# ***BACKGROUND OF THE BAYLOR CENTER FOR COMMUNITY RESEARCH AND DEVELOPMENT***

## ***Mission***

The Center for Community Research and Development (CCRD) was established at Baylor University in 1979 as a multidisciplinary entity with a mission of **engaging Baylor faculty and students in applied social research to improve the local quality of life**. Over time, the CCRD has broadened its focus, sometimes engaging in statewide or national research, and the CCRD has become closely linked with Baylor's Ph.D. program in Applied Sociology, where Ph.D. students serve as center research analysts. Still, our research remains multidisciplinary and many of the CCRD's projects retain a local quality of life focus.

## ***Facilities***

The CCRD originally worked out of faculty offices in Sociology and Political Science and moved into its own facilities in 1990, when the operations center was located in the basement of the Sid Richardson Science Building. The CCRD moved to Suite 300 of the Robinson Tower in 1994. These modern facilities allow easier access to the community and include:

- offices for Center directors, six doctoral students, research analysts, and a project coordinator,
- focus group facilities with a separate observation room and recording equipment,
- a conference room for meetings and graduate seminars,
- report production facilities for CCRD documents,
- a local area network with Windows operating systems, and
- a Computer Assisted Telephone Interviewing (CATI) system.

## ***Services***

The Center for Community Research and Development is equipped to undertake a wide variety of projects for organizations, businesses, industries, and governmental agencies. Services include:

- Mail Surveys
- Telephone Surveys
- Questionnaire design
- Needs assessments
- Program planning and evaluation
- Impact assessments
- Population trend studies and projections
- Data collection and analysis
- Sampling designs
- Focus groups
- Seminars and workshops on community issues
- Mock Juries and Jury Consulting

### *Society for Applied Sociology*

From 1998 through 2001, the CCRD served as the administrative office for the Society for Applied Sociology, an international organization for professionals involved in applying sociological knowledge in a wide variety of settings. The CCRD retains an active membership in SAS and Dr. Tillman Rodabough is the President. The mission statement for SAS is to:

- Provide a forum for sociologists and others interested in applying sociological knowledge.
- Enhance understanding of the interrelationship between sociological knowledge and sociological practice.
- Increase the usefulness and effectiveness of applied sociological research and training.

### *Selected Previous Clients*

The CCRD has served a varied clientele on a large number of issues. Representative projects include:

- **Telephone surveys** for the City of Waco, Southwestern Bell, the *Waco Tribune-Herald*, Houston Profile Project
- **Site location research** for the Perryman Group, American Airlines
- **Needs assessments** for the Baptist General Convention of Texas, the United Way, HOTCOG
- **Population projections** for the Heart of Texas Council of Governments, Heritage House
- **Focus groups** for Creative Education Institute, Baylor University, EEOC, City of Waco, the United Way
- **Mail-out surveys** for Hillcrest Baptist Medical Center, the City of Woodway, Baptist General Convention of Texas
- **Intercept surveys** for Richland Mall, the Texas Ranger Museum, the Dr. Pepper Museum
- **Mock juries** and **change of venue** research for Amarillo, Dallas and Waco law firms
- **Program assessments** for the McLennan County Youth Collaboration, Waco Police Department
- **Door-to-door surveys** for the Waco Housing Authority, Mission Waco, Drug Prevention Resources
- **Voter exit interviews** for the Dallas Independent School District
- **Institutional evaluation** for San Marcos Baptist Academy, the BGCT Education Commission. Baptists in Scouting, Baylor University, Waco Independent School District
- **Program development** for the Cooper Foundation, the Junior League, MHMR

### *Fees*

The CCRD is a non-profit service center for the community and University. Fees charged for research projects represent actual costs for services and enable the CCRD to be self-supporting.

## *Staff*

- **Dr. Larry Lyon** is Director of the CCRD, Dean of the Graduate School, and Professor of Sociology in the Department of Sociology and Anthropology (Larry\_Lyon@Baylor.edu).
- **Dr. Tillman Rodabough** is Research Director for the CCRD and Professor of Social Psychology in the Department of Sociology (Tillman\_Rodabough@Baylor.edu).
- **Mrs. Debbie Marable** is the Projects Coordinator for the CCRD, Graduate Program Assistant for Sociology and a graduate of Baylor University (Debbie\_Marable@Baylor.edu).
- **Dr. Carson Mencken** is Associate Professor of Sociology and Graduate Program Director for Sociology, with research expertise in statistical analysis and spatial modeling and serves as a research professor for CCRD (Carson\_Mencken@Baylor.edu).
- **Dr. Robyn Bateman Driskell** is Associate Professor of Sociology with expertise in demography and serves as a research professor for the CCRD (Robyn\_Bateman@Baylor.edu).
- **Dr. Charles Tolbert, II** is Professor and Chair, Department of Sociology and Anthropology and GIS and census data consultant for CCRD (Charlie\_Tolbert@Baylor.edu).
- **Lacey C. Wiggins, M.A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Lacey\_Chapman@Baylor.edu).
- **Rusty Parker, M. A.** is a Senior CCRD Research Analyst and a doctoral student in the Baylor Applied Sociology Program (Rusty\_Parker@Baylor.edu).
- **Jodien Matos** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jodien\_Matos@Baylor.edu).
- **Kathy Krey** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Kathy\_Krey@Baylor.edu).
- **Jeniece Williams** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program (Jeniece\_Williams@Baylor.edu).
- **Elizabeth Terrazas-Carrillo** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program ([Elizabeth\\_Terrazas-Carrillo @Baylor.edu](mailto:Elizabeth_Terrazas-Carrillo@Baylor.edu)).
- **Liz Embry** is a CCRD Research Analyst and a master's student in the Baylor Applied Sociology Program ([Elizabeth\\_Ninneman@Baylor.edu](mailto:Elizabeth_Ninneman@Baylor.edu)).

