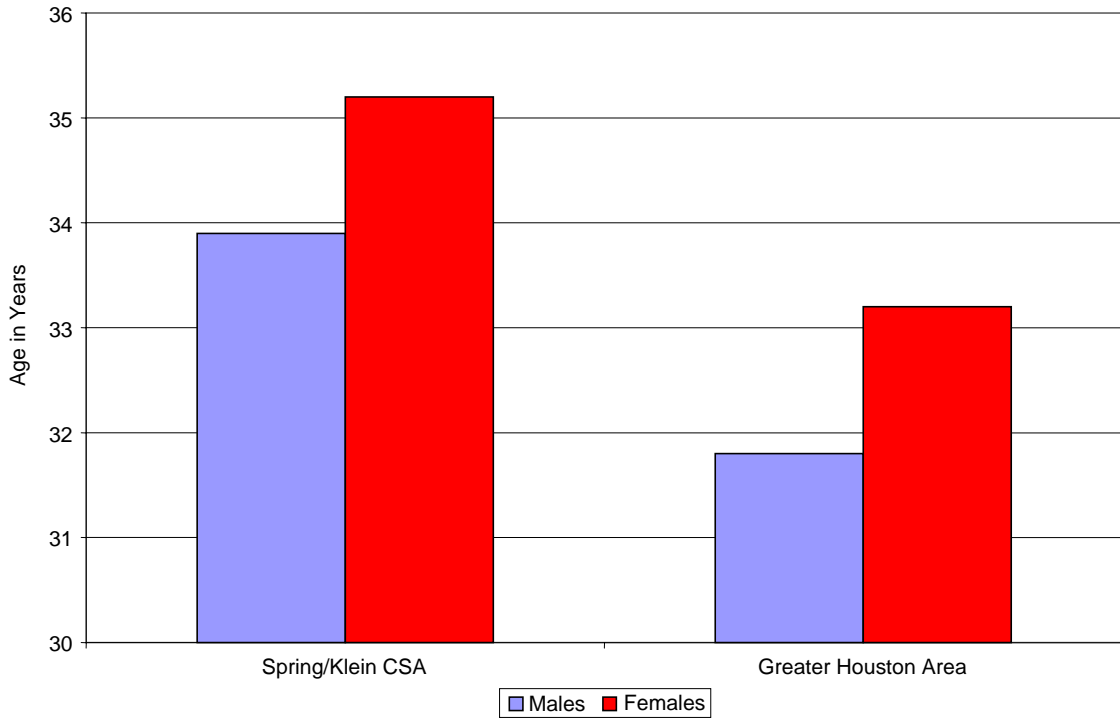

**Population by Age
Spring/Klein CSA and Greater Houston Area**

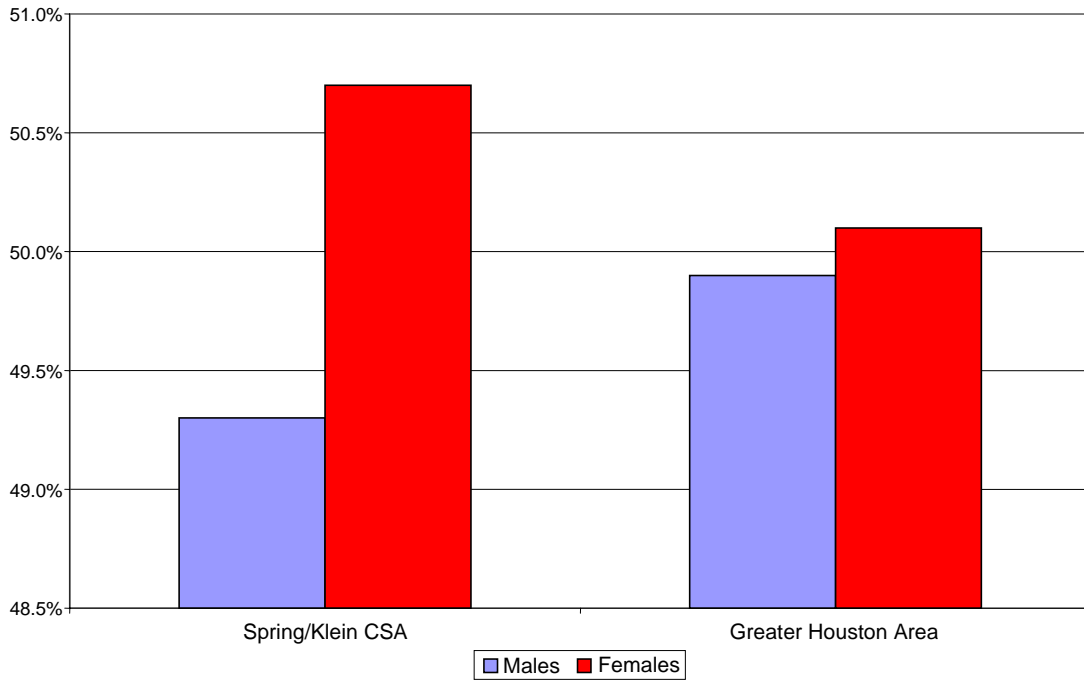

- There is a lower percentage of people in the Spring/Klein CSA over the age of 65 than there are in the Greater Houston Area (5.4% vs. 7.5%).
- Most people in the Spring/Klein CSA are in the 35 to 44 year age group (18.4%).
- Over half of the population in the Spring/Klein CSA are under the age of 35, a slightly lower percentage than in the Greater Houston Area (50.6% vs. 54.3%).

**Median Age by Gender
Spring/Klein CSA and Greater Houston Area**

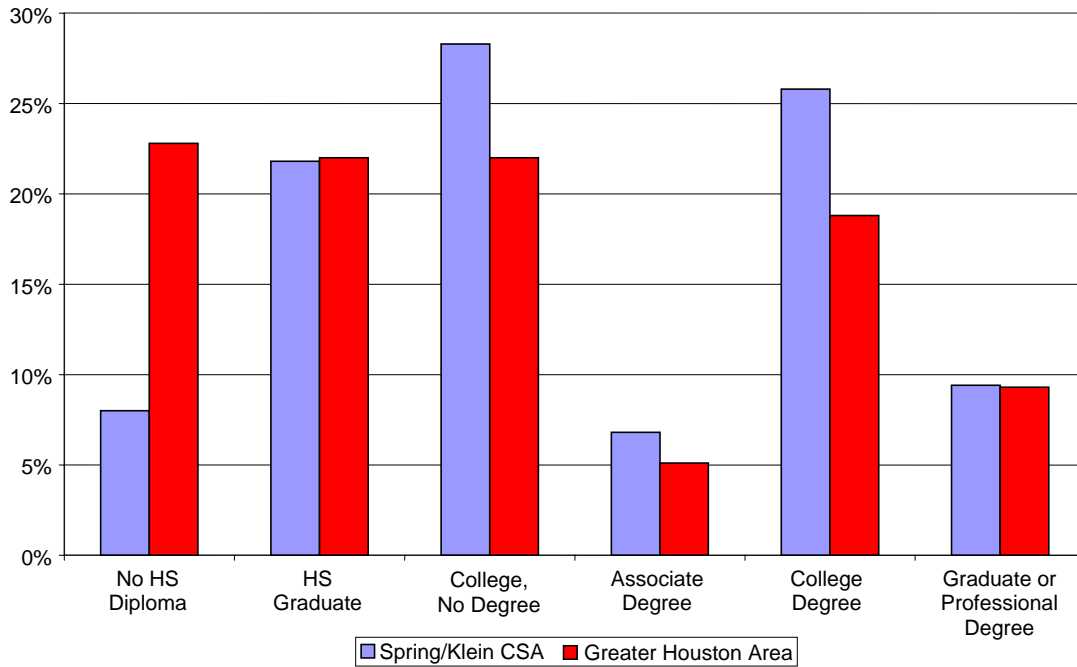

**Population by Gender
Spring/Klein CSA and Greater Houston Area**

- Males comprise 49.3% of the population in the Spring/Klein CSA, compared to 49.9% in the Greater Houston Area.
- In the Spring/Klein CSA, females represent 50.7% of the population, whereas in the Greater Houston Area they comprise 50.1%.
- There are significant differences in the median ages of the male and female populations between the Spring/Klein CSA and the Greater Houston Area.
- The median age for males is 33.9 years in the Spring/Klein CSA, compared to 31.8 years in the Greater Houston Area.
- Females in the Greater Houston Area have a median age of 33.2 years, compared to 35.2 years in the Spring/Klein CSA.
- In the Spring/Klein CSA, females have a higher median age than males (35.2 years vs. 33.9 years).