*Each staff person can also be contacted at the CCRD office (254) 710-3811 or e-mailed at CCRD@Baylor.edu. Our website address is <http://www.Baylor.edu/CCRD>*

## **Background of the Poll**

*Center for Community Research and Development*  
Poll 98  
(September 2004)

In the fall of 2003, the Center for Community Research and Development (CCRD) conducted a scientific poll to assess religious and lifestyle practices and beliefs in 45 communities in the Greater Houston Area. Questions for the poll were developed by CCRD researchers using national polls on lifestyles and religion as a guideline.

From October 1 through November 15, a total of 2,419 Greater Houston Area residents were interviewed using a Computer Assisted Telephone Interviewing (CATI) system. The CATI technology allows control over the interviewing process and automates data entry. The sample was selected from a computer-generated set of random phone numbers. Random generation includes residents with unlisted numbers. Other steps taken to ensure the quality of the poll include: (1) testing and editing experimental versions of the questionnaire to increase the clarity and reliability of each question; (2) intensive training for each interviewer; (3) continual monitoring of interviews by social science Ph.D.s; (4) daily review of work and interviewing procedures and results by the CCRD staff; (5) calling during times established in previous studies to provide the most representative sample; (6) making up to five call-backs for each phone number to avoid distorting the sample toward the more easily accessible residents; (7) using special “screens” to increase the number of male and minority respondents; (8) purchasing a special bank of phone lines with “Community Research” as the caller identification label rather than the standard label, “Baylor University;” and (9) employing Spanish speaking interviewers for households where Spanish is the primary language.

The demographic characteristics of the sample resemble those of demographics available through external sources. While the sample is largely representative of the population, minority ethnic groups were slightly under-represented among respondents in the poll. To compensate, this analysis uses weighted data to ensure a more representative sample. The final sample is comparable to official data available on the 45 communities in the Greater Houston Area’s 3,097,362 adults. For example, the sample used in the analysis is approximately 58% “Anglo,” 20% Hispanic, and 17% African-American.<sup>[1]</sup> The percentages for African Americans and Anglos closely reflect recent Census estimate population numbers for the 45 communities in the Greater Houston Area.<sup>[2]</sup> Other population numbers/sample comparisons suggest similarly low levels of bias.

For the overall response distributions of the questionnaire data, the responses will typically vary by less than 3 percentage points in either direction at the 95% confidence level. For cross-tabulation tables that analyze smaller portions of the sample by dividing it into various categories such as race or education, the percentage of variation will be considerably higher.

<sup>[1]</sup> Throughout this report, the terms “White” and “Anglo” refer to non-Hispanic whites. “African-American” and “Black” are used interchangeably.

<sup>[2]</sup> 2002 Census estimates show a total adult population of 3,097,362 for the 45 communities in the Greater Houston Area. Of the approximately 3,097,362 adults: about 45.0% are Anglo, 17.5% African American, 30.2% Hispanic, 0.4% American Indian, 5.4% Asian/Pacific Islander and 1.4% are Multi-Racial.

## **Executive Summary**

*Center for Community Research and Development*  
**Sugar Land/Stafford Area (CSA #35)**

- The racial/ethnic composition of the Sugar Land/Stafford CSA is predominantly Anglo and significantly different than that of the Greater Houston Area.
- Most people in the Sugar Land/Stafford CSA are in the 35 to 44 year age group (19.5%).
- There are significantly more adults in the Sugar Land/Stafford CSA with college degrees than there are in the Greater Houston Area (31.5% vs. 18.8%).
- There are significantly more married couples with children in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (53.5% vs. 43.0%).
- Over half (55.60%) of adults living in the Sugar Land/Stafford CSA receive a great deal of satisfaction from their neighborhood.
- Family satisfaction in the Sugar Land/Stafford CSA is slightly higher than the family satisfaction value for the Greater Houston Area (80.81% vs. 79%).
- Only 29.54% of adults living in the Sugar Land/Stafford CSA report being successful at balancing the dual demands of work and family.
- The Sugar Land/Stafford CSA ranks eleventh among all CSAs in the Greater Houston Area on overall happiness.
- 36.00% of adults living in the Sugar Land/Stafford CSA attend church at least once a week.
- In the Sugar Land/Stafford CSA an estimated 68,600 adults, or a majority of adults in the Sugar Land/Stafford CSA, do not attend church weekly.
- Only 9.34% of adults living in the Sugar Land/Stafford CSA never attend church.
- In the Sugar Land/Stafford CSA, almost 58,600 adults attend church occasionally, but not every week.
- The Sugar Land/Stafford CSA ranks in the bottom quarter of all CSAs in the Greater Houston Area on percent who consider themselves born again.
- There appears to be a high level of spiritual interest in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA, an estimated 74,900 adults report reading the Bible or other inspired literature when they have a problem.
- More people in Sugar Land/Stafford CSA report that they would pray when they have problems (89.39%) than would read the Bible (69.39%), or seek help from a religious counselor (35.79%) or place of worship (33.39%).

**Houston Profile Project  
Sugar Land/Stafford Area (CSA #35)**

Demographics

Center for Community Research and Development  
Community Poll 98

**Population by Race and Ethnicity  
Sugar Land/Stafford CSA and Greater Houston Area**

- The racial/ethnic composition of the Sugar Land/Stafford CSA is predominantly Anglo and significantly different than that of the Greater Houston Area.
- The proportion of Anglos in the Sugar Land/Stafford CSA is significantly greater than that of the Greater Houston Area (53.3% vs. 45.0%).
- The Black population of the Greater Houston Area is significantly greater than that of the Sugar Land/Stafford CSA (17.5% vs. 10.2%).
- The Hispanic population in the Sugar Land/Stafford CSA is less than half that of the Greater Houston Area (14.3% vs. 30.2%).
- The Asian and Pacific Islander population of the Sugar Land/Stafford CSA is almost four times that of the Greater Houston Area (20.5% vs. 5.4%)
- There are no significant differences between the Sugar Land/Stafford CSA and the Greater Houston Area in the American Indian and Multiracial categories.