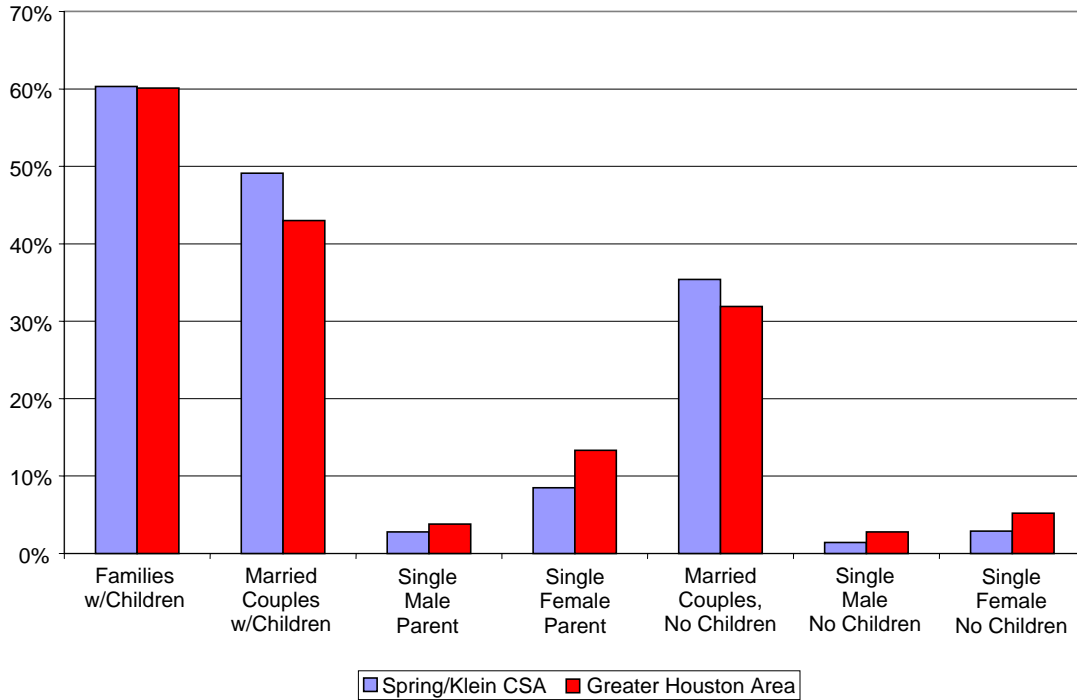

**Educational Attainment Among Adults Over 25
Spring/Klein CSA and Greater Houston Area**

- There is a significantly lower percentage of adults over the age of 25 without a high school diploma in the Spring/Klein CSA, than there are in the Greater Houston Area (8.0% vs. 22.8%).
- The Spring/Klein CSA has a higher percentage of adults who have attended college, without receiving a degree, compared to the Greater Houston Area (28.3% vs. 22.0%).
- There is a higher percentage of adults in the Spring/Klein CSA with college degrees, compared to the Greater Houston Area (25.8% vs. 18.8%).
- 35.2% of adults in the Spring/Klein CSA have a college, graduate or professional degree compared to 28.1% in the Greater Houston Area.

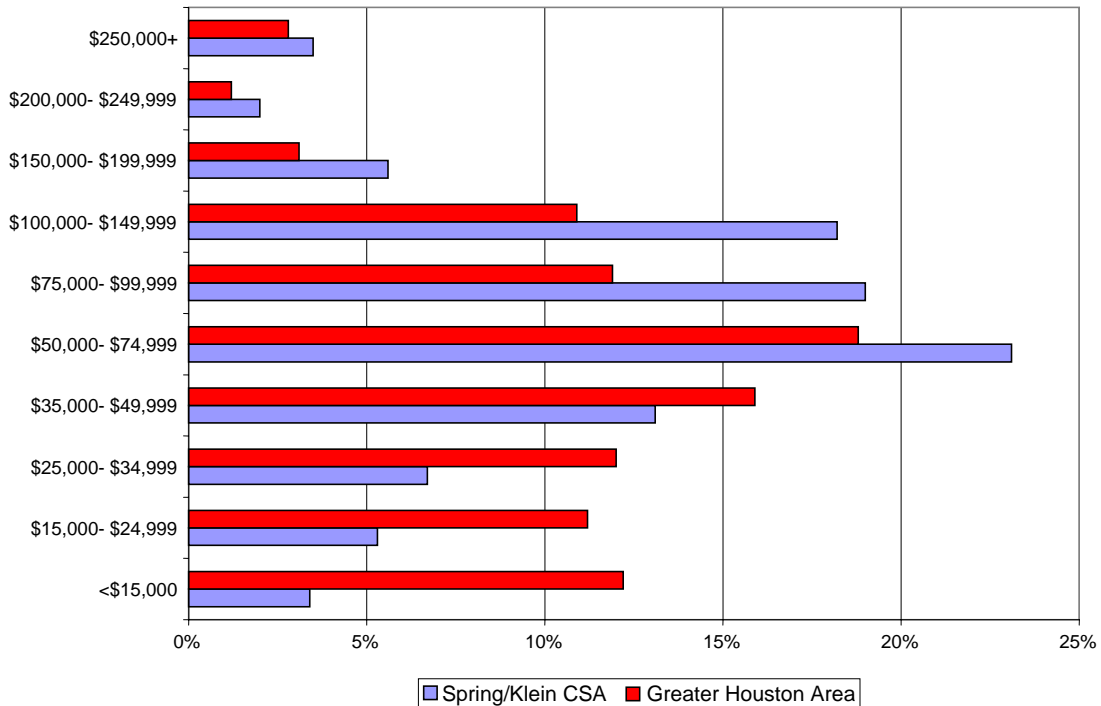

**Total Family Households by Type
Spring/Klein CSA and Greater Houston Area**

- There is a higher percentage of married couples with children in the Spring/Klein CSA than there are in the Greater Houston Area (49.1% vs. 43.0%).
- There is a lower percentage of family households with children headed by a single parent in the Spring/Klein CSA than there are in the Greater Houston Area (11.3% vs. 17.1%).
- There is a significantly lower percentage of households consisting of single males or females without children in the Spring/Klein CSA than there are in the Greater Houston Area (4.3% vs. 8.0%).
- Most households in the Spring/Klein CSA consist of married couples with children (49.1%).