**Population by Age**  
**Sugar Land/Stafford CSA and Greater Houston Area**

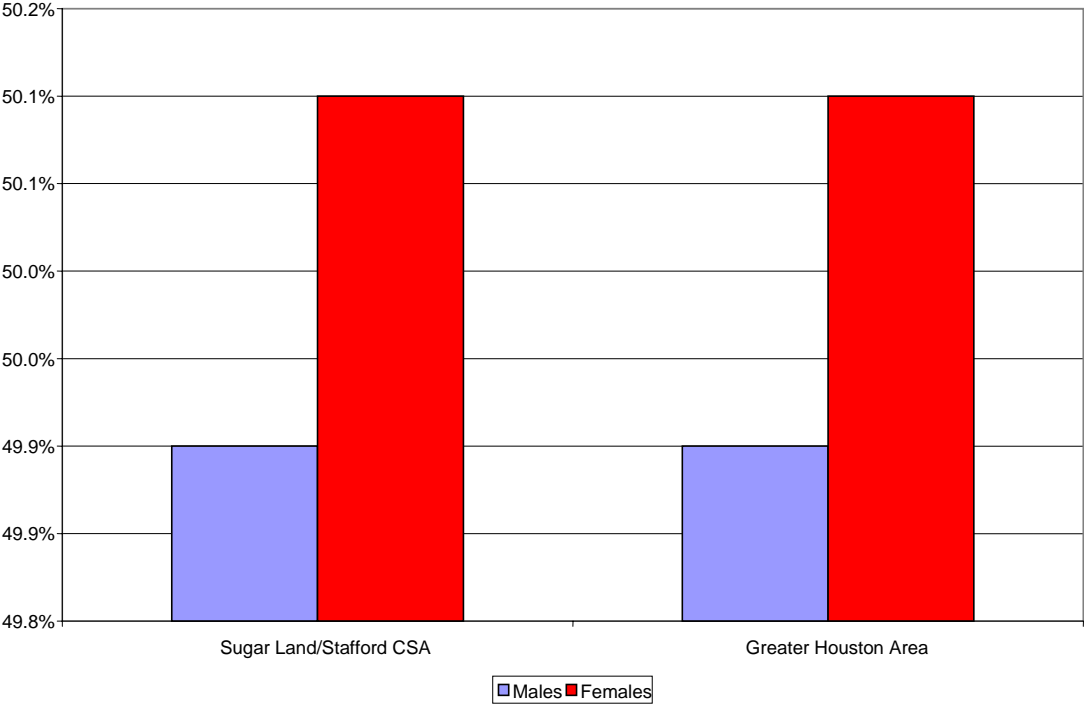

- There are significant differences between the Greater Houston Area and the Sugar Land/Stafford CSA in terms of age.
- There are more people in the Sugar Land/Stafford CSA under the age of 18 than there are in the Greater Houston Area (29.9% vs. 28.3%).
- There are significantly fewer people in the Sugar Land/Stafford CSA over the age of 65 than there are in the Greater Houston Area (5.7% vs. 7.5%).
- There are significantly fewer people in the 18 to 35 year age group in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (20.6% vs. 26.0%).
- There are more people in the 45 to 64 year age group in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (24.4% vs. 21.7%).
- The modal category in the Sugar Land/Stafford CSA is the 35 to 44 year age group (19.5%).

**Median Age by Gender  
Sugar Land/Stafford CSA and Greater Houston Area**

**Population by Gender  
Sugar Land/Stafford CSA and Greater Houston Area**

- The gender composition of the Sugar Land/Stafford CSA and the Greater Houston Area are identical.
- In both the Sugar Land/Stafford CSA and the Greater Houston Area, males comprise 49.9% of the population, and females 50.1%.
- Males in the Sugar Land/Stafford CSA have a high median age than males in the Greater Houston Area (33.8 years vs. 31.8 years).
- Females in the Sugar Land/Stafford CSA have a higher median age than females in the Greater Houston Area (35.2 years vs. 33.2 years).
- Females in the Sugar Land/Stafford CSA have a higher median age than males in the Sugar Land/Stafford CSA (35.2 years vs. 33.8 years).

**Educational Attainment Among Adults Over 25  
Sugar Land/Stafford CSA and Greater Houston Area**

- There are significant differences in the educational attainment levels between the Sugar Land/Stafford CSA and the Greater Houston Area.
- In the Sugar Land/Stafford CSA, there are less than half as many people who have not graduated from high school as there are in the Greater Houston Area (9.7% vs. 22.8%).
- There are significantly fewer people in the Sugar Land/Stafford CSA who have graduated from high school but have no college degree than there are in the Greater Houston Area (36.3% vs. 44.0%).
- There are more adults in the Sugar Land/Stafford CSA with Associate’s degrees than there are in the Greater Houston Area (6.4% vs. 5.1%).
- There are significantly more adults in the Sugar Land/Stafford CSA with college degrees than there are in the Greater Houston Area (31.5% vs. 18.8%).
- There are significantly more adults in the Sugar Land/Stafford CSA with graduate or professional degrees than there are in the Greater Houston Area (16.1% vs. 9.3%)
- Most adults in the Sugar Land/Stafford CSA have a college degree (31.5%).

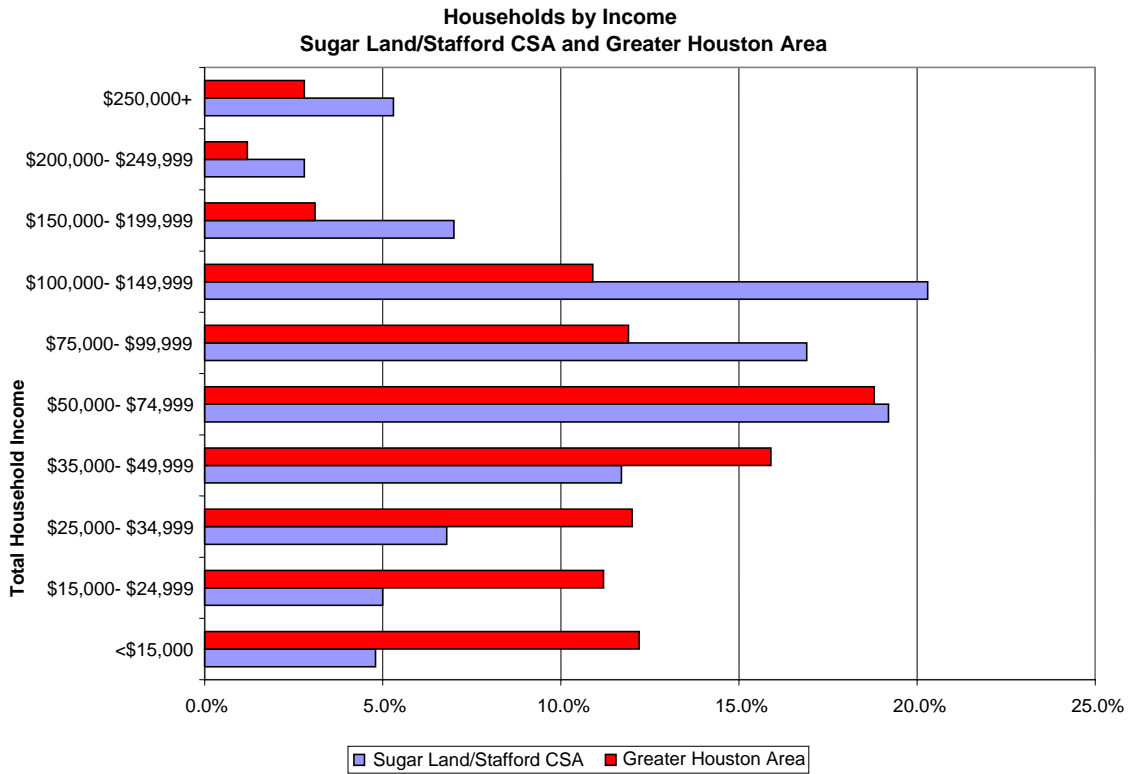

**Total Family Households by Type**  
**Sugar Land/Stafford CSA and Greater Houston Area**

- There are significant differences between the Sugar Land/Stafford CSA and the Greater Houston Area in terms of types of family households.
- There are significantly more married couples with children in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (53.5% vs. 43.0%).
- There are significantly fewer family households with children headed by a single parent in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (10.2% vs. 17.1%).
- There are significantly fewer households consisting of single males or females without children in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (4.5% vs. 8.0%).
- Most households (53.5%) in the Sugar Land/Stafford CSA consist of married couples with children.

- Overall, the household incomes of people in the Sugar Land/Stafford CSA are higher and significantly different than those of households in the Greater Houston Area.
- There are significantly fewer households in the Sugar Land/Stafford CSA with incomes less than \$15,000 than there are in the Greater Houston Area (4.8% vs. 12.2%).
- There are significantly more households in the Sugar Land/Stafford CSA with incomes over \$100,000 than there are in the Greater Houston Area (35.4% vs. 18.0%).
- There are significantly more households in the Sugar Land/Stafford CSA with incomes over \$200,000 than there are in the Greater Houston Area (8.1% vs. 4.0%).
- The modal income category in the Sugar Land/Stafford CSA is the \$100,000 to \$149,999 range (20.3%).

**Income Dynamics**  
**Sugar Land/Stafford CSA and Greater Houston Area**

- In all categories, the Sugar Land/Stafford CSA exceeds the Greater Houston Area in terms of income level.
- The median household income of the Sugar Land/Stafford CSA is significantly higher than that of the Greater Houston Area (\$80,245 vs. \$52,462).
- The median family income of the Sugar Land/Stafford CSA is significantly higher than that of the Greater Houston Area (\$88,115 vs. \$61,391).
- The median non-family income of the Sugar Land/Stafford CSA is significantly higher than that of the Greater Houston Area (\$42,499 vs. \$34,908).
- The total per capita income of the Sugar Land/Stafford CSA is significantly higher than that of the Greater Houston Area (\$30,642 vs. \$23,402).

**Total Housing Units  
Sugar Land/Stafford CSA and Greater Houston Area**

- The proportion of housing units occupied by the owner is significantly higher in the Sugar Land/Stafford CSA than in the Greater Houston Area (75.8% vs. 55.6%).
- The proportion of housing units occupied by a renter is significantly lower in the Sugar Land/Stafford CSA than in the Greater Houston Area (20.0% vs. 37.4%).
- The proportion of housing units left vacant in the Sugar Land/Stafford CSA is significantly lower than the proportion in the Greater Houston Area (4.2% vs. 7.1%).
- In the Sugar Land/Stafford CSA, a housing unit is almost four times more likely to be occupied by the owner than by a renter (75.8% vs. 20.0%).

**Units by Year Built**  
**Sugar Land/Stafford CSA and Greater Houston Area**

- Overall, housing units in the Sugar Land/Stafford CSA are newer than those in the Greater Houston Area.
- Significantly more housing units in the Sugar Land/Stafford CSA have been built since 1999 than in the Greater Houston Area (6.7% vs. 3.7%).
- There were significantly more housing units built in the 1990s in the Sugar Land/Stafford CSA than in the Greater Houston Area (45.1% vs. 19.8%).
- Most housing units (32.2%) in the Sugar Land/Stafford CSA were built in the 1980s.
- Over 77.3% of the housing units in the Sugar Land/Stafford CSA have been built since 1980.
- There were significantly fewer housing units built in the Sugar Land/Stafford CSA before 1970 than there were in the Greater Houston Area (5.5% vs. 30.6%).