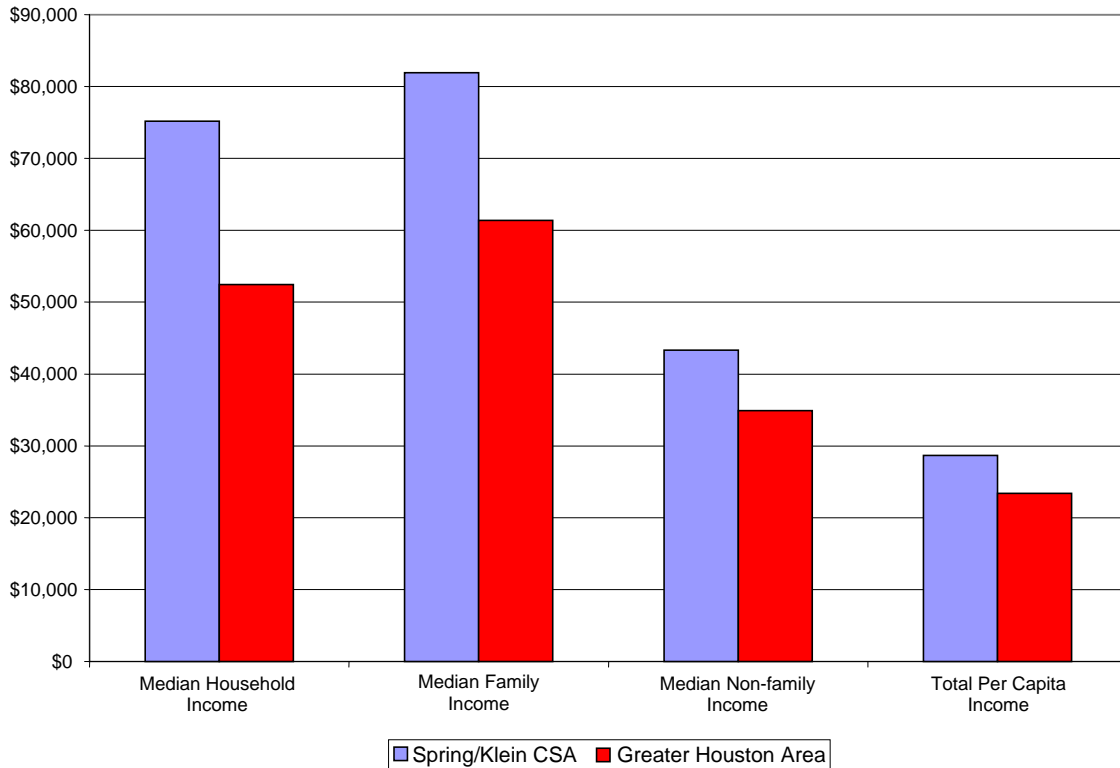

**Households by Income
Spring/Klein CSA and Greater Houston Area**

- Overall, the household incomes of people in the Spring/Klein CSA are higher and significantly different than those of households in the Greater Houston Area.
- There is a lower percentage of households in the Spring/Klein CSA with incomes less than \$15,000 than there are in the Greater Houston Area (3.4% vs. 12.2%).
- There is a lower percentage of households in the Spring/Klein CSA with incomes in the \$15,000 to \$24,999 range than there are in the Greater Houston Area (5.3% vs. 11.2%).
- There is a higher percentage of households in the Spring/Klein CSA with incomes over \$100,000 than there are in the Greater Houston Area (29.3% vs. 18.0%).

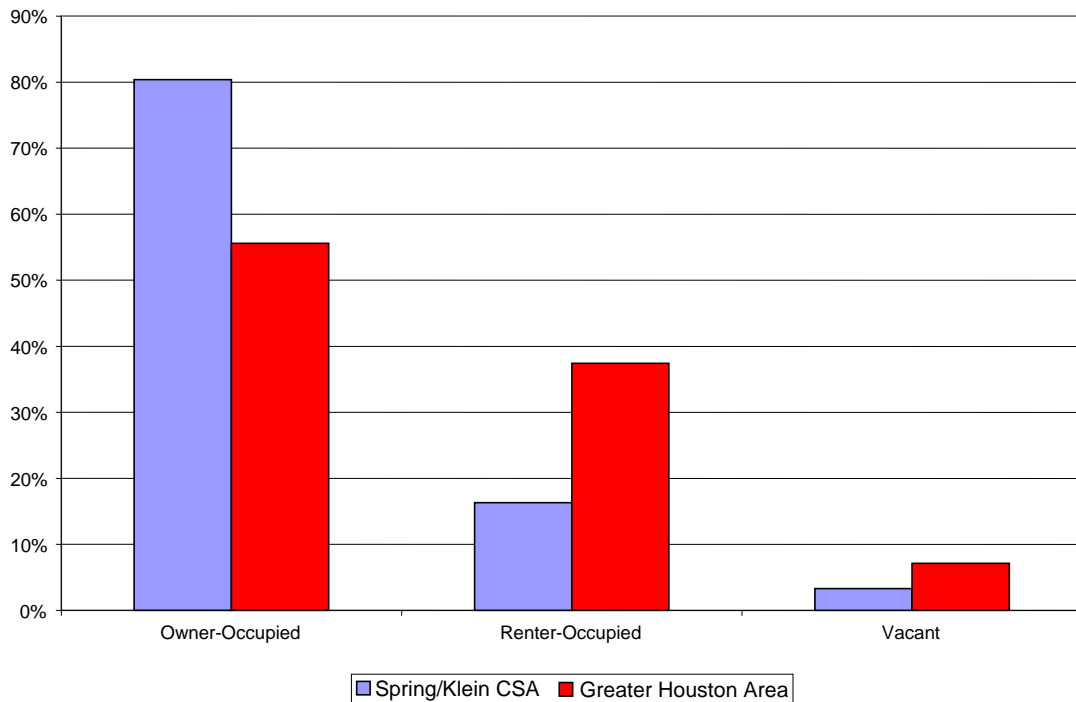

Income Dynamics
Spring/Klein CSA and Greater Houston Area

- In all categories, income levels in the Spring/Klein CSA are higher, than those in the Greater Houston Area.
- The median household income of the Spring/Klein CSA is significantly higher than that of the Greater Houston Area (\$75,177 vs. \$52,462).
- The median family income of the Spring/Klein CSA is significantly higher than that of the Greater Houston Area (\$81,944 vs. \$61,391).
- The median non-family income of the Spring/Klein CSA is significantly higher than that of the Greater Houston Area (\$43,309 vs. \$34,908).
- The total per capita income of the Spring/Klein CSA is higher than that of the Greater Houston Area (\$28,665 vs. \$23,402).