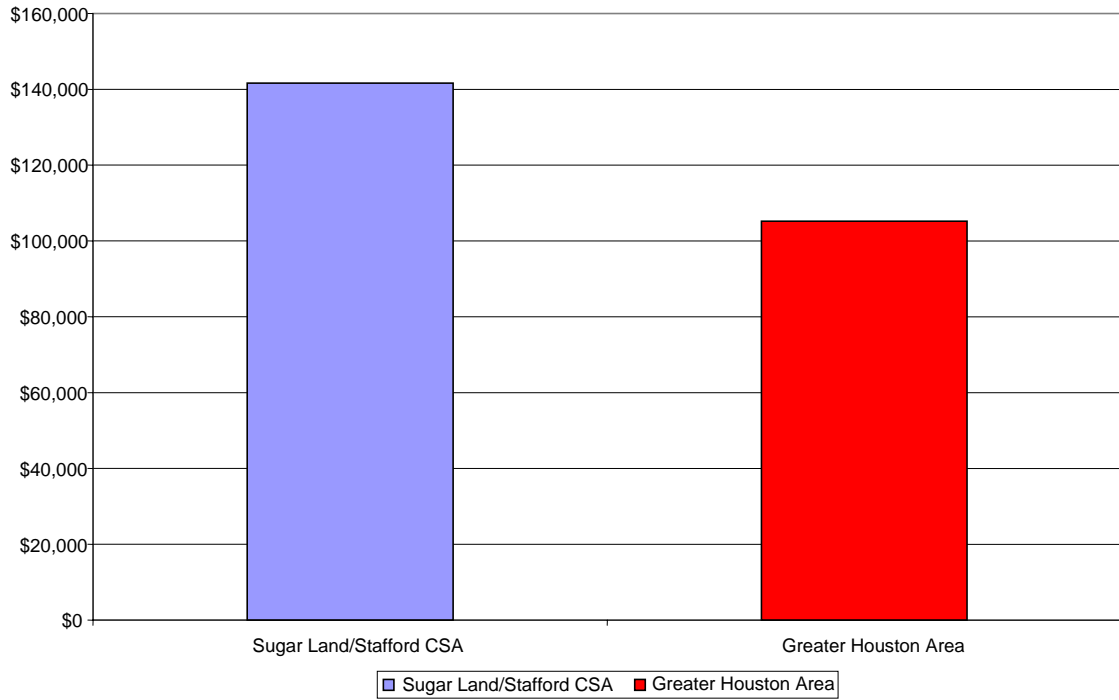

**Housing Units by Type**  
**Sugar Land/Stafford CSA and Greater Houston Area**

- The proportion of detached single housing units in the Sugar Land/Stafford CSA is significantly greater than that of the Greater Houston Area (81.5% vs. 59.1%).
- The proportion of dwellings with multiple units is significantly smaller in the Sugar Land/Stafford CSA than in the Greater Houston Area (14.2% vs. 32.8%).
- The proportion of dwellings with 50 or more units is significantly smaller in the Sugar Land/Stafford CSA than it is in the Greater Houston Area (6.0% vs. 14.3%).
- The proportion of housing units that are mobile homes is significantly smaller in the Sugar Land/Stafford CSA than it is in the Greater Houston Area (1.8% vs. 4.2%).

**Median Home Value  
Sugar Land/Stafford CSA and Greater Houston Area**

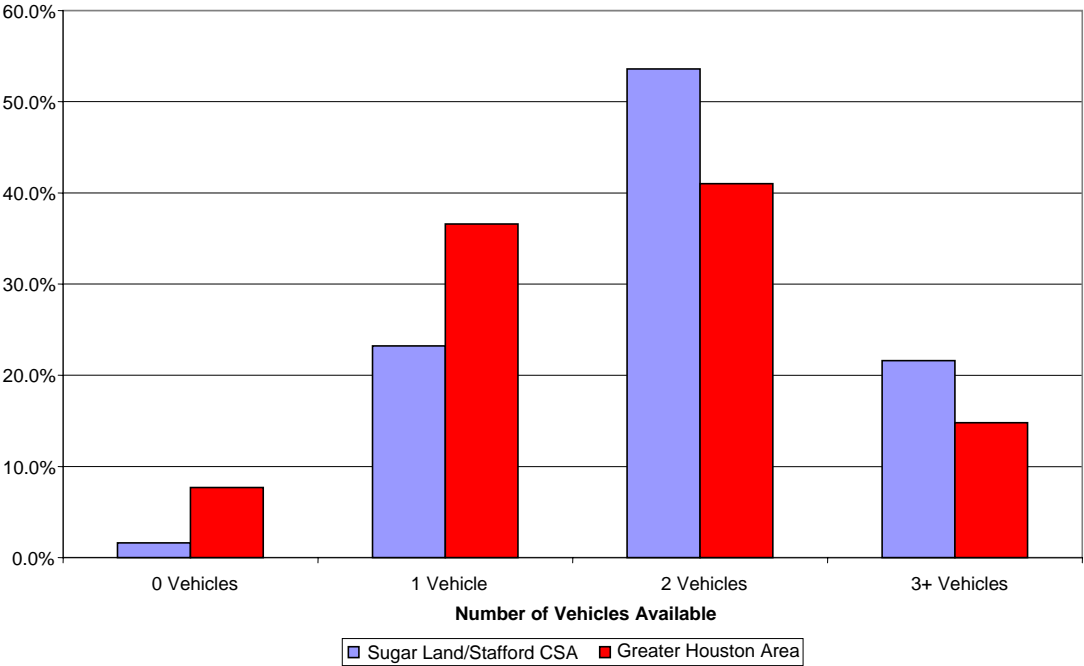

**Median Length of Occupancy  
Sugar Land/Stafford CSA and Greater Houston Area**

- The median length of occupancy is generally longer for dwellings that are occupied by the owner, and shorter for those occupied by a renter.
- In owner-occupied housing units, the Sugar Land/Stafford CSA has a shorter median length of occupancy than that of the Greater Houston Area (5.9 years vs. 8.5 years).
- In renter-occupied dwellings, the Sugar Land/Stafford CSA has a shorter median length of occupancy than that of the Greater Houston Area (1.1 years vs. 1.6 years).
- In the Sugar Land/Stafford CSA, the median length of occupancy for owner-occupied households is over five times that of renter-occupied households (5.9 years vs. 1.1 years).

**Households by Count of Vehicles Available  
Sugar Land/Stafford CSA and Greater Houston Area**

- The number of households with no vehicles is significantly smaller in the Sugar Land/Stafford CSA than in the Greater Houston Area (1.6% vs. 7.7%).
- The number of households with only one vehicle available is significantly smaller in the Sugar Land/Stafford CSA than in the Greater Houston Area (23.2% vs. 36.6%).
- The number of households with 2 or more vehicles available is significantly greater in the Sugar Land/Stafford CSA than in the Greater Houston Area (75.2% vs. 55.8%)
- Most households in the Sugar Land/Stafford CSA have two vehicles available (53.6%).

**Households by Count of Persons**  
**Sugar Land/Stafford CSA and Greater Houston Area**

- There are significant differences between the Sugar Land/Stafford CSA and the Greater Houston Area in terms of number of people per household.
- There are significantly fewer households in the Sugar Land/Stafford CSA with only one person than there are in the Greater Houston Area (13.8% vs. 23.5%).
- There are significantly more households with three or more people in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (58.9% vs. 48.2%).
- There are fewer households with six or more people in the Sugar Land/Stafford CSA than there are in the Greater Houston Area (5.3% vs. 6.2%).

# **Houston Profile Project Sugar Land/Stafford Area (CSA #35)**

## **CSA Rankings**

**By  
Key Lifestyle and Religion Questions**

In this section we rank order the 45 CSAs by key religious and lifestyle questions. We use a form of hierarchical modeling in which individual responses to the lifestyle and religion questions in the HPP Poll are estimated with key socio-demographic measures from each CSA. These measures include age structure, race and ethnic composition, household structure, education, income, and housing values. The analysis produces an estimated average response to each question for each of the 45 CSAs. We subsequently rank the 45 CSAs based on these responses, and provide tables of these rankings in this section of the report. Please note that the measures reported here are those for which the hierarchal analysis proved useful. For some measures, the models did not perform well enough to allow us to report rankings with an acceptable level of confidence.

## **Percent Who Get A Great Deal Of Satisfaction From Their Neighborhood Sugar Land/Stafford CSA**

- The Sugar Land/Stafford CSA ranks fifth among all CSAs in the Greater Houston Area on neighborhood satisfaction.
- Over half (55.60%) of adults living in the Sugar Land/Stafford CSA receive a great deal of satisfaction from their neighborhood.
- The percentage of people who receive a great deal of satisfaction from their neighborhood for the Sugar Land/Stafford CSA is slightly greater than that for the Greater Houston Area.
- For the Greater Houston Area, 55% report receiving a great deal of satisfaction from their neighborhood.
- There are an estimated 107,161 adults living in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA an estimated 59,600 adults receive a great deal of satisfaction from their neighborhood.

### CSA by Percent Who Receive a Great Deal of Satisfaction with Family

Ranking	CSA	Percent Great Deal of Satisfaction with Family

## **Percent Who Receive A Great Deal Of Satisfaction From Family Sugar Land/Stafford CSA**

- The Sugar Land/Stafford CSA ranks eighth among all CSAs in the Greater Houston Area on family satisfaction.
- 80.81% of adults living in the Sugar Land/Stafford CSA receive a great deal of satisfaction from their families.
- Family satisfaction in the Sugar Land/Stafford CSA is slightly higher than the family satisfaction value for the Greater Houston Area.
- For the Greater Houston Area, 79% report receiving a great deal of satisfaction from their families.
- There are an estimated 107,161 adults living in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA an estimated 86,600 adults receive a great deal of satisfaction from their families.
- However, that means that an estimated 20,600 adults in the Sugar Land/Stafford CSA do not receive a great deal of satisfaction from their families.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory family relationships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches may have an opportunity to make connections with those who do not receive a great deal of satisfaction with family life.

## **Percent Who Receive A Great Deal Of Satisfaction From Their Friends Sugar Land/Stafford CSA**

- The Sugar Land/Stafford CSA ranks seventh among all CSAs in the Greater Houston Area on satisfaction from friends.
- 86.41% of adults living in the Sugar Land/Stafford CSA receive a great deal of satisfaction from their friends.
- This number is significantly higher than in the Greater Houston Area.
- For the Greater Houston Area, 69% report receiving a great deal of satisfaction from their friends.
- More people in Sugar Land/Stafford CSA report receiving a great deal of satisfaction from their friends than report receiving a great deal of satisfaction from their families (86.41% vs. 80.81%).
- Adults in the Sugar Land/Stafford CSA are much less satisfied with their neighborhood (55.60%) than with their friends (86.41%) and families (80.81%).
- There are an estimated 107,161 adults living in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA an estimated 92,600 adults receive a great deal of satisfaction from their friends.
- This means, however, that an estimated 14,600 adults in the Sugar Land/Stafford CSA are less satisfied with their friendships.
- This is important for church outreach missions because research by Stark (2000) shows that people who are not embedded in satisfactory friendships are more open to new relationships than those who have an established functional network of family and friends.
- Therefore, local churches have an opportunity to make connections with those who do not receive a great deal of satisfaction with friendships.

## **Percent Who Report Successfully Balancing Work and Family Sugar Land/Stafford CSA**

- The Sugar Land/Stafford CSA ranks in the middle of all CSAs in the Greater Houston Area on success at balancing work and family.
- Only 29.54% of adults living in the Sugar Land/Stafford CSA report being successful at balancing the dual demands of work and family.
- Compared with the Greater Houston Area, the Sugar Land/Stafford CSA's percentage is lower.
- For the Greater Houston Area, 34% being successful at balancing the dual demands of work and family.
- There are an estimated 107,161 adults living in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA an estimated 31,700 adults report being successful at balancing work and family lives.
- This means, however, that an estimated 75,500 adults, or a majority of adults in the Sugar Land/Stafford CSA, are not as successful at balancing work and family lives.
- This is important for church missions because research shows that the strains of balancing work and family life are among the leading causes of family dissolution (Kendall 2004).
- Working in the Sugar Land/Stafford CSA's neighborhoods to help families be more successful at managing the dual demands of family and work life is a potential community ministry program.