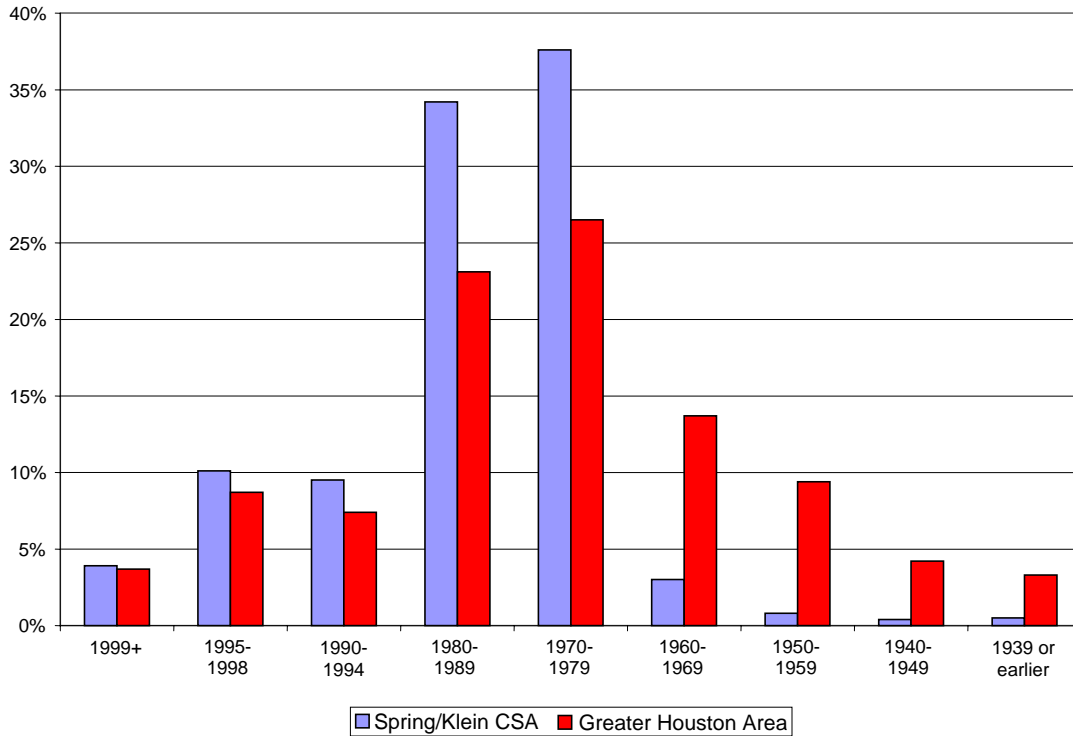

**Total Housing Units
Spring/Klein CSA and Greater Houston Area**

- The proportion of housing units occupied by the owner is significantly higher in the Spring/Klein CSA than in the Greater Houston Area (80.4% vs. 55.6%).
- The proportion of housing units occupied by a renter is less than half that in the Spring/Klein CSA than in the Greater Houston Area (16.3% vs. 37.4%).
- The proportion of housing units left vacant in the Spring/Klein CSA is also less than half that in the Greater Houston Area (3.3% vs. 7.1%).
- In the Spring/Klein CSA, a housing unit is almost 5 times more likely to be occupied by the owner than by a renter (80.4% vs. 16.3%).

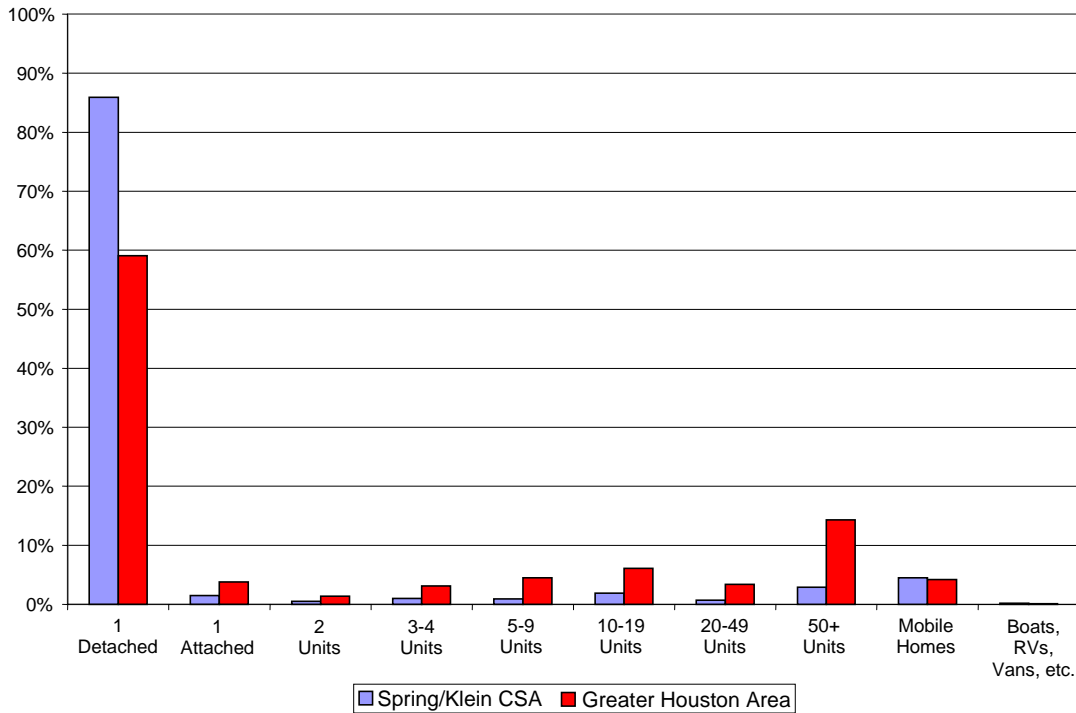

Housing Units by Year Built
Spring/Klein CSA and Greater Houston Area

- Overall, housing units in the Spring/Klein CSA are newer than those in the Greater Houston Area.
- A higher percentage of housing units in the Spring/Klein CSA were built after 1990, compared to the Greater Houston Area (23.5% vs. 19.8%).
- There was a significantly higher percentage of housing units built in the 1980s in the Spring/Klein CSA compared to the Greater Houston Area (34.2% vs. 23.1%).
- Most of the homes in the Spring/Klein CSA were built in the 1970s, a much higher percentage than in the Greater Houston Area (37.6% vs. 26.5%).