## **Percent Who Are Happy With Their Lives Sugar Land/Stafford CSA**

- The Sugar Land/Stafford CSA ranks eleventh among all CSAs in the Greater Houston Area on overall happiness.
- 50.44% of adults living in Sugar Land/Stafford CSA report being happy.
- This number is slightly higher than in the Greater Houston Area.
- For the Greater Houston Area, 48% report being happy.
- There are an estimated 107,161 adults living in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA an estimated 54,100 adults report being happy.
- This means, however, that over 53,100 adults are not very happy.
- As with satisfaction with family and friends, those who are not happy may be more amenable to new relationships. This is important for church outreach missions because research by Stark (2000) shows that people who are not happy are open to ministry.

## **Percent Who Are Born Again Sugar Land/Stafford CSA**

- The Sugar Land/Stafford CSA ranks in the bottom quarter of all CSAs in the Greater Houston Area on percent who consider themselves born again.
- 51.98% of adults living in the Sugar Land/Stafford CSA consider themselves born again.
- This is only slightly less than the average for the Greater Houston Area.
- The average for the Greater Houston Area is 52%.
- There are an estimated 107,161 adults living in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA, an estimated 55,700 adults consider themselves born again.
- Being born again, however, does not necessarily translate into weekly church attendance in the Sugar Land/Stafford CSA.
- An estimated 17,100 more adults in the Sugar Land/Stafford CSA report being born again than report attending church each week.

- Only 69.74% of adults in the Sugar Land/Stafford CSA report no doubts about the existence of God.
- This figure is lower than the 78% for the Greater Houston Area.
- There are approximately 107,161 adults living in the Sugar Land/Stafford CSA.
- In the Sugar Land/Stafford CSA, an estimated 74,700 adults report no doubts about the existence of God.

# Houston Profile Project Sugar Land/Stafford Area (CSA #35)

## Key Leader Interviews

In this section, the results from individual, face-to-face interviews with key leaders in the CSA community are presented. The interviews were conducted by HPP volunteers using a standardized questionnaire developed by CCRD. Various key positions within the community were identified and the individual leaders that filled that particular position were contacted. If the key leader agreed to an interview, the results are included, maintaining confidentiality. The various responses are listed by question and categorized by topic. The key leader positions included elected community leaders, managers of large employers in the area, principals of local schools, civic organization leaders, labor union leaders, local Chamber of Commerce representatives, editors of neighborhood newspapers, directors of minority interest group, law enforcement officers, and leaders of major places of worship.

Center for Community Research and Development  
Community Poll 98

**Key Leader Interviews**  
**CSA #35 – Sugar Land/Stafford Area**

**What are the best things about the Sugar Land/Stafford area?**

Community Involvement

- Quality of life.
- Participation of citizens to assure quality of life.
- “Hometown feeling.”
- Sense of community.
- Planned community.
- Emphasis on family.
- Family values.
- There are many volunteers within the community, and they contribute both their time and money generously.

Neighborhood Initiatives

Location

- Urban location with a small town feel.
- Close to any event you want to attend.
- Not city life, but still accessible to Houston.

Growth

- Planned growth.

Diversity

- Demographically, there is a very diverse mix of people – a very “international” community.

Cost of Living

- Economic vitality of the population.
- Cost of living.

Safety

- Very safe environment.
- Safety.

Education

- Excellent schools.
- School district.
- School system is great.

## **What are the major problems facing the area?**

### Community

- People are too busy to spend quality time with their families.
- Lack of arts and cultural opportunities.

### Crime

- “People come in from Houston to commit crimes.”
- Drug abuse, primarily among young people.

### Youth

- Parental denial that their children would do anything wrong, i.e. use drugs, drink, be promiscuous.
- Perhaps too much affluence – youth grows up in the “Sugar Land Bubble.”
- Parents are busy trying to make ends meet and sometimes their children are not their first priority.
- Safety in schools is not what it should be.
- Kids staying at home without their parents’ supervision.
- Parents are not involved in the lives of their children, even when they have the means to be. This problem crosses all levels of income and education.

### Services and Infrastructure

- Lack of mobility.
- Rapid growth.
- Because of the rapid growth, there have been problems keeping up with the infrastructure.
- Flooding.
- Traffic.
- Emergency services.
- Transportation.
- Drainage.
- Traffic – the infrastructure has not caught up with the development.

### Cost of Living

- Property taxes are high – 3% of home value and they go up consistently by 10% each year.

## **Do the local places of worship play any roles in the three best things?**

- Churches play a major role in the health of the East Fort Bend Community.
- There are great youth programs in the area.
- Many churches minister to the less fortunate.
- The churches are part of the planned community.
- They promote family values.

- The churches in the area are very active in that they offer programs for children during the day in the summer, and after school.
- There are many churches, so they are convenient and available to the people in the community.
- Some offer private schools, such as the Catholic churches and the Honor Roll School.

**Are there other contributions that places of worship are making to the area?**

- Churches put forth effort to work with the diversity of Sugar Land. The churches, synagogues, and mosques all work together.
- “Well, I think they support charities.”
- They provide facilities and support the values of the community.
- The YMCA has never been turned down by a church in this community when they have needed financial donations or assistance.
- They contributed \$10,000 to the fire and police departments, recently, to assist in a fund raising calendar project.

**Can you think of any ways local places of worship help with addressing these problems?**

- Many new churches are popping up all the time to reach the growing community.
- Churches have prison programs, and help with ministry to the poor.
- Substance abuse programs.
- East side ministers try to reach out and talk about parenting.
- Williams Trace Baptist Church works with a group to increase parental awareness of drugs, etc. by letting another organization use their facilities.
- They have programs for teenagers in the summertime to rebuild and repair homes for needy people, and they provide volunteers, when needed.
- They support the YMCA programs, such as Partners in Youth, Indian Guides, and Teen Court. All of these programs are designed to assist children and teenagers who are “at risk.”