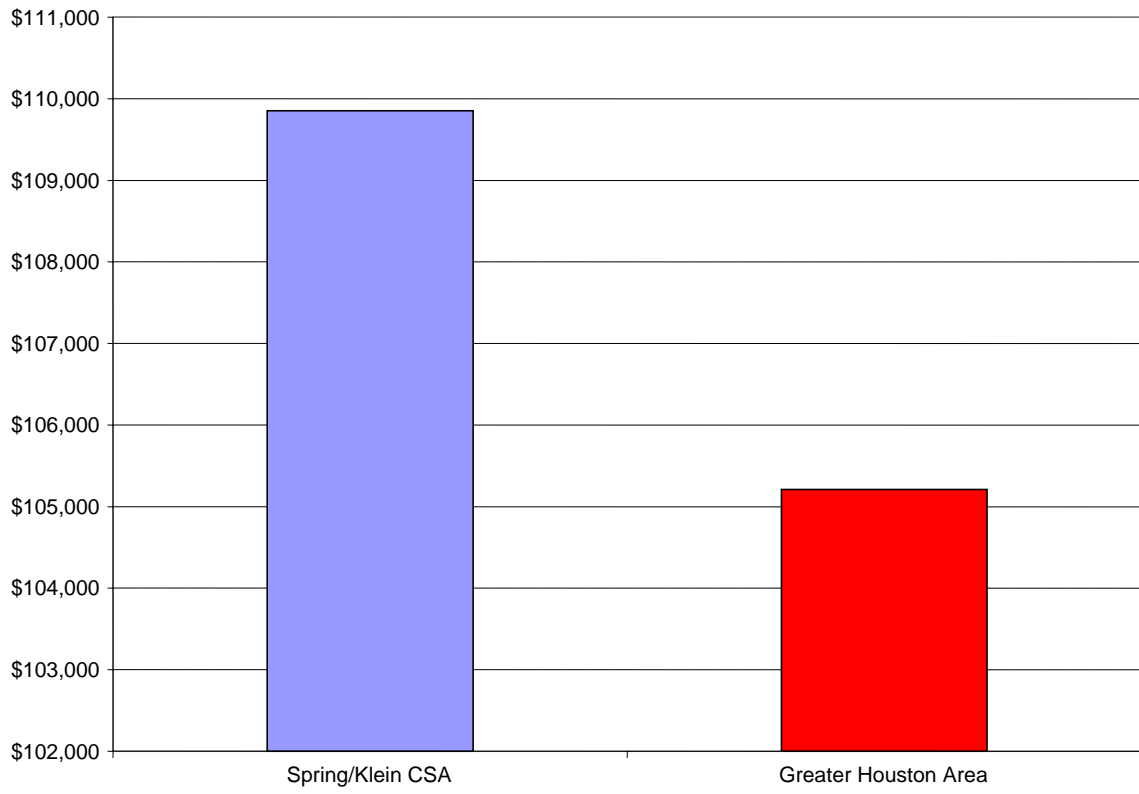

**Housing Units by Type
Spring/Klein CSA and Greater Houston Area**

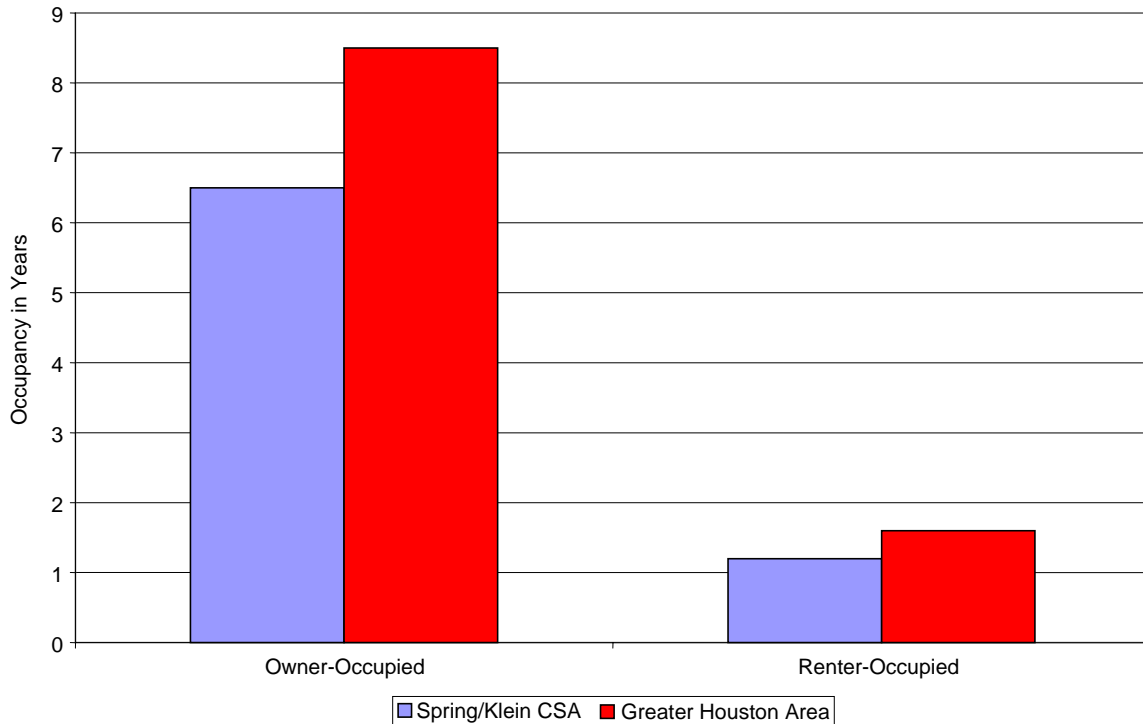

- The proportion of detached housing units in the Spring/Klein CSA is significantly higher than that of the Greater Houston Area (85.9% vs. 59.1%).
- The proportion of dwellings with multiple units is over 4 times higher in the Greater Houston Area than in the Spring/Klein CSA (32.8% vs. 7.9%).
- The proportion of dwellings with 50 or more units is almost 5 times smaller in the Spring/Klein CSA than it is in the Greater Houston Area (2.9% vs. 14.3%).
- There are no significant differences between the Spring/Klein CSA and the Greater Houston Area in the proportion of Mobile Homes, Boats, RVs, Vans, etc.

**Median Home Value
Spring/Klein CSA and Greater Houston Area**

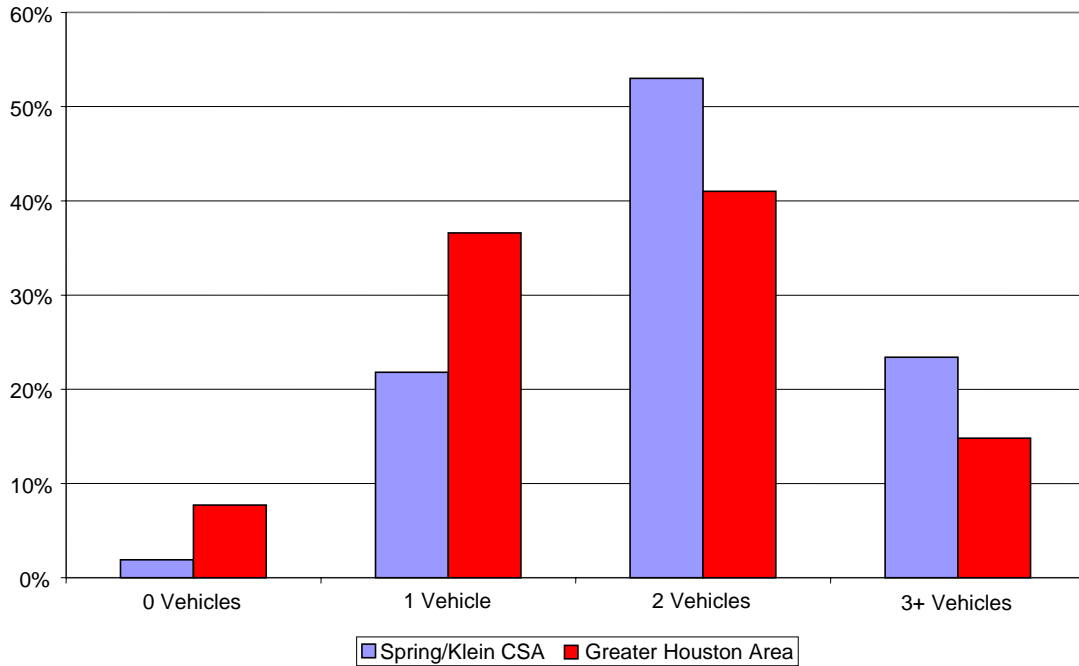

**Median Length of Occupancy
Spring/Klein CSA and Greater Houston Area**

- The median length of occupancy is generally longer for dwellings that are occupied by the owner, and shorter for those occupied by a renter.
- In owner-occupied housing units, the Spring/Klein CSA has a shorter median length of occupancy than the Greater Houston Area (6.5 years vs. 8.5 years).
- In renter-occupied dwellings, the Spring/Klein CSA has a shorter median length of occupancy than that of the Greater Houston Area (1.2 years vs. 1.6 years).
- In the Spring/Klein CSA, the median length of occupancy for owner-occupied households is over 5 times that of renter-occupied households (6.5 years vs. 1.2 years).