**Can you think of other organizations and programs that are helping address these problems?**

- Rotary Club
- Exchange Club
- Lion’s Club
- Police are educating the community.
- David Wallace, the current mayor, is aware of the diversity in the community.
- The First Colony Community Association is thinking about ways to work across diversity.
- School district
- Law enforcement
- Political clubs, such as Spirit of Freedom Women’s Club and Fort Bend Republican’s Club, discuss problems and possible solutions.
- YMCA

- Boy Scouts and Girl Scouts of America
- Sport Programs – This area has strong Little League and other sports programs.
- “Companies such as Schlumberger are generous in their contributions, however, there is not yet a strong base of corporations to draw from. Fund raising relies on individuals and the few companies that are here.”

**Can you think of any ways that local places of worship contribute, even unwittingly, to making these problems worse?**

- “Unless they acknowledge and work with underage drinking, drugs, etc., they are doing a disservice.”
- Pro-Grad is good, but superficial and insufficient.
- Christian Coalition agitates and makes things worse.
- They don’t want to address the real problems.
- Church leaders don’t want leadership roles in these issues.
- They locate themselves on major roads, on prime real estate – no tax money for that property is being paid.

**Can you think of any suggestions or potential programs, not already in place, that would help to solve the problems within the Sugar Land/Stafford area?**

Children and Education

- Kids need something to do, and the school doesn’t have the money to fund an after school program. Rec centers, dances, pool halls, need to get together and have places for kids to gather for alcohol and drug-free fun. – “A few years ago, there was a rash of garage robberies and vandalism... it’s because kids are bored, not because they need the stolen items.”
- The community needs something for teens, like a youth center – “There’s no place for them, besides the movies, to go and stay out of trouble.”

Social Services

- More volunteers are needed to help with the abstainers program, and just to be role models.

Churches

- After school and evening care for children in places of worship would help.

**Finally, is there anything else about the Sugar Land/Stafford area, that you think is especially important, that we really need to know about, that we ought to work on, or that we should include in this report?**

- “Parents here just don’t believe their kids would do anything wrong. That’s denial.”
- Churches send money to other places to help, but nothing is spent in the community. Within Sugar Land there are fewer places that need to be helped, but new churches are always coming in to the area with their “grand edifices” – “how do they get the money, unless they really aren’t ‘TAX FREE’?”

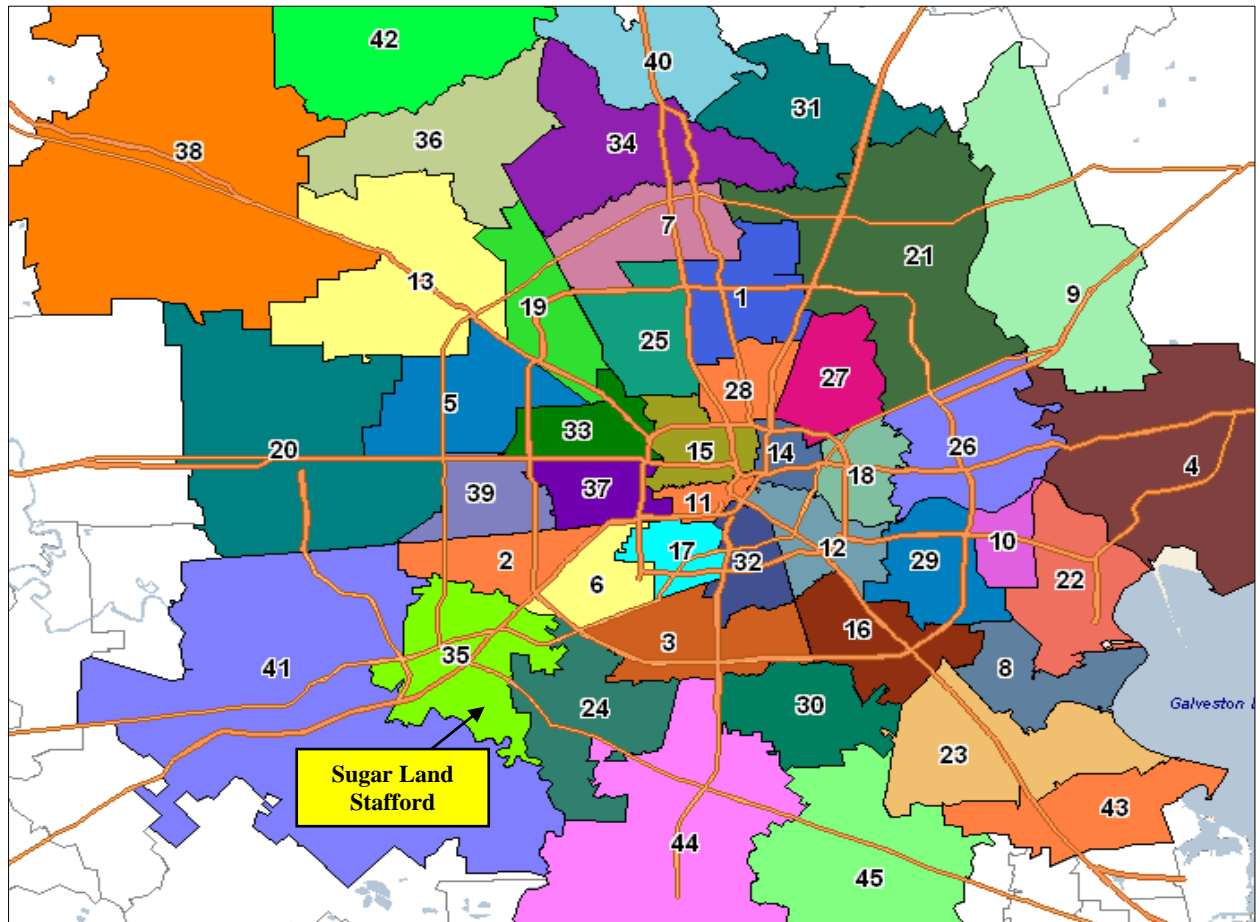

- Sugar Land has a rich heritage – it was one of the first cities to have paved sidewalks.
- Parents need to take care of and take responsibility for their children.
- “This area is extremely diverse in the culture of its residents. For example, on my street, an Iranian is married to a Hungarian, other neighbors are from India, Asia, and all over the world. The class photos from my child’s school looks like a United Nations photo.”