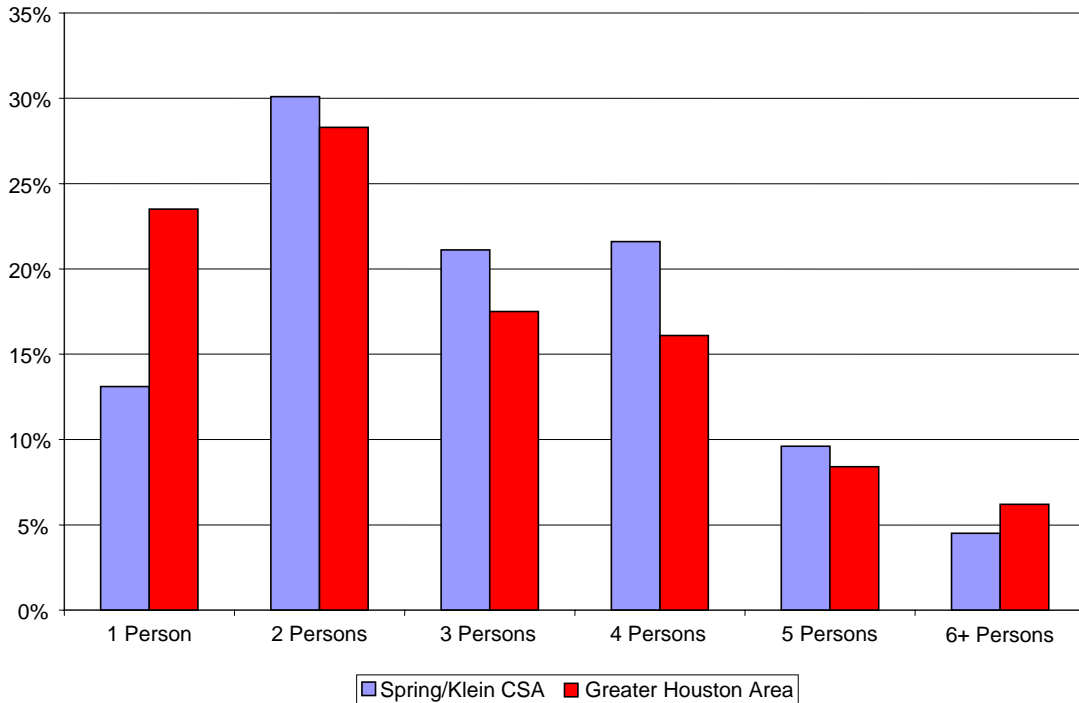

**Households by Count of Vehicles Available
Spring/Klein CSA and Greater Houston Area**

- The percentage of households with no vehicles is significantly lower in the Spring/Klein CSA than in the Greater Houston Area (1.9% vs. 7.7%).
- The percentage of households with only one vehicle available is significantly lower in the Spring/Klein CSA than in the Greater Houston Area (21.8% vs. 36.6%).
- The percentage of households with 2 or more vehicles available is significantly higher in the Spring/Klein CSA than in the Greater Houston Area (76.4% vs. 55.8%).
- Most households in the Spring/Klein CSA have two vehicles available (53.0%).

**Households by Count of Persons
Spring/Klein CSA and Greater Houston Area**

- There are significant differences between the Spring/Klein CSA and the Greater Houston Area in terms of number of people per household.
- There is a significantly lower percentage of households in the Spring/Klein CSA with only one person than there are in the Greater Houston Area (13.1% vs. 23.5%).
- There is a higher percentage of households consisting of two people in the Spring/Klein CSA than there are in the Greater Houston Area (30.1% vs. 28.3%).
- There is a much higher percentage of households with three or four people in the Spring/Klein CSA than there are in the Greater Houston Area (42.7% vs. 33.6%).
- There is a lower percentage of households with six or more people in the Spring/Klein CSA than there are in the Greater Houston Area (4.5% vs. 6.2%).

Houston Profile Project Spring/Klein Area (CSA #34)

CSA Rankings

By
Key Lifestyle and Religion Questions

In this section we rank order the 45 CSAs by key religious and lifestyle questions. We use a form of hierarchical modeling in which individual responses to the lifestyle and religion questions in the HPP Poll are estimated with key socio-demographic measures from each CSA. These measures include age structure, race and ethnic composition, household structure, education, income, and housing values. The analysis produces an estimated average response to each question for each of the 45 CSAs. We subsequently rank the 45 CSAs based on these responses, and provide tables of these rankings in this section of the report. Please note that the measures reported here are those for which the hierarchal analysis proved useful. For some measures, the models did not perform well enough to allow us to report rankings with an acceptable level of confidence.

Percent Who Receive a Great Deal of Satisfaction from Their Family Spring/Klein CSA

- The Spring/Klein CSA ranks third among all CSAs in the Greater Houston Area on family satisfaction.
- 84.93% of adults living in the Spring/Klein CSA receive a great deal of satisfaction from their families.
- Family satisfaction in Spring/Klein CSA is much higher than the family satisfaction value for the Greater Houston Area.
- For the Greater Houston Area, 79% report receiving a great deal of satisfaction from their families.
- There are an estimated 86,565 adults living in the Spring/Klein CSA.
- In the Spring/Klein CSA over 73,500 adults receive a great deal of satisfaction from their families.
- However, that means that over 13,000 adults in the Spring/Klein CSA do not receive a great deal of satisfaction from their families.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory family relationships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches may have an opportunity to make connections with those who do not receive a great deal of satisfaction with family life.

Percent Who Receive a Great Deal of Satisfaction from Their Friends Spring/Klein CSA

- The Spring/Klein CSA ranks in the lower top half of all CSAs in the Greater Houston Area on satisfaction from friends.
- 75.08% of adults living in the Spring/Klein CSA receive a great deal of satisfaction from their friends.
- This number is higher than in the Greater Houston Area.
- For the Greater Houston Area, 69% report receiving a great deal of satisfaction from their friends.
- Fewer people in the Spring/Klein CSA report receiving a great deal of satisfaction from their friends than report receiving a great deal of satisfaction from their families (75.08% vs. 84.93%).
- Adults in the Spring/Klein CSA are much less satisfied with their neighborhood (51.02%) than with their friends (75.08%) and families (84.93%).
- There are an estimated 86,565 adults living in the Spring/Klein CSA.
- In the Spring/Klein CSA almost 65,000 adults receive a great deal of satisfaction from their friends.
- This means, however, that almost 21,600 adults in the Spring/Klein CSA are less satisfied with their friendships.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory friendships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches have an opportunity to make connections with those who do not receive a great deal of satisfaction with friendships.

Percent Who Report Successfully Balancing Work and Family Spring/Klein CSA

- The Spring/Klein CSA ranks eleventh among all CSAs in the Greater Houston Area on success at balancing work and family.
- Despite its high ranking, only 31.45% of adults living in the Spring/Klein CSA report being successful at balancing the dual demands of work and family.
- Compared with the Greater Houston Area, the Spring/Klein CSA's percentage is lower.
- For the Greater Houston Area, 34% being successful at balancing the dual demands of work and family.
- There are an estimated 86,565 adults living in the Spring/Klein CSA.
- In the Spring/Klein CSA over 27,200 adults report being successful at balancing work and family lives.
- This means, however, that over 59,300 adults, or the majority of adults in the Spring/Klein CSA, are not as successful at balancing work and family lives.
- This is important for church missions because research shows that the strains of balancing work and family life are among the leading causes of family dissolution (Kendall 2004).
- Working in the Spring/Klein CSA's neighborhoods to help families be more successful at managing the dual demands of family and work life is a potential community ministry program.

Percent Who are Generally Happy with Their Lives Spring/Klein CSA

- The Spring/Klein CSA ranks fifth among all CSAs in the Greater Houston Area on overall happiness.
- 50.88% of adults living in Spring/Klein CSA report being generally happy.
- This number is slightly higher than in the Greater Houston Area.
- For the Greater Houston Area, 48% report being generally happy with their lives.
- There are an estimated 86,565 adults living in the Spring/Klein CSA.
- In the Spring/Klein CSA over 44,000 adults report being generally happy.
- This means, however, that over 42,500 adults are not very happy.
- As with satisfaction with family and friends, those who are not happy may be more amenable to new relationships. This is important for church outreach missions because research by Stark (2000) shows that people who are not happy are open to ministry.

Percent Who Have No Doubts About the Existence of God Spring/Klein CSA

- The Spring/Klein CSA ranks in the middle of all CSAs in the Greater Houston Area on percent who have no doubts about the existence of God.
- 76.62% of adults in the Spring/Klein CSA report no doubts about the existence of God.
- This figure is slightly lower than the 78% for the Greater Houston Area.
- There are approximately 86,565 adults living in the Spring/Klein CSA.
- In the Spring/Klein CSA, over 66,300 adults report no doubts about the existence of God.
- However, this means that over 20,200 adults in the Spring/Klein CSA do report having some doubts about the existence of God.

Houston Profile Project Spring/Klein Area (CSA #34)

Key Leader Interviews

In this section, the results from individual, face-to-face interviews with key leaders in the CSA community are presented. The interviews were conducted by HPP volunteers using a standardized questionnaire developed by CCRD. Various key positions within the community were identified and the individual leaders that filled that particular position were contacted. If the key leader agreed to an interview, the results are included, maintaining confidentiality. The various responses are listed by question and categorized by topic. The key leader positions included elected community leaders, managers of large employers in the area, principals of local schools, civic organization leaders, labor union leaders, local Chamber of Commerce representatives, editors of neighborhood newspapers, directors of minority interest group, law enforcement officers, and leaders of major places of worship.

Center for Community Research and Development
Community Poll 98

**Key Leader Interviews
CSA #34 – Spring/Klein Area**

What are the best things about the Spring/Klein area?

Community Involvement

- Friendliness of the people.
- People here care about their families and their community.
- Family-oriented community.
- Mostly middle to upper class residential population.
- Comfortable, growing, suburban community – a good place to live.

Neighborhood Initiatives

- There are many opportunities for people to make a difference.
- Low crime rate – a safe place to live.

Location

- Lots of good places to eat and shop.
- All of the shopping that you need.
- We're not downtown – in other words, the suburban feel, the sense of community. People identify with the area.

Diversity

- We have diversity ethnically, religiously, and socioeconomically.

Churches

- Many churches to choose from.
- Pastors and congregations that want to improve the community.

Infrastructure

- Quality of roads and homes.
- Very clean area.
- Not a lot of vacant buildings or street vendors.
- Fairly clean.
- Safer than other areas.

Education

- Quality of the schools.
- Good school systems overall.
- Good schools.
- School systems are good.

What are the major problems facing the area?

Community

- Family dysfunction.
- Spiritual apathy.
- Lack of collaboration among churches in the community.
- Sexual sin.
- Poverty and drugs around the apartment complexes.
- Abortion clinics.
- Tattoo parlors and adult novelty shops are starting to move in to the area.
- Need parenting education.
- A spirit of ease and convenience among Christians.
- Churches are focused more on growth than on making disciples or impacting the community.
- Materialism and greed.
- Because of the economic downturn, more people in the area need social services. More people are economically disadvantaged. We're going to be facing problems of the inner city as far as housing, education, and social services.

Crime

- Crime.
- Drugs and alcohol addiction.
- Perceived rise in crime – car theft, teen drug abuse, and “gang-like” activity.

Youth

- Teen pregnancy.
- A lot of division between rich and poor in the schools.
- Need affordable child care around the clock.

Services and Infrastructure

- Heavy traffic.
- Traffic congestion.
- Too much multi-family residential housing.
- Too many “bandit signs” on poles.
- Transition and decline along 1960 – movement north.
- Growing traffic problems.
- Increased growth is outdistancing the ability to provide services in general (more people require more support).
- Roads and traffic.

Homeless

- Many homeless people on the streets.
- A lot of homeless people on 1960.

Do the local places of worship play any roles in the three best things?

- Our church is active in our community and interested in the community's problems and how to solve them.
- By helping people to disciple with compassion for others.
- Not really. There is little evidence of supporting community based, family oriented activities that help change people's hearts, beyond the internal local church programs proposed to support and maintain church growth. The churches we have are simply by-products of the growth in the community population, and are planted here for the primary purpose of supporting church growth statistics.
- The Pastors and local businessmen came together to get rid of the street vendors.
- Churches provide a number of general parenting classes for non-members.
- Churches support the schools.
- There are several large churches with many programs and ministries that make the area more attractive to people moving in.
- There is a fairly significant level of Christian influence in the schools and government of the area.
- The church provides a sense of community and identity. Most churches (the respondent) deals with are active socially with service and so necessarily involve the community.
- Some churches encourage input and involvement in school system's decisions.
- Some churches are more diverse than others and they have a role to play in meeting the diversity needs of the community.

Are there other contributions that places of worship are making to the area?

- Within the past couple of years our church started an outreach ministry at a local apartment complex and has seen many people saved from this ministry. We have contributed clothing and school supplies to the children of the apartments and provided activities such as tutoring, study help, and wholesome activities.
- A number of churches are involved in providing social services through Northwest Assistance Ministries.
- Some (very few) youth pastors are engaged in the schools.
- One church does a Christmas Outreach in Old Town Spring.
- Some local impact right near congregational facilities.
- Have yet to see any visible, notable contributions. Most of the things that are noteworthy probably happen behind the scenes. Hopefully they support the local community businesses with the money they spend as much as possible.
- Community night of prayer and worship.
- Assistance with rent, clothing, shelters, and housing programs.
- There are several good Christian private schools.
- Many churches are supporting the Carenet center, both financially and physically.
- One church serves disadvantaged children with day camps.
- One church is going into the community with bags of groceries, car washes, etc.
- Several churches are having mission "fairs" to expose organizations to the congregation.

Can you think of any ways local places of worship help with addressing these problems?

- Meeting together and joining the community to face local problems.
- Cooperative prayer effort.
- Parenting classes.
- Area-wide evangelistic effort.
- Facility focused ministry for people who can come to the location.
- Focus on prayer.
- Perhaps if they decided to look less at ‘buildings and budgets’ and more at reaching the heart of the primary demographic, then the problems would decrease.
- Give food supplies.
- Prayer walking.
- Prayer targets.
- Churches work with social services by providing sliding-scale fees for affordable child care.
- Several new church plants are rising to meet the growth and are reaching out to the community to involve the people.
- Most churches have benevolence funds to help with financial needs, as well as job placement ministries.

Can you think of other organizations and programs that are helping address these problems?

- Local government, both city council and county commissioners.
- Palmer Drug Abuse Program does some things with addiction.
- Northwest Assistance Ministries meets social needs.
- Subdivisions hire constables and sheriffs to manage crime. Multi-family apartment units are filling up with illegal aliens and HUD/low income families, which have a tendency to attract persons and behaviors that promote problems.
- Salvation Army.
- Spring Assistance Ministry.
- 1960 Community Alliance.
- Spring/Klein/Champions Community Transformation Group.
- The local NHMCCD system has a lot of programs in place to help with financial as well as other resources such as GED classes, community education, and PELL grants.
- Special programs at the schools do a good job of plugging students in. Teen parenting teachers and their team bring Carenet into the schools and bring students to Carenet.

Can you think of any ways that local places of worship contribute, even unwittingly, to making these problems worse?

- By not being involved and not addressing the problems head-on. Our churches generally act alone. However, churches should join forces and together they would be a voice to be reckoned with.
- Failure to address the issues.
- Lack of communication between ministry leaders.
- Perception of competition between churches.
- Lack of a united effort.
- Operating in isolation and independent competition results in understaffed and under funded programs with little impact.
- Lack of partnerships with other sectors of the community.
- Ignoring the problems.
- Lack of “prayerfulness.”
- Working for decisions for Christ instead of making disciples of Christ.
- One way is by supporting the welfare mentality and having ‘give-aways’ disguised as outreaches, which are largely failures due to the demographic differences between the WASPs in the churches and the immigrants to whom they are ‘ministering’.
- By clustering among themselves instead rather than devising activities that get believers back into the streets where they can be of use to God to minister to the lost. For example, community nights of worship are fun (and an obvious spiritual benefit), but so far have yielded little in terms of motivating believers to get out of their pews and into the community. Lots of effort is going into their ‘production’.... It’s time to quit promoting the ‘sniffing’ and begin to start doing things that make a difference.
- ‘If it wasn’t invented here, then it’s not something we’re interested in’ is the primary theme of every church in the community.
- By not addressing uncomfortable topics, such as abortion, drug abuse, family violence, and teen pregnancy.
- Ignorance.
- Too busy to pray.
- Myopic vision.
- Lack of cooperation with other churches.
- Need more pastoral support for the two groups that meet together two times per month. Only 5 out of 100 Evangelical leaders come to pray.
- Too much focus on church growth.
- Too much independence and competition rather than collaboration.
- Too much focus on serving church members rather than on the community.
- Not enough of a call to follow Christ and his counter-culture movement.
- Churches are increasingly marginalized and irrelevant to the community.
- Unchurched people distrust the church.
- Churches are unaware of the real problems facing the community.
- Churches in the suburbs have chosen to ignore the plight of other believers and churches in less fortunate parts of our city.

- Slowness to include diversity.
- Although some have ESL, there is still a slowness to include those populations in the general congregation.

Can you think of any suggestions or potential programs, not already in place, that would help to solve the problems within the Spring/Klein area?

Children and Education

- Churches should sponsor a youth sports team and provide sporting activities that would join youth from the community and churches together.
- After-school mentoring program.
- A united area-wide youth program.
- Churches should partner with school districts to meet student needs.

Social Services

- Marriage counseling and training courses.
- There needs to be a way to feed the hungry, like a soup kitchen or homeless shelter.
- There is a need in this area for STD clinics and testing. Clients have to go a long way to get tested.
- There is not necessarily a need for more services, but for a networking of resources that already exist so that everyone knows what's available.

Churches

- Assist in cleaning vacant lots, making home repairs, and helping with lawn maintenance for the elderly and poor.
- Provide a free, online local church community that makes rapid prayer request/response possible.
- Find ways to mobilize the church as a cohesive body of believers, performing acts of ministry in ways and places that reach the primary demographic of the community, not just the illegal aliens holed up in low income housing. What a waste of time and valuable efforts and resources.
- The local community and church have totally missed the boat in terms of ministering to and providing for military families in the area that have been devastated financially due to obligations of family provider to serve our country. I guess we are all too focused on how to bring money in and pack the pews instead.
- The Church needs to get involved with the schools, or, even, better, the schools should get involved with the Church.
- Churches need to have more outreaches.

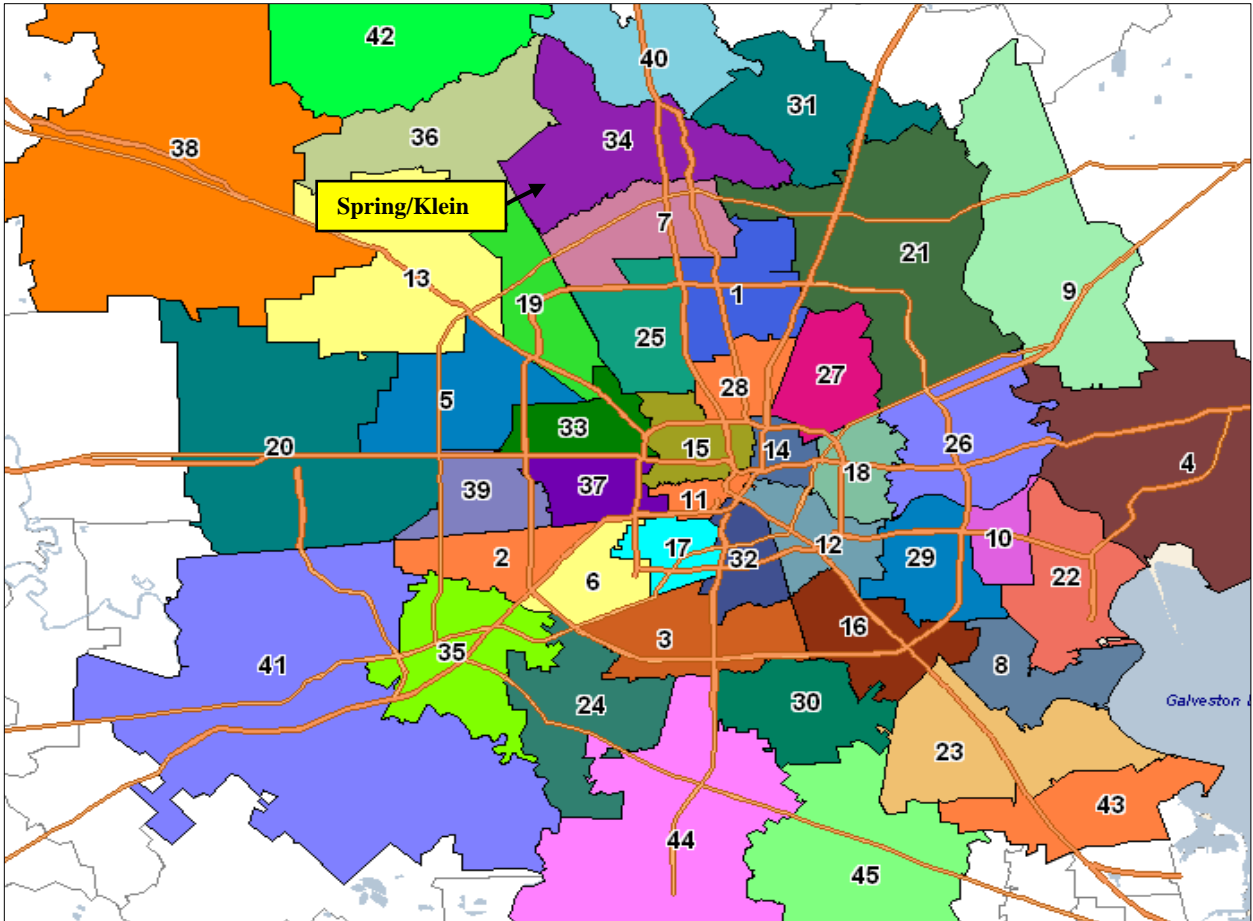

Finally, is there anything else about the Spring/Klein area, that you think is especially important, that we really need to know about, that we ought to work on, or that we should include in this report?

- There is a need to engage the increasing Hispanic population.
- The rise in Wicca activity, especially in the schools.
- Start developing ministry for the middle class, white-collar families that are hurting and dying in a lost world! They make up the largest demographic in this community.
- The Planned Parenthood facility promotes not family, but abortion.
- I think the spirit of ease and convenience as well as consumerism and greed are major underlying issues that are hurting our community. Those very things are why most people move to the suburbs in the first place. It will take a serious move of God to break us free from these long standing bonds.
